

Author Index

Author	Session	Title
A		
Abed-Meraim, Karim	R10.1	Multi-Modulus based Semi-Blind Source Separation for MIMO-OFDM Communications Systems
	SS14.4	Approximate Joint Diagonalization for ARMA Dependent Source Separation
Aboutanios, Elias	SS11.2	Low-cost Beamforming-based DOA Estimation with Model Order Determination
	SS11.4	Single-Snapshot Beamforming using Fast Iterative Adaptive Techniques
Ahmed, Ammar	SS09.2	High-resolution target sensing using multi-frequency sparse array
	R05.3	DOA Estimation Exploiting Interpolated Multi-Frequency Sparse Array
	SS08.5	Chance Constrained Beamforming for Joint Radar-Communication Systems
Aïssa-El-Bey, Abdeldjalil	SS14.3	Improved sparse error recovery approach for detecting QAM signals in overloaded massive MIMO systems
Alaee- Kerahroodi, Mohammad	SS18.5	Beampattern Shaping for Coexistence of Cognitive MIMO Radar and MIMO Communications
Alexandropoulos, George	SS08.3	Parallel Factor Decomposition Channel Estimation in RIS-Assisted Multi-User MISO Communication
Alnumay, Yazeed	SS09.5	Sample complexity trade-offs for synthetic aperture based high-resolution estimation and detection
An, Hongyang	SS19.1	Multichannel LEO SAR Imaging with GEO SAR Illuminator
Araújo, Gilderlan	R10.3	PARAFAC-Based Channel Estimation for Intelligent Reflective Surface Assisted MIMO System
Ardah, Khaled	R01.2	Hybrid Beamforming Design for Downlink MU-MIMO-OFDM Millimeter-Wave Systems
Asim, Fazal-E-	SS12.5	Multi-linear Encoding and Decoding for MIMO Systems
Aubry, Augusto	R12.2	Adaptive T-AMF for Radar Detection in Diffuse Multipath
	R03.4	Toeplitz Structured Covariance Matrix Estimation for Radar Applications

	R07.4	Design of adaptive detectors for FDA-MIMO radar
B		
Babiker, Mohammad	R09.4	Power Allocation Strategy for OFDM Waveform in RadCom Systems
Bai, Juan	SS05.2	Adaptive Beamforming Using Frequency Diverse MIMO Radar with Nonlinear Frequency Offset
Bao, Lei	SS05.2	Adaptive Beamforming Using Frequency Diverse MIMO Radar with Nonlinear Frequency Offset
Bartolewska, Julitta	R13.4	Distributed Multiarray Noise Reduction With Online Estimation Of Masks And Spatial Filters
Belouchrani, Adel	SS14.4	Approximate Joint Diagonalization for ARMA Dependent Source Separation
Benesty, Jacob	SS11.5	Kronecker product beamforming with Multiple Differential Microphone Arrays
Berné, Olivier	SS13.4	Fusion of hyperspectral and multispectral infrared astronomical images
Berntorp, Karl	SS10.3	Extended Object Tracking Using Hierarchical Truncation Model With Partial-View Measurements
Bi, Guoan	SS15.3	Joint sparsity-inducing DOA estimation for strictly noncircular sources with unknown mutual coupling
	SS01.5	Feasible Sparse Spectrum Fitting for DOA and Range Estimation with Collocated FDA-MIMO radar
Bilik, Igal	SS10.4	Collaborative Spectrum Allocation and Waveform Design for Radar Coexistence
Bioucas, Jose	SS13.3	A New Hyperspectral Compressed Sensing Method for Efficient Satellite Communications
Blum, Rick	R11.4	Target Detection in Clutter Using Receiver with Reduced DOF in Frequency Domain
Bo, Tian	R03.2	Passive radar channel estimation based on PN sequence of DTMB signal
Bose, Arindam	SS10.1	Deep Radar Waveform Design for Efficient Automotive Radar Sensing
Boufounos, Petros	SS10.3	Extended Object Tracking Using Hierarchical Truncation Model With Partial-View Measurements
C		
Cai, Jingjing	SS01.3	DOA Estimation for Coexistence of Circular and Non-Circular Signals Based on Atomic Norm Minimization
	SS01.2	Robust DOA Estimation for Sources with Known Waveforms in Impulsive Noise Environments
Cang, Siyuan	SS03.5	Block Sparsity Based Chirp Transform for Modeling Marine Mammal Whistle Calls

Cao, Chun	R11.5	A Novel NLOS Target Localization Method with a Synthetic Bistatic MMW Radar
Cao, Hui	SS15.2	DOA Estimation by Two-Dimensional Interpolation in the Presence of Mutual Coupling
Cao, Tianyu	R05.6	Beam Pattern Synthesis for Conformal Array with Sidelobe and Polarization Control: A Penalized Inequality Approach
Cao, Xianbin	SS11.3	Enhanced DOA Estimation for MIMO radar in the Case of Limited Snapshots
Cao, Zhihui	R12.4	A Passive Radar Prototype Based on Multi-channel Joint Detection and Its Test Results
Cavalcante, Charles Casimiro	SS12.5	Multi-linear Encoding and Decoding for MIMO Systems
Chambers, Jonathon	SS14.1	Enhanced Online IVA with Switched Source Prior for Speech Separation
Chan, Hau-Hsiang	SS13.2	Sparse Subspace Clustering with Linear Subspace-Neighborhood-Preserving Data Embedding
Chang, Tsung-Hui	SS17.2	Optimization Inspired Learning Network for Multiuser Robust Beamforming
Chen, Baixiao	R11.1	Moving target detection of array antennas based on time reversal
	SS02.4	DOA estimation using sparse Bayesian learning for colocated MIMO radar with dynamic waveforms
Chen, Bo	R08.4	Memory-Based Neural Network for Radar HRRP Noncooperative Target Recognition
Chen, Geng	R03.2	Passive radar channel estimation based on PN sequence of DTMB signal
Chen, Hua	SS01.3	DOA Estimation for Coexistence of Circular and Non-Circular Signals Based on Atomic Norm Minimization
	SS01.2	Robust DOA Estimation for Sources with Known Waveforms in Impulsive Noise Environments
	SS01.1	A general ESPRIT method for noncircularity-based incoherently distributed sources
Chen, Hui	R11.2	Ambiguity Function-Based ESPRIT Algorithm for FDA-MIMO Radar Target Localization
Chen, Jingdong	SS11.5	Kronecker product beamforming with Multiple Differential Microphone Arrays
Chen, Qin	R12.4	A Passive Radar Prototype Based on Multi-channel Joint Detection and Its Test Results
Chen, Yichang	SS19.7	High-Resolution and Wide-Swath Monostatic SAR Imaging via Random Beam Scanning

Chen, Yijun	R07.2	MIMO Radar Waveform Joint Optimization Design in Time and Frequency Domain
Chen, Yufeng	SS18.3	Transmit Beampattern Design for Dual-Function Radar-Communication System with an Interleaved Array
	SS18.2	Performance Improvement in a Coexistent Radar and Communications System
	SS18.4	Integrated waveform design for an Integrated Radar and Communication System with a Uniform Linear Array
Chen, Zhongtao	R02.2	Mitigating Outliers for Bayesian Mixture of Factor Analyzers
Cheng, Lei	R04.6	Distributed Nonnegative Tensor Canonical Polyadic Decomposition With Automatic Rank Determination
	R02.2	Mitigating Outliers for Bayesian Mixture of Factor Analyzers
Cheng, Xu	R11.3	Multi-bit Decentralized Detection of a Non-cooperative Moving Target Through a Generalized Rao Test
Cheng, Ziyang	SS04.3	Hybrid Transceiver Design for Dual-Functional Radar-Communication System
	SS13.5	Transmit Beampattern Design for MIMO Radar with One-bit DACs via Block-Sparse SDR
Chi, Yuejie	SS12.4	Learning Latent Features with Pairwise Penalties in Low-Rank Matrix Completion
Chu, Ping	SS09.4	DOA Estimation of Quasi-Stationary Signals in Uniform Linear Arrays With Mutual Coupling
	SS13.5	Transmit Beampattern Design for MIMO Radar with One-bit DACs via Block-Sparse SDR
Chun-hua, Chu	R07.2	MIMO Radar Waveform Joint Optimization Design in Time and Frequency Domain
Ciuonzo, Domenico	R11.3	Multi-bit Decentralized Detection of a Non-cooperative Moving Target Through a Generalized Rao Test
Cohen, Israel	SS11.5	Kronecker product beamforming with Multiple Differential Microphone Arrays
Comon, Pierre	SS12.3	On the convergence of Jacobi-type algorithms for Independent Component Analysis
Cong, Jingyu	SS01.5	Feasible Sparse Spectrum Fitting for DOA and Range Estimation with Collocated FDA-MIMO radar
Cui, Can	SS05.3	Target Reflectivity Characterization for FDA Radar
Cui, Guolong	SS06.4	Discrete-Phase Waveform Design to Quadratic Optimization via an ADPM Framework with Convergence Guarantee

	R07.3	MIMO Radar Localization of Targets Behind L-shaped Corners
	R03.4	Toeplitz Structured Covariance Matrix Estimation for Radar Applications
	R09.4	Power Allocation Strategy for OFDM Waveform in RadCom Systems
Cui, Guolong	SS07.3	Mainlobe Jamming Suppression Via Independent Component Analysis for Polarimetric SIMO Radar
Cui, Wei	SS09.6	Underdetermined Low-Complexity Wideband DOA Estimation with Uniform Linear Arrays
D		
Dai, Yongpeng	R06.2	Coded Aperture Imaging Based on Selected Reference Matrix
Dammert, Patrik	R03.5	Mitigation of Ground Clutter in Airborne Bistatic Radar Systems
Dayang, Lin	SS12.1	Implementation of Real-time Automotive SAR Imaging
de Almeida, André	SS12.5	Multi-linear Encoding and Decoding for MIMO Systems
	R10.3	PARAFAC-Based Channel Estimation for Intelligent Reflective Surface Assisted MIMO System
	R10.2	Iterative Tensor Receiver for MIMO-GFDM systems
De Maio, Antonio	R12.2	Adaptive T-AMF for Radar Detection in Diffuse Multipath
	R03.4	Toeplitz Structured Covariance Matrix Estimation for Radar Applications
	R07.4	Design of adaptive detectors for FDA-MIMO radar
Deram, Sai Pavan	R10.2	Iterative Tensor Receiver for MIMO-GFDM systems
Deville, Yannick	SS14.2	Blind source separation methods based on output nonlinear correlation for bilinear mixtures of an arbitrary number of possibly correlated signals
Ding, Chibiao	SS19.6	Multi-Channel Spaceborne SAR Imaging Method for Maritime Scenarios
Ding, Kai	R03.3	An Improved Scheme for High-Resolution Point Cloud Map Generation Based on FMCW Radar
Ding, Lintao	R03.1	Cooperative LPI Performance Optimization for Multistatic Radar Under Uncertainties: A Robust Stackelberg Game Perspective
Djeddou, Mustapha	SS14.3	Improved sparse error recovery approach for detecting QAM signals in overloaded massive MIMO systems
Dobigeon, Nicolas	SS13.4	Fusion of hyperspectral and multispectral infrared astronomical images

Dong, Chun-Xi	SS01.2	Robust DOA Estimation for Sources with Known Waveforms in Impulsive Noise Environments
Dong, Siyan	SS15.5	Target Detection Based on Canonical Correlation Technique for Large Array MIMO Radar in Spatially Correlated Noise
Dong, Wentao	R05.5	One-side Extended Nested Array for Degree of Freedom Enhancement
Dong, Yang-Yang	SS01.2	Robust DOA Estimation for Sources with Known Waveforms in Impulsive Noise Environments
Du, Huagui	R11.5	A Novel NLOS Target Localization Method with a Synthetic Bistatic MMW Radar
Du, Panfei	SS01.6	A Software Defined Radio Testbed for Over-the-air Cognitive Cycle Demonstration
Du, Xiaolin	R03.4	Toeplitz Structured Covariance Matrix Estimation for Radar Applications
Duan, Huiping	SS02.1	Efficient Beamforming Training and Channel Estimation for mmWave MIMO-OFDM Systems
E		
Eldar, Yonina	R09.2	Automotive Dual-Function Radar Communications Systems: An Overview
Elidan, Gal	R04.5	Spectral Algorithm for Shared Low-rank Matrix Regressions
Eljarat, Ishai	SS10.4	Collaborative Spectrum Allocation and Waveform Design for Radar Coexistence
Erateb, Suleiman	SS14.1	Enhanced Online IVA with Switched Source Prior for Speech Separation
F		
Fan, Chongyi	R11.5	A Novel NLOS Target Localization Method with a Synthetic Bistatic MMW Radar
Fan, Shihao	R07.3	MIMO Radar Localization of Targets Behind L-shaped Corners
Fan, Yufan	R01.3	Interference Exploitation-based Hybrid Precoding with Robustness Against Channel Errors
Fang, Jun	SS02.1	Efficient Beamforming Training and Channel Estimation for mmWave MIMO-OFDM Systems
Fang, Wenzhi	SS08.4	Outage Minimization for Intelligent Reflecting Surface Aided MISO Communication Systems via Stochastic Beamforming
Feng, Cunqian	R03.2	Passive radar channel estimation based on PN sequence of DTMB signal
Feng, Freddy	R09.3	Precoding for RadComm Systems Based on Hybrid Antenna Arrays

Fenniri, Hassan	SS14.5	Separation of recto-verso documents using copula based dependent source separation
Fernández, Manuel	R07.1	Robust Adaptive Monopulse Processing for Multiple Observations with Applications to TS-MIMO Radar
Fu, Min	SS08.4	Outage Minimization for Intelligent Reflecting Surface Aided MISO Communication Systems via Stochastic Beamforming
Fu, Xiao	R08.5	Nonlinear Multiview Analysis: Identifiability and Neural Network-based Implementation
G		
Gan, Lu	R04.2	High Dynamic Range Sensing Using Multi-Channel Modulo Samplers
	SS09.1	Signal waveform design for high resolution target localization in through-the-wall radar
Gao, Yongchan	SS07.6	Persymmetric Subspace Rao and Wald Tests for Distributed Target in Partially Homogeneous Environment
Gau, Rung-Hung	R02.4	Deterministic Coherence-Based Performance Guarantee for Noisy Sparse Subspace Clustering using Greedy Neighbor Selection
	SS13.2	Sparse Subspace Clustering with Linear Subspace-Neighborhood-Preserving Data Embedding
Ge, Mengmeng	SS07.3	Mainlobe Jamming Suppression Via Independent Component Analysis for Polarimetric SIMO Radar
Gerstoft, Peter	R08.1	Parametric bootstrapping of array data with a Generative Adversarial Network
Gherekhloo, Sepideh	R01.2	Hybrid Beamforming Design for Downlink MU-MIMO-OFDM Millimeter-Wave Systems
Ghita, Bogdan	R13.1	Performance Evaluation of Bluetooth in a Wireless Body Area Network for Practical Applications
Gigi, Yotam	R04.5	Spectral Algorithm for Shared Low-rank Matrix Regressions
Giunta, Gaetano	SS07.2	A Sparse Learning Based Detector with Enhanced Mismatched Signals Rejection Capabilities
Gong, Jian	R03.2	Passive radar channel estimation based on PN sequence of DTMB signal
Groll, Herbert	R08.1	Parametric bootstrapping of array data with a Generative Adversarial Network
Grossi, Emanuele	SS07.5	Energy efficient communication with radar spectrum sharing
Gu, Yuantao	R06.4	Hyperspectral Image Clustering based on Variational Expectation Maximization

Gu, Yujie	R05.4	Direction-of-Arrival Estimation for Coprime Arrays via Coarray Correlation Reconstruction: A One-Bit Perspective
Gui, Ronghua	SS05.3	Target Reflectivity Characterization for FDA Radar
Guilloteau, Claire	SS13.4	Fusion of hyperspectral and multispectral infrared astronomical images
Gujral, Ekta	SS04.2	POPLAR: Parafac2 decOmPosition using auxLiAry infoRmation
Guo, Muran	R05.2	DOA Estimation Using Coarray Interpolation Algorithm Via Nuclear Norm Optimization for Coprime MIMO Radar
Guo, Shisheng	R07.3	MIMO Radar Localization of Targets Behind L-shaped Corners
Gupta, Payal	R04.1	Computation of Weight Function of 2qth Order Virtual Array to Analyse the Estimation Performance
H		
Haardt, Martin	SS12.5	Multi-linear Encoding and Decoding for MIMO Systems
	R01.2	Hybrid Beamforming Design for Downlink MU-MIMO-OFDM Millimeter-Wave Systems
	R05.4	Direction-of-Arrival Estimation for Coprime Arrays via Coarray Correlation Reconstruction: A One-Bit Perspective
	R10.2	Iterative Tensor Receiver for MIMO-GFDM systems
Haimovich, Alexander	R11.4	Target Detection in Clutter Using Receiver with Reduced DOF in Frequency Domain
Hamada, Shohei	R05.1	A Note on The Maximum Number of Sources in DOA Estimation by MODE
Han, Jin-wang	R12.5	Knowledge-Aided Adaptive Detection of Radar Target in Gaussian Clutter
Han, Sudan	SS07.2	A Sparse Learning Based Detector with Enhanced Mismatched Signals Rejection Capabilities
Han, Xiao	SS03.2	Improved Model-Based Channel Tracking for Underwater Acoustic Communications
Hao, Chengpeng	SS07.4	A Persymmetric AMF for range localization in partially homogenous environment
Hassanien, Aboulnasr	SS11.2	Low-cost Beamforming-based DOA Estimation with Model Order Determination
	SS11.4	Single-Snapshot Beamforming using Fast Iterative Adaptive Techniques
Hassidim, Avinatan	R04.5	Spectral Algorithm for Shared Low-rank Matrix Regressions

He, Daquan	R06.2	Coded Aperture Imaging Based on Selected Reference Matrix
He, Jin	R01.1	3D Parametric Channel Estimation for Multi-User Massive-MIMO OFDM Systems
He, Qian	R11.4	Target Detection in Clutter Using Receiver with Reduced DOF in Frequency Domain
He, Xin	R09.5	Robust Coexistence Design of MIMO Radar and MIMO Communication under Model Uncertainty
He, Zi-Shu	SS04.3	Hybrid Transceiver Design for Dual-Functional Radar-Communication System
Hegde, Ganapati	R01.3	Interference Exploitation-based Hybrid Precoding with Robustness Against Channel Errors
Hosseini, Shahram	SS14.2	Blind source separation methods based on output nonlinear correlation for bilinear mixtures of an arbitrary number of possibly correlated signals
Hsu, Chih-Chung	SS13.1	Coupled Adversarial Learning for Single Image Super-Resolution
Hu, Die	R10.4	Hybrid Interference Mitigation Using Analog Prewhitening
Hu, Huawei	R11.2	Ambiguity Function-Based ESPRIT Algorithm for FDA-MIMO Radar Target Localization
Huang, Bang	R11.2	Ambiguity Function-Based ESPRIT Algorithm for FDA-MIMO Radar Target Localization
Huang, Changhai	SS15.2	DOA Estimation by Two-Dimensional Interpolation in the Presence of Mutual Coupling
Huang, Chen	SS09.1	Signal waveform design for high resolution target localization in through-the-wall radar
Huang, Chongwen	SS08.3	Parallel Factor Decomposition Channel Estimation in RIS-Assisted Multi-User MISO Communication
Huang, Gongping	SS11.5	Kronecker product beamforming with Multiple Differential Microphone Arrays
Huang, Huiping	SS11.1	A Compressive Sensing Approach for Single-Snapshot Adaptive Beamforming
Huang, Kuan-Yu	SS13.1	Coupled Adversarial Learning for Single Image Super-Resolution
Huang, Lei	SS15.4	Underdetermined DOA Estimation of Quasi-Stationary Signals in the Presence of Malfunctioning Sensors
Huang, Lei	R09.5	Robust Coexistence Design of MIMO Radar and MIMO Communication under Model Uncertainty
	R09.3	Precoding for RadComm Systems Based on Hybrid Antenna Arrays

	SS18.1	Flying Radar: Altitude Optimization, Clutter Mitigation and Spectrum Sharing With MIMO Communication System
	SS03.4	Fast Signal Retrieval of Sonar in the Presence of Impulse Noise
Huang, Liang-Chi	SS13.2	Sparse Subspace Clustering with Linear Subspace-Neighborhood-Preserving Data Embedding
	R02.4	Deterministic Coherence-Based Performance Guarantee for Noisy Sparse Subspace Clustering using Greedy Neighbor Selection
Huang, Mengxing	SS01.5	Feasible Sparse Spectrum Fitting for DOA and Range Estimation with Collocated FDA-MIMO radar
Huang, Min	SS03.4	Fast Signal Retrieval of Sonar in the Presence of Impulse Noise
Huang, Tianyao	R09.2	Automotive Dual-Function Radar Communications Systems: An Overview
Huang, Wenjie	R07.5	Efficient design of Doppler sensitive long discrete-phase periodic sequence sets for automotive radars
Huang, Xiaotao	R11.5	A Novel NLOS Target Localization Method with a Synthetic Bistatic MMW Radar
Huang, Yingying	SS15.4	Underdetermined DOA Estimation of Quasi-Stationary Signals in the Presence of Malfunctioning Sensors
Huang, Yongming	SS08.1	Joint User Scheduling and Beam Selection in mmWave Networks Based on Multi-Agent Reinforcement Learning
Hübner, Erik	R13.1	Performance Evaluation of Bluetooth in a Wireless Body Area Network for Practical Applications
I		
Ibrahim, Mohamed Salah	SS04.4	Weak Target Detection in MIMO Radar via Beamspace Canonical Correlation
Ichige, Koichi	R08.2	On the DOA Estimation Performance of Optimum Arrays Based on Deep Learning
	R05.1	A Note on The Maximum Number of Sources in DOA Estimation by MODE
J		
Ji, Hongbing	SS07.6	Persymmetric Subspace Rao and Wald Tests for Distributed Target in Partially Homogeneous Environment
Ji, Kaiyi	SS12.4	Learning Latent Features with Pairwise Penalties in Low-Rank Matrix Completion

Jia, Ying	R08.4	Memory-Based Neural Network for Radar HRRP Noncooperative Target Recognition
Jia, Yong	SS06.5	DOA Estimation Based on Ultra Sparse Nested MIMO Array with Two Co-prime Frequencies
Jiang, Hong	SS15.5	Target Detection Based on Canonical Correlation Technique for Large Array MIMO Radar in Spatially Correlated Noise
Jiang, Li	SS06.5	DOA Estimation Based on Ultra Sparse Nested MIMO Array with Two Co-prime Frequencies
Jiang, Mengchao	SS18.4	Integrated waveform design for an Integrated Radar and Communication System with a Uniform Linear Array
	SS18.3	Transmit Beampattern Design for Dual-Function Radar-Communication System with an Interleaved Array
Jiang, Xue	R01.4	Robust Super-resolution Frequency Division Duplex (FDD) Channel Estimation
Jiang, Yi	R10.4	Hybrid Interference Mitigation Using Analog Prewhitening
Jiang, Yuanyuan	SS15.1	A gridless wideband DOA estimation based on atomic norm minimization
	SS01.4	A gridless method for DOA estimation under the coexistence of mutual coupling and unknown nonuniform noise
Jiao, Yuchen	R06.4	Hyperspectral Image Clustering based on Variational Expectation Maximization
Jin, Shi	SS04.1	Channel Estimation and Indoor Positioning for Wideband Multiuser Millimeter Wave Systems
Jin, Tian	R06.2	Coded Aperture Imaging Based on Selected Reference Matrix
K		
Kan, Tang	SS12.1	Implementation of Real-time Automotive SAR Imaging
Kao, Chi-Hung	SS13.3	A New Hyperspectral Compressed Sensing Method for Efficient Satellite Communications
Keziou, Amor	SS14.5	Separation of recto-verso documents using copula based dependent source separation
Khobahi, Shahin	SS10.1	Deep Radar Waveform Design for Efficient Automotive Radar Sensing
Klintberg, Jacob	R03.5	Mitigation of Ground Clutter in Airborne Bistatic Radar Systems

Kong, Lingjiang	SS06.4	Discrete-Phase Waveform Design to Quadratic Optimization via an ADPM Framework with Convergence Guarantee
Kong, Lingjiang	R07.3	MIMO Radar Localization of Targets Behind L-shaped Corners
Kong, Lingjiang	SS07.3	Mainlobe Jamming Suppression Via Independent Component Analysis for Polarimetric SIMO Radar
Koochakzadeh, Ali	SS04.5	Channel Estimation for Hybrid MIMO Communication with (Non-)Uniform Linear Arrays via Tensor Decomposition
Kowalczyk, Konrad	R13.4	Distributed Multiarray Noise Reduction With Online Estimation Of Masks And Spatial Filters
Koyama, Shoichi	R13.6	Kernel interpolation of acoustic transfer function between regions considering reciprocity
L		
Lan, Lan	R07.4	Design of adaptive detectors for FDA-MIMO radar
Lan, Peng	SS16.1	Reduced Dimensional 2-D DOA Estimation via Least Partial Search with Automatic Pairing
Li, Chunguo	SS03.2	Improved Model-Based Channel Tracking for Underwater Acoustic Communications
Li, Dan	SS01.4	A gridless method for DOA estimation under the coexistence of mutual coupling and unknown nonuniform noise
	SS15.1	A gridless wideband DOA estimation based on atomic norm minimization
Li, Fengdi	SS16.1	Reduced Dimensional 2-D DOA Estimation via Least Partial Search with Automatic Pairing
Li, Gang	SS19.7	High-Resolution and Wide-Swath Monostatic SAR Imaging via Random Beam Scanning
Li, Haichuan	SS18.4	Integrated waveform design for an Integrated Radar and Communication System with a Uniform Linear Array
Li, Hailin	R09.1	Joint Optimization of Subcarrier Selection and Power Allocation for Dual-Functional Radar-Communications System
Li, Haodong	R06.1	An efficient ISAR imaging method based on sliding window STAP
Li, Hongbin	SS02.1	Efficient Beamforming Training and Channel Estimation for mmWave MIMO-OFDM Systems
Li, Jian	SS07.1	Range-Doppler Imaging via One-Bit PMCW Radar
Li, Jianfeng	SS16.2	A Blind Direction of Arrival and Mutual Coupling Estimation Scheme for Nested Array

Li, Jianze	SS12.3	On the convergence of Jacobi-type algorithms for Independent Component Analysis
Li, Junjie	R03.3	An Improved Scheme for High-Resolution Point Cloud Map Generation Based on FMCW Radar
	R12.4	A Passive Radar Prototype Based on Multi-channel Joint Detection and Its Test Results
Li, Kai-ming	SS05.5	An Anti-jamming Method Against Frequency Diverse Array for ISAR Radar by Spatial Location Feature Recognition
Li, Liangliang	SS15.3	Joint sparsity-inducing DOA estimation for strictly noncircular sources with unknown mutual coupling
Li, Longxiang	SS06.1	Waveform Design for Dual-function MIMO Radar-communication Systems
Li, Qiang	SS03.4	Fast Signal Retrieval of Sonar in the Presence of Impulse Noise
Li, Songlin	R07.3	MIMO Radar Localization of Targets Behind L-shaped Corners
Li, Wen-Hsian	SS13.2	Sparse Subspace Clustering with Linear Subspace-Neighborhood-Preserving Data Embedding
	R02.4	Deterministic Coherence-Based Performance Guarantee for Noisy Sparse Subspace Clustering using Greedy Neighbor Selection
Li, Xiangnan	R05.5	One-side Extended Nested Array for Degree of Freedom Enhancement
Li, Yang	R11.4	Target Detection in Clutter Using Receiver with Reduced DOF in Frequency Domain
Li, Yongzhe	SS06.3	Waveform Design for the Radar-Communications Coexistence With Good Correlation Properties
Li, Zeyang	SS16.4	2D DOA Estimation for Uniform Rectangular Array With One-bit Measurement
Li, Zhihui	SS16.3	Tensor-Based Angle Estimation with Coprime MIMO Radar
	SS05.2	Adaptive Beamforming Using Frequency Diverse MIMO Radar with Nonlinear Frequency Offset
Liang, Junhui	R01.1	3D Parametric Channel Estimation for Multi-User Massive-MIMO OFDM Systems
Liao, Bin	SS04.3	Hybrid Transceiver Design for Dual-Functional Radar-Communication System
	SS09.4	DOA Estimation of Quasi-Stationary Signals in Uniform Linear Arrays With Mutual Coupling
	SS13.5	Transmit Beampattern Design for MIMO Radar with One-bit DACs via Block-Sparse SDR

Liao, Guisheng	SS18.2	Performance Improvement in a Coexistent Radar and Communications System
	SS18.3	Transmit Beampattern Design for Dual-Function Radar-Communication System with an Interleaved Array
	SS18.4	Integrated waveform design for an Integrated Radar and Communication System with a Uniform Linear Array
	R06.1	An efficient ISAR imaging method based on sliding window STAP
	R07.4	Design of adaptive detectors for FDA-MIMO radar
Lin, Chia-Hsiang	SS13.3	A New Hyperspectral Compressed Sensing Method for Efficient Satellite Communications
Lin, Ronghao	R07.5	Efficient design of Doppler sensitive long discrete-phase periodic sequence sets for automotive radars
Lin, Tzu-Hsuan	SS13.3	A New Hyperspectral Compressed Sensing Method for Efficient Satellite Communications
Lin, Yen-Cheng	SS13.3	A New Hyperspectral Compressed Sensing Method for Efficient Satellite Communications
Lin, Yen-Ping	R02.4	Deterministic Coherence-Based Performance Guarantee for Noisy Sparse Subspace Clustering using Greedy Neighbor Selection
Lin, Yuxing	SS04.1	Channel Estimation and Indoor Positioning for Wideband Multiuser Millimeter Wave Systems
Liu, Bingfan	SS02.4	DOA estimation using sparse Bayesian learning for colocated MIMO radar with dynamic waveforms
Liu, Chenwei	SS19.2	An Airborne VideoSAR High-resolution Ground Playback System Based on FPGA
Liu, Chun-Hung	SS13.2	Sparse Subspace Clustering with Linear Subspace-Neighborhood-Preserving Data Embedding
	R02.4	Deterministic Coherence-Based Performance Guarantee for Noisy Sparse Subspace Clustering using Greedy Neighbor Selection
Liu, Chun-Lin	SS09.3	A General Framework for the Robustness of Structured Difference Coarrays to Element Failures
Liu, Hongqing	R04.2	High Dynamic Range Sensing Using Multi-Channel Modulo Samplers
Liu, Hongqing	SS09.1	Signal waveform design for high resolution target localization in through-the-wall radar
Liu, Hongwei	R08.4	Memory-Based Neural Network for Radar HRRP Noncooperative Target Recognition
Liu, Lutao	R05.2	DOA Estimation Using Coarray Interpolation Algorithm Via Nuclear Norm Optimization for Coprime MIMO Radar

Liu, Peihao	SS19.7	High-Resolution and Wide-Swath Monostatic SAR Imaging via Random Beam Scanning
Liu, Qi	SS15.2	DOA Estimation by Two-Dimensional Interpolation in the Presence of Mutual Coupling
Liu, Shengheng	SS08.1	Joint User Scheduling and Beam Selection in mmWave Networks Based on Multi-Agent Reinforcement Learning
Liu, Tianyi	R04.3	GPU-accelerated parallel optimization for sparse regularization
Liu, Wei	SS01.1	A general ESPRIT method for noncircularity-based incoherently distributed sources
	SS01.3	DOA Estimation for Coexistence of Circular and Non-Circular Signals Based on Atomic Norm Minimization
	SS09.6	Underdetermined Low-Complexity Wideband DOA Estimation with Uniform Linear Arrays
Liu, Xinxin	SS17.4	Robust Adaptive Beamforming of LFM Signals Based on Interference-plus-Noise Covariance Matrix Reconstruction in Fractional Fourier Domain
Liu, Yan	R01.4	Robust Super-resolution Frequency Division Duplex (FDD) Channel Estimation
Liu, Yimin	R09.2	Automotive Dual-Function Radar Communications Systems: An Overview
Liu, Yonghong	SS01.1	A general ESPRIT method for noncircularity-based incoherently distributed sources
Liu, Yongjun	SS18.4	Integrated waveform design for an Integrated Radar and Communication System with a Uniform Linear Array
	SS18.3	Transmit Beampattern Design for Dual-Function Radar-Communication System with an Interleaved Array
	SS18.2	Performance Improvement in a Coexistent Radar and Communications System
Liu, Zhennan	SS02.2	Low-rank and Angular Structures aided mmWave MIMO Channel Estimation with Few-bit ADCs
Long, Tianyao	SS06.5	DOA Estimation Based on Ultra Sparse Nested MIMO Array with Two Co-prime Frequencies
Lops, Marco	SS07.5	Energy efficient communication with radar spectrum sharing
Lu, Jian	SS17.4	Robust Adaptive Beamforming of LFM Signals Based on Interference-plus-Noise Covariance Matrix Reconstruction in Fractional Fourier Domain
Luo, Dan	SS15.3	Joint sparsity-inducing DOA estimation for strictly noncircular sources with unknown mutual coupling

Luo, Ying	R07.2	MIMO Radar Waveform Joint Optimization Design in Time and Frequency Domain
	SS05.5	An Anti-jamming Method Against Frequency Diverse Array for ISAR Radar by Spatial Location Feature Recognition
Luo, Zhen	SS09.1	Signal waveform design for high resolution target localization in through-the-wall radar
Luo, Zhi-Quan	R05.6	Beam Pattern Synthesis for Conformal Array with Sidelobe and Polarization Control: A Penalized Inequality Approach
Lv, Fuzai	R02.3	Block-Sparse Signal Recovery Based on Adaptive Matching Pursuit via Spike and Slab Prior
Lv, Yunfei	R06.5	The Underwater Acoustic Image Measurement Based on Non-uniform Spatial Resampling RL Deconvolution
Lyu, Qi	R08.5	Nonlinear Multiview Analysis: Identifiability and Neural Network-based Implementation
M		
Ma, Chao	R06.5	The Underwater Acoustic Image Measurement Based on Non-uniform Spatial Resampling RL Deconvolution
Ma, Dingyou	R09.2	Automotive Dual-Function Radar Communications Systems: An Overview
Ma, Wanli	SS07.2	A Sparse Learning Based Detector with Enhanced Mismatched Signals Rejection Capabilities
Ma, Yanan	SS11.3	Enhanced DOA Estimation for MIMO radar in the Case of Limited Snapshots
Ma, Yirong	R06.4	Hyperspectral Image Clustering based on Variational Expectation Maximization
Mamouni, Nezha	SS14.5	Separation of recto-verso documents using copula based dependent source separation
Mansour, Hassan	SS10.3	Extended Object Tracking Using Hierarchical Truncation Model With Partial-View Measurements
Mao, Linlin	SS07.6	Persymmetric Subspace Rao and Wald Tests for Distributed Target in Partially Homogeneous Environment
Marino, Angela	R07.4	Design of adaptive detectors for FDA-MIMO radar
