Corresponding author: Chao Pan (chao_pan@ncepu.edu.cn)

This work was supported in part by the National Natural Science Foundation of China (NSFC) under Grant 61971189, and in part by the Open Funding of the Shaanxi Key Laboratory of Intelligent Processing for Big Energy Data under Grant IPBED3.

In the above article [1], there is a spelling error in one author's name, and we have corrected “WENHE XU” to “YUNHE XU.” In addition, we have also added the author biographies.

YUNHE XU is currently pursuing the B.S. degree with North China Electric Power University, Beijing, China. His research interests include 5G wireless communication, the IoT, and energy management in V2G technology.

ADUGNA GEBRIE JEMBER (Graduate Student Member, IEEE) received the B.S. degree in electrical and instrumentation technology from the Addis Ababa TVET Institute, Addis Ababa, Ethiopia, in 2015, and the M.S. degree in electrical engineering from North China Electric Power University, Beijing, China, in 2020, where he is currently pursuing the Ph.D. degree in electrical engineering. His research interests include energy management in V2G and smart grids.

CHAO PAN (Graduate Student Member, IEEE) received the B.Eng. degree in smart grid information engineering from North China Electric Power University (NCEPU), in 2019, where he is currently pursuing the M.S. degree. His research interests include energy management in V2G and the communication of power systems.

XIONGWEN ZHAO (Senior Member, IEEE) received the Ph.D. degree (Hons.) from the Helsinki University of Technology (TKK), Finland, in 2002. From 1992 to 1998, he was with the Laboratory of Communications System Engineering, China Research Institute of Radiowave Propagation, where he was the Director and a Senior Engineer. From 1999 to 2004, he was with the Radio Laboratory, TKK, as a Senior Researcher, and the Project Manager in the areas of MIMO

channel modeling and measurements at 2, 5, and 60 GHz, as well as UWB. From 2004 to 2011, he was with Elektrobit Corporation (EB), Espoo, Finland, as a Senior Specialist with EB Wireless Solutions. From 2004 to 2007, he worked in the European WINNER Project as a Senior Researcher in MIMO channel modeling for 4G radio systems. From 2006 to 2008, he worked in the field of wireless network technologies, such as WiMAX and wireless mesh networks (WMNs). From 2008 to 2009, he worked in mobile satellite communications for GMR-1 3G, DVB-SH RF link budget, and antenna performance evaluations. He is currently a Professor and the Chair of Information and Communications Engineering with North China Electric Power University, Beijing, and also chairs several projects by the National Science Foundation of China (NSFC), the Key Program of Beijing Municipal Natural Science Foundation, the Beijing Municipal Science and Technology Commission, and the State Key Laboratories and Industries on channel measurements, modeling, and simulations. He has served as a TPC member, the Session Chair, and a Keynote Speaker at numerous international and national conferences. He is a Fellow of the Chinese Institute of Electronics. He was a recipient of the IEEE Vehicular Technology Society (VTS) Neal Shepherd Memorial Best Propagation Paper Award in 2014. He is a Reviewer of the IEEE TRANSACTIONS, Journals, Letters, and Conferences.

XINCHENG REN (Member, IEEE) was born in 1967. He received the Ph.D. degree from Xidian University, China, in 2008. He is currently a Full Professor with Yan'an University, China. He published more than 30 SCI and EI articles. His main research interest includes the study of information and communication engineering.
