

2010 IEEE International Conference on Bioinformatics and Bioengineering

BIBE 2010

Table of Contents

Message from the General Chairs	xi
Area Chairs	xiii
Keynote Presentations	xv
Reviewers	xxi
Invited Speakers	xxii
Session Chairs	xxiii
Tutorials	xxiv

Regular Papers

A Clustering Approach to Identify Intergenic Non-coding RNA in Mouse Macrophages.....	1
<i>Lana X. Garmire, Shankar Subramaniam, David Garmire, and Chris K. Glass</i>	
A Multi-stage Spectral Alignment Strategy for Unrestrictive PTM Peptide Identification.....	7
<i>Changyong Yu, Guoren Wang, Yuhai Zhao, and Keming Mao</i>	
A Novel Wavelet Based Algorithm for Spike and Wave Detection in Absence Epilepsy.....	14
<i>Petros Xanthopoulos, Steffen Rebennack, Chang-Chia Liu, Jicong Zhang, Gregory L. Holmes, Basim M. Uthman, and Panos M. Pardalos</i>	
A Self-Healing Approach for a Domain-Specific Deep Web Search Tool.....	20
<i>Fan Wang and Gagan Agrawal</i>	
A Supervised Approach for Predicting Patient Survival with Gene Expression Data.....	26
<i>Karthik Devarajan, Yan Zhou, Neeraj Chachra, and Nader Ebrahimi</i>	
An Accurate Prediction Method for Protein Structural Class from Signal Patterns of NMR Spectra in the Absence of Chemical Shift Assignments.....	32
<i>Hiroimi Arai, Naoya Tochio, Tsuyoshi Kato, Takanori Kigawa, and Masayuki Yamamura</i>	

An Elastic Video Interpolation Methodology for Wireless Capsule Endoscopy Videos	38
<i>Alexandros Karargyris and Nikolaos Bourbakis</i>	
Analysis and Optimization of C3 Photosynthetic Carbon Metabolism	44
<i>Giovanni Stracquadano, Renato Umeton, Alessio Papini, Pietro Liò, and Giuseppe Nicosia</i>	
Automated Quantification of Muscle and Fat in the Thigh from Water-, Fat- and Non-suppressed MR Images	52
<i>Sokratis Makrogiannis, Suraj Serai, Kenneth W. Fishbein, Willie Laney, Catherine Schreiber, William B. Ershler, Luigi Ferrucci, and Richard G. Spencer</i>	
BLAST Tree: Fast Filtering for Genomic Sequence Classification	58
<i>Stuart King, Yanni Sun, James Cole, and Sakti Pramanik</i>	
Chinese Cardiovascular Disease Database (CCDD) and Its Management Tool	66
<i>Jia-wei Zhang, Li-ping Wang, Xia Liu, Hong-hai Zhu, and Jun Dong</i>	
Combining Prostate Cancer Region Predictions from MALDI Spectra Processing and Texture Analysis	73
<i>Jiang Li, Ayyappa Vadlamudi, Shao-Hui Chuang, Xiaoyan Sun, Bo Sun, Frederic D. McKenzie, Lisa Cazares, Julius Nyalwidhe, Dean Troyer, and O. John Semmes</i>	
Comparison of Co-temporal Modeling Algorithms on Sparse Experimental Time Series Data Sets	79
<i>Edward E. Allen, James L. Norris, David J. John, Stan J. Thomas, William H. Turkett Jr., and Jacquelyn S. Fetrow</i>	
Compressed q-Gram Indexing for Highly Repetitive Biological Sequences	86
<i>Francisco Claude, Antonio Fariña, Miguel A. Martínez-Prieto, and Gonzalo Navarro</i>	
Computational Framework for Microstructural Bone Dynamics Model and Its Evaluation	92
<i>Taehyong Kim, Woochang Hwang, Aidong Zhang, and Murali Ramanathan</i>	
Detecting Coevolution of Functionally Related Proteins for Automated Protein Annotation	99
<i>Alan L. Kwan, Susan K. Dutcher, and Gary D. Stormo</i>	
Detection of Mild Cognitive Impairment Using Image Differences and Clinical Features	106
<i>Lin Li, James Z. Wang, Dheeraj Chahal, Mark A. Eckert, and Carl Lozar</i>	
Dynamic Complexity of the Temporal Transcriptional Regulation Program in Human Endotoxemia	112
<i>Tung T. Nguyen, Panagiota T. Foteinou, Ioannis P. Androulakis, Steve E. Calvano, and Stephen F. Lowry</i>	
Effects of Triadimefon on the Metabolism of Cultured Hepatocytes	118
<i>Vidya V. Iyer, Ioannis P. Androulakis, Charles M. Roth, and Marianthi G. Ierapetritou</i>	

eSBH: An Accurate Constructive Heuristic Algorithm for DNA Sequencing by Hybridization	124
<i>Yang Chen and Jinglu Hu</i>	
Fast Phased Small RNA Cycle Counting Algorithms	130
<i>Forrest Sheng Bao, Zhixin Xie, and Yuanlin Zhang</i>	
Finding Dynamic Modules of Biological Regulatory Networks	136
<i>Ferhat Ay, Thang N. Dinh, My T. Thai, and Tamer Kahveci</i>	
Functional Flow Simulation Based Analysis of Protein Interaction Network	144
<i>Lei Shi, Young-Rae Cho, and Aidong Zhang</i>	
How to Fold Amino Acid Interaction Networks by Computational Intelligence Methods	150
<i>Omar Gaci</i>	
Hybrid Modeling and Simulation of Insulin Secretion Pathway in Pancreatic Islets	156
<i>Yang Pu, Saangho Lee, David C. Samuels, Layne T. Watson, and Yang Cao</i>	
Identification of Viral Protein Genotypic Determinants Using Combinatorial Filtering and Active Learning	162
<i>Chuang Wu, Andrew S. Walsh, and Roni Rosenfeld</i>	
Identifying Hidden Confounders in Gene Networks by Bayesian Networks	168
<i>Tomoya Higashigaki, Kaname Kojima, Rui Yamaguchi, Masato Inoue, Seiya Imoto, and Satoru Miyano</i>	
Improved Immune Genetic Algorithm for Clustering Protein-Protein Interaction Network	174
<i>Hamid Ravaee, Ali Masoudi-Nejad, Saeed Omid, and Ali Moeini</i>	
Inferring the Sign of Kinase-Substrate Interactions by Combining Quantitative Phosphoproteomics with a Literature-Based Mammalian Kinome Network	180
<i>Marylens Hernandez, Alexander Lachmann, Shan Zhao, Kunhong Xiao, and Avi Ma'ayan</i>	
Knowledge-Guided Docking of Flexible Ligands to SH2 Domain Proteins	185
<i>Haiyun Lu, Shamima Banu Bte Sm Rashid, Hao Li, Wee Kheng Leow, and Yih-Cherng Liou</i>	
Learning Proteomic Network Structure by a New Hill Climbing Algorithm	191
<i>Dong-Chul Kim, Jean Gao, and Chin-Rang Yang</i>	
Modeling Circadian Rhythms in Inflammation	197
<i>Jeremy D. Scheff, Ioannis P. Androulakis, Steve E. Calvano, and Stephen F. Lowry</i>	
Modular Software Design for Brachytherapy Image-Guided Robotic Systems	203
<i>Ivan Buzurovic, Tarun K. Podder, Lei Fu, and Yan Yu</i>	
Multichannel Robot for Image-Guided Brachytherapy	209
<i>Tarun K. Podder, Ivan Buzurovic, and Yan Yu</i>	
On Constructing Thermodynamically Consistent Parametrizations of Kinetic Models	214
<i>W. Garrett Jenkinson and John Goutsias</i>	

Polony Identification Using the EM Algorithm Based on a Gaussian Mixture Model	220
<i>Wei Li, Paul M. Ruegger, James Borneman, and Tao Jiang</i>	
Prediction of Catalytic Residues in Proteins Using a Consensus of Prediction (CoP) Approach	226
<i>Natalia V. Petrova and Cathy H. Wu</i>	
Qualitative Analysis of Gene Regulatory Networks by Satisfiability Checking of Linear Temporal Logic	232
<i>Sohei Ito, Naoko Izumi, Shigeki Hagihara, and Naoki Yonezaki</i>	
Quantification and Analysis of Combination Drug Synergy in High-Throughput Transcriptome Studies	238
<i>Zeynep H. Gümüs, Fernando Siso-Nadal, Ada Gjezi, Paul McDonagh, Iya Khalil, Paraskevi Giannakakou, and Harel Weinstein</i>	
Space Efficient Diagonal Linear Space Sequence Alignment	244
<i>Gandhi Arpit, Raghavendra Adiga, and Kuruvilla Varghese</i>	
Structural Differences between Proteins with Similar Sequences	250
<i>Qian Cong, Bong-Hyun Kim, Lisa N. Kinch, and Nick V. Grishin</i>	
The Effect of Sequence Error and Partial Training Data on BLAST Accuracy	257
<i>Steven D. Essinger and Gail L. Rosen</i>	
Towards Temperature Dependent Coarse-grained Potential of Side-chain Interactions for Protein Folding Simulations	263
<i>Stanislaw Oldziej, Cezary Czaplewski, Adam Liwo, and Harold A. Scheraga</i>	
TRAC: A Platform for Structure-Function Studies of NSS-Proteins Integrates Information from Bioinformatics and Biomedical Literature	267
<i>Lei Shi, Marko Srdanovic, Thijs Beuming, Lucy Skrabanek, Jonathan A. Javitch, and Harel Weinstein</i>	
Tumor Motion Prediction and Tracking in Adaptive Radiotherapy	273
<i>Ivan Buzurovic, Tarun K. Podder, Ke Huang, and Yan Yu</i>	
Poster Papers	
3D Representation of the Digestive Tract Surface in Wireless Capsule Endoscopy Videos	279
<i>Alexandros Karargyris, Orestis Karargyris, and Nikolaos Bourbakis</i>	
A Comparative Study of a Novel AE-nLMS Filter and Two Traditional Filters in Predicting Respiration Induced Motion of the Tumor	281
<i>Ke Huang, Ivan Buzurovic, Yan Yu, and Tarun K. Podder</i>	
A Comparison between Transmembrane Helices and Reentrant Loops	283
<i>Changhui Yan and Jingru Luo</i>	
A Noninvasive Multimodal Sono-contrast NIR Spectroscopy System for Breast Cancer Diagnosis	285
<i>Kaiguo Yan, Tarun Podder, Ke Huang, Yan Yu, and Lydia Liao</i>	

Analysis on the Correlation Relationships between the Temperature Range Condition and the Genic GC Content Levels of Prokaryotes	287
<i>Hao Zheng and Hongwei Wu</i>	
Assessment of the Binding Characteristics of Human Immunodeficiency Virus Type 1 Glycoprotein120 and Host Cluster of Differentiation4 Using Digital Signal Processing	289
<i>Norbert Nwankwo and Huseyin Seker</i>	
Comparison of Gene Prediction Programs for Metagenomic Data	291
<i>Non Yok and Gail Rosen</i>	
Corpus Callosum Shape Deformation Analysis for Multiple Sclerosis	293
<i>F. Derraz, A. Taleb-Ahmed, L. Peyrodie, A. Pinti, A. Chikh, and F. Bereksi-Reguig</i>	
Detection of Errors and Inconsistencies in Biomolecular Databases through Integrative Approaches and Quality Controls	294
<i>Marco Masseroli, Giorgio Ghisalberti, and Luca Tettamanti</i>	
Estimating the Expression of Transcript Isoforms from mRNA-Seq via Nonnegative Least Squares	296
<i>Hyunsoo Kim, Yingtao Bi, and Ramana V. Davuluri</i>	
Ethanol Effects on Transcription Factor Network Regulating Stem Cell Differentiation	298
<i>Rajanikanth Vadigepalli, Joshua Ogony, and Helen Anni</i>	
Gene Set Analysis with Covariates	300
<i>Ionut Bebu, Françoise Seillier-Moiseiwitsch, Jing Wu, and Thomas Mathew</i>	
Identifying Prostate Cancer-Related Networks from Microarray Data Based on Genotype-Phenotype Networks Using Markov Blanket Search	302
<i>Hsiang-Yuan Yeh, Yi-Yu Liu, Cheng-Yu Yeh, and Von-Wun Soo</i>	
Instance Discovery and Schema Matching with Applications to Biological Deep Web Data Integration	304
<i>Tantan Liu, Fan Wang, and Gagan Agrawal</i>	
Methods for Designing Reliable Probe Arrays	306
<i>Michele Lombardi, Luca Benini, Abhishek Garg, and Giovanni De Micheli</i>	
Multi Level Clustering of Phylogenetic Profiles	308
<i>Fotis E. Psomopoulos and Pericles A. Mitkas</i>	
Partial AUC for Differentiated Gene Detection	310
<i>Zhenqiu Liu and Terry Hyslop</i>	
Prediction of Gene Ontology Annotations Based on Gene Functional Clustering	312
<i>Marco Tagliasacchi, Roberto Sarati, and Marco Masseroli</i>	
Use of Hilbert Huang Transform in Uterine Contraction Analysis	314
<i>Kemal Aydin, Murat Demirer, and Coskun Bayrak</i>	

Using the Semantically Interoperable Biospecimen Repository Application, caTissue: End User Deployment Lessons Learned	316
<i>Jack W. London and Devjani Chatterjee</i>	
Author Index	318
