

Author Index

A

Ai, Fengming

Design of PHM Test Verification Method and System for Aviation Electrical System [570467]

Ai, Ting

Robust Vibration Signal Denoising and Diagnosis Using Encoder-Decoder Networks with Cross-layer Residual Connection [570341]

Ai, Yanting

A Novel Method for Inter-shaft Bearing Fault Feature Extraction Based Generalized Refined Composite Multiscale Quantum Entropy [570430]

B

Bai, Guanghan

Experimental Study on the Effects of Wear and Clearance in a 3D Revolute Joint [570339]

Bai, Libing

Double Layer Feature Selection and Feature Fusion Method for Rolling Bearing Based on AFF-AAKR [570386]

Bai, Senyang

Imperfect-maintenance Optimization Model Based on System Reliability Constraint [570407]

Bai, Yanhuin

An Improved Similarity Matching Bidirectional Gated Recurrent Unit Autoencoder Scheme for Remaining Useful Life Prediction [570222]

Remaining Useful Life Prediction of Parts and Components based on BiLSTM Autoencoder with Attention Mechanism and Skip Connection [570223]

Bao, Feng

Research on Maintenance Decision of Rail Transit Signal Power Supply System [570427]

Bao, Huaiqian

A New Deep Sparse Filtering Method Applied to Transfer Learning [570242]

Bao, Jie

Accelerated Degradation Test Design and Degradation Trajectory Prediction of Radar Gain Control Module [570217]

Bechhoefer, Eric

Improved Method for Determining the Remaining Useful Life of a Component [570327]

Bekar, Ebru Turanoglu

A Data-Driven Approach to Air Leakage Detection in Pneumatic Systems [570439]

Bi, Jikai

Estimation of Remaining Useful Life of Li-Ion Battery Based on Charging Characteristic Data
[571211]

Bi, Xinjie

Visibility Graph based Feature Extraction for Fault Diagnosis of Rolling Bearings [570256]

Bin, Jie

Optimization Method of Virtual Sand Table Background Server Based on Unity 3D [571175]

C

Cai, Baigen

Fault Prediction Method for on-board Equipment of CTCS based on Seq2Seq Model using LSTM
[570400]

Cai, Baoping

A Data-driven Remaining Useful Life Prediction Methodology: Optimization Based on Digital Twin
[570462]

Cai, Yuqi

KRCs Driven Product Manufacturing Quality Improvement Approach Using DMAIC [570213]

Cai, Zhiqiang

Parameter Estimation of Mixed Weibull Distribution Based on Genetic Algorithm and Gradient Descent Method [570381]

Data-driven Methodology for State Detection of Gearbox in PHM Context [570382]

Cai, Zhongyi

An Adaptive Prediction Method of Remaining Useful Lifetime for the Aviation Product Based on the Proportional Degradation Model [571140]

Cao, Jiaping

Path Planning for Intelligent Vehicle Based on Improved Ant Colony Algorithm [570357]

Cao, Junyi

A Study on Torsional Stiffness of RV Reducer Considering Variable Loads and Tooth Modification

[570417]

Cao, Ke

Performance Reliability Evaluation of Explosive Initiator Based on Bayes-Bootstrap Method

[570412]

Cao, Lei

Cross-domain Intelligent Fault Diagnosis Using Transferable Bilinear Neural Network [570225]

Cao, Mengda

A Fusion Method for State-of-Health Estimation of Lithium-ion Batteries [570285]

Cao, Ming

Naturally-induced Early Aviation Bearing Fault Test and Early Bearing Fault Detection [570441]

Cao, Shuqian

Study on Vibration of the Anisotropically Rotor System with Different Sections Based on the Improved Riccati Transfer Matrix Method [570321]

Cao, Xin

The Effect of Surface Treatment in Local Zone on Modal Frequency of Thin Plate Structure [570466]

Two-Phase Degradation Modeling and Residual Life Prediction Based on Nonlinear Wiener Process
[570318]

Cao, Yalei

Adaptive Beamforming of Interference Covariance Matrix Reconstruction Based on K-means Clustering [570347]

Cao, Yan

A Universal High Performance Intelligent Processor Of Satellite [571242]

Cao, Zhi

Research on Structural Health Monitoring of Composite Material Structure Based on Machine Learning Method [570396]

Chang, Jin

Adversarial Domain Adaptation for Transfer Fault Diagnosis of Roller Bearings based on Multi-MMD Alignment [570373]

Chang, Yang

AME-TCN: Attention Mechanism Enhanced Temporal Convolutional Network for Fault Diagnosis in Industrial Processes [570297]

Che, Jianming

Online Milling Chatter Detection Using Deep Residual Network and Transfer Learning [570328]

Chen, Bochen

Condition Monitoring of Permanent Magnet Synchronous Motor under Different Stator Fault Severity [570249]

Chen, Changyuan

Research on CARBON Emission Control Method of Construction Based on Whole Life Cycle [571172]

Chen, Chen

Research on Model-Driven Analysis Method of Testability Verification Requirement [570392]

Chen, Guangyuan

Visibility Graph based Feature Extraction for Fault Diagnosis of Rolling Bearings [570256]

Chen, Huaihai

Operational Modal Analysis Based on Neural Network with Singular Value Decomposition [571144]

Chen, Jian

On-line Crack Propagation Prognostics Using a Resample-move Particle Filter [570234]

Chen, Jie

Densely Connected Fully Convolutional Auto-Encoder Based Slewing Bearing Degradation Trend Prediction Method [570280]

Performance Degradation State Recognition of Slewing Bearing Based on Improved Multi-layer Kernel Extreme Learning Machine Auto-encoder [570397]

Chen, Jinhui

External Force Damage Detection Method of Buried Cable Based on Optical Fiber Sensing Technology [571160]

Chen, Jun

Gyro Anomaly Detection Method Based on Information Entropy [570436]

Chen, Junbin

Federated Transfer Learning for Bearing Fault Diagnosis Based on Averaging Shared Layers [570425]

Chen, Kai

Fault Feature Extraction Method of Rotating Machinery Based on DeepLabV3+ Semantic Segmentation [570354]

A Method of Detecting Bearing Fault Signal Based on DLIA Implemented by FPGA [570359]

A Fault Diagnosis Method of Rolling Bearing Based on CEEMDAN and KFCM [570375]

Chen, Le

Reliability Modeling of Two-unit System with Degradation Interdependence [570308]

Chen, Ling

Demagnetization Fault Detection in Surface-Mounted Permanent Magnet Synchronous Machine [570274]

Transmission System Bearing Fault Detection Method Based on Modulated Signal Bi-spectrum Analysis [570293]

Chen, Peng

The Comparative Experiments between the Vibration Signal and the Current signal of Rotor System based on Deep Learning Method [570278]

Marine Propulsion Shaft Bearing Fault Feature Extraction and Diagnosis Based on Strong Tracking State Principal Component [570304]

Research on Inspection and Diagnosis Robots for Plant Facilities -Trajectory Tracking Control by Fuzzy Genetic Algorithm and Self-Positioning Correction Method by Deep Learning [570353]

Reliability Model of Single Internal and External Meshing Planetary Gear Transmission Mechanism Considering Load Correlation [570448]

Chen, Qiang

Laser Scanning-Based Method for Identifying Damage Location of Civil Construction Node Structure [571184]

Prediction Method of High Rise Building Foundation Settlement Based on Gps Baseline Solution [571185]

Chen, Qiuan

Data-driven Methodology for State Detection of Gearbox in PHM Context [570382]

Chen, Rentong

Comparisons of Different Importance Measures with Hierarchical System Markov Bayesian Network Model [570337]

Chen, Rigang

Sensor Fault Mode and Effect Analysis in Nuclear Power Plants [570492]

Chen, Rui

Gyro Anomaly Detection Method Based on Information Entropy [570436]

Chen, Shaowei

Development of an Online Fault-Diagnostic-System Based on STM32 for Actuators [570240]

Chen, Shengtu

Research on Condition-based Opportunistic Maintenance Strategy for Mechanical System [570393]

Chen, Siyi

Bayesian Analysis for Lifetime Delayed Degradation Process [570419]

Chen, Wenhua

An Accelerated Degradation Testing Method for Quantifying Lifetime of DC-DC Power Supply [570241]

Elevator Performance Evaluation Based on the Analysis of the Running Sound [570477]

Research on Condition-based Opportunistic Maintenance Strategy for Mechanical System [570393]

Chen, Wenyang

Degradation Behavior and Mechanisms of E-mode GaN HEMTs with p-GaN Gate under High Temperature Gate Bias Stress [571465]

Chen, Xiaohu

Dynamic Analysis and Simulation for Under Water Engineering Robot [571480]

Chen, Xinda

Fault Feature Extraction Method of Rotating Machinery Based on DeepLabV3+ Semantic Segmentation [570354]

A Method of Detecting Bearing Fault Signal Based on DLIA Implemented by FPGA [570359]

A Fault Diagnosis Method of Rolling Bearing Based on CEEMDAN and KFCM [570375]

Chen, Xuefeng

A New Method of Multi-feature Fusion Rolling Bearing Fault Diagnosis Based on GA-DHMM [570325]

An Analytical Representation Method for Dynamic Behavior of Rotating Blade with Transverse Crack [570332]

Chen, Yanong

An Analytical Method for the Elastic Supporter Dynamic Stress Signals Applied to Aero-engine Fault Diagnosis [571142]

Chen, Yaxiong

A New ACFM Probe for Inspection of Rail Crack at High Speed [570468]

Chen, Yiqiang

Degradation Behavior and Mechanisms of E-mode GaN HEMTs with p-GaN Gate under High

Temperature Gate Bias Stress [p284]

Chen, Yin

Research on Maintainability Verification Technology of Civil Aircraft [570349]

A Whole Life Cycle Maintenance Strategy of Civil Aircraft Precooler Based on Case-based Reasoning and Probability Model [570384]

Chen, Ying

Simulation Analysis and Belief Reliability Evaluation of Electromagnetic Performance of Electronic Products [570271]

Belief Reliability Analysis of Electrical Performance Based on Analog Behavior Modeling [570290]

Chen, Yongxing

Fault Analysis and Calculation of Aero-engine Main Shaft Bearing Slipping Based on BSS [570437]

Chen, Yugang

Research on Extraction Method of Sensitive Feature of Thin-wall Plate Crack Fault [570214]

Chen, Yun

Research on Statics Model of Aircraft Fuel Tank Inspection Robot [570229]

Chen, Yushu

Study on Vibration of the Anisotropically Rotor System with Different Sections Based on the Improved Riccati Transfer Matrix Method [570321]

Chen, Zhen

A Wiener Process Model with Kernel-based Time Transformation for Nonlinear Degradation Data [570305]

Chen, Zhiwei

A State-of-Health Estimation Method of Lithium-ion Batteries using ICA and SVM [570413]

Chen, Zhong

A Hybrid Fault Diagnosis Method for Rolling Bearing with Improved Multiscale Dispersion Entropy-based State Pre-detection and Feature Fusion [570372]

Chen, Zhuyun

Federated Transfer Learning for Bearing Fault Diagnosis Based on Averaging Shared Layers [570425]

Chen, Zihan

Satellite Reaction Wheel Fault Detection Based on Adaptive Threshold Observer [571213]

Cheng, Kan

Research for Proposed Master Minimum Equipment List(PMMEL) Items Analysis Method Based on System Safety Assessment [570303]

Cheng, Limin

Wavelet Entropy Applied in gearbox fault diagnosis [p188]

Cheng, Longhuan

Research on Multiple Cross Correlation Fusion Method of Fault Vibration Signal [570355]

Cheng, Shouguo

Dynamic Analysis of Reciprocating Compressor with Revolution Joint Clearance and Translational Joint Clearance [570447]

Cheng, Wangchi

Demand Analysis of Joint Decision-Making Modeling of Equipment Maintenance and Spare Parts Inventory Based on PHM [571481]

Cheng, Wei

Knowledge Graph Construction for Fault Diagnosis of Aircraft Environmental Control System [570310]

Cheng, Yuehua

Distributed Fault-tolerant Adaptive Flocking Control of Multi-agent System with Model Perturbation and Actuator Failure [570235]

Cheng, Zhe

Research on Fault Prediction Method of Rolling Bearing Based on Health Indicator and Dynamic Model [570254]

Fault Analysis of Typical Structure of Helicopter Transmission System Based on Lumped- Parameter Modeling [570312]

A Review of Fault Diagnosis Methods Based on Machine Learning Patterns [570472]

Cheng, Zhijun

Real-time Prediction Model for Satellite Telemetry Parameter Based on PSRT-RVM [571214]

Imperfect-maintenance Optimization Model Based on System Reliability Constraint [570407]

Cheng, Zhonghai

Blade Tip-timing Measurement Mathematical Modeling and Simulation without OPR under the Condition of Rotating Speed Fluctuation [570377]

Chu, Fulei

Sparsity-assisted Supervised Classification Approach with Application to Data-driven Machine

Diagnostics [570374]

Chu, Qiaohui

Simulation Analysis and Belief Reliability Evaluation of Electromagnetic Performance of Electronic Products [570271]

Ci, Shigui

Research on Hot News Information Discovery and Development Trend Prediction Based on Decision Tree [571196]

Cong, Cheng

ADS-B Signal Recognition Method Based on Entropy Feature Fusion [570232]

Rolling Bearing Fault Diagnosis Method Based on LMD Entropy Feature Fusion [570233]

Cong, Junyu

Online Milling Chatter Detection Using Deep Residual Network and Transfer Learning [570328]

Cui, Jianyuan

The Fault Re-decision Method Based on the Different Decreasing Functions [570227]

Research on SLAM Algorithm of Mobile Robot Vision Based on Deep Learning [570251]

Cui, Lei

Fault Diagnosis of Mistuned Preload in Rod Fastened Rotor in Gas Turbine Based on CWT [570218]

Cui, Weimin

Design and Dynamic Analysis of Random Vibration Test Fixture for Aerospace Valve [570313]

Cui, Weiwei

A State-of-Health Estimation Method of Lithium-ion Batteries using ICA and SVM [570413]

D

Dai, Lele

Reliability Analysis and Noise Prediction of Small High-Speed Centrifugal Fan with Improved Volute Tongue [570272]

Dai, Wanchen

Architecture Design of Intelligent Maintenance System in Steel Industry [571141]

Dai, Wei

Vibration Signal Analysis of Rolling Bearing Based on Permutation Entropy [570344]

Dai, Yuanyuan

Emergency Constellation Design Based on Micro SAR Satellites [570209]

Dai, Zixiang

Reinforcement Lion Swarm Optimization Algorithm for Tool Wear Prediction [570247]

Deng, Bo

Rolling Bearing Fault Diagnosis Method Based on LMD Entropy Feature Fusion [570233]

Deng, Chao

Deep convolution adaptive network-based bearing fault diagnosis under variable conditions [570368]

Deng, Huimin

Research on Key Technologies of Health State Assessment for Complex equipment [570287]

Deng, Ming

Fault Simulation and Experimental Verification of Axial Piston Pump Based on AMESim [570361]

Deng, Wei

An Information Transmission Model for Offshore Wind Turbines Based on Multi-variable Coupling Relationship [570345]

Deng, Wenxiang

Imbalanced Fault Diagnosis of Bearing-Rotor System via Normalized Conditional Variational Auto-Encoder with Adaptive Focal Loss [570323]

Deng, Wujin

Generalized Cauchy for Predicting Reliability of Power System [570250]

Deng, Yang

Exploiting 3D Spatial Relationships for Target-driven Visual Navigation [568187]

Di, Zijun

Tool Remaining Useful Life Prediction Method Based on Time-frequency Features Fusion and Long Short-term Memory Network [570406]

Ding, Qi

Research on Intelligent Detection Method of Ancient Building Damage Characteristics in Deep Learning Environment [571190]

Ding, Xiaojian

Condition Monitoring of Permanent Magnet Synchronous Motor under Different Stator Fault Severity [570249]

Plunger Pump Cavitation Fault Recognition Based on Analysis of Low Frequency Energy [570457]

Research on Tracking the Health Status of Industrial Robot [570458]

Fault Simulation and Experimental Verification of Axial Piston Pump Based on AMESim [570361]

Ding, Yifei

A Convolutional Transformer Architecture for Remaining Useful Life Estimation [570208]

Ding, Yu

Modified Stacked Convolutional Auto-Encoder for Hydraulic Pump Fault Diagnosis with Unbalanced Data [570351]

Ding, Yufei

An Intermittent Fault Data Generation Method Based on LSTM and GAN [570420]

Dong, Haiping

Reliability Calculation of Solid Propellant Based on Accelerated Degradation Test [570410]

Lifetime Prediction of Turbine Blade of Turbocharger for Diesel Engine Based on Fatigue and Creep Damage Model [570411]

Performance Reliability Evaluation of Explosive Initiator Based on Bayes-Bootstrap Method [570412]

Dong, Huizhen

Online Collecting Method of Real-time Situation Information of NEV Operation [571198]

Student Online Learning Behavior Management System Based on Deep Data Mining [571207]

Dong, Junjun

Vibration Signal Analysis of Rolling Bearing Based on Permutation Entropy [570344]

Dong, Qing

Condition-based Maintenance and Spare Parts Ordering Strategy Considering the Influence of Condition Detection [570366]

Dong, Run

Design of PHM Test Verification Method and System for Aviation Electrical System [570467]

Dong, Xinmin

Adaptive Beamforming of Interference Covariance Matrix Reconstruction Based on K-means Clustering [570347]

Dong, Zhicheng

Reliability Modeling of Two-unit System with Degradation Interdependence [570308]

Dou, Wei

A Fault Diagnosis Method Composed of Gaussian Cloud Model and Domain-Invariant Features

Extraction [571370]

Du, Bin

A Prediction Method of LEO Satellite Orbit Control Effect Based on Multiple Regression Analysis Model [570440]

Du, Jiagang

Neural Networks Based Immune Recognition Model for Aeroengine Coupled Rotor System Fault Detection [571150]

Du, Juan

Fast Fault Diagnosis System Based on Data Mining AR Algorithm [570409]

Du, Shaohui

Diagnosis Methodology of Joint Faults in Single-Stage Actuation Ring-Vanes System Based on FRF Characterization [570454]

Du, Wenjuan

A Digital Twin Framework and an Implementation Method for Urban Rail Transit [570399]
PHM of Rail Vehicle Based on Digital Twin [570485]

Du, Xiaofeng

Nonlinear Feature Extraction Method of Pitch Control Signal in Erhu Works Based on Graph Convolutional Neural Network [571168]

Duan, Fajie

Blade Tip-timing Measurement Mathematical Modeling and Simulation without OPR under the Condition of Rotating Speed Fluctuation [570377]

Duan, Feng

Data-driven Methodology for State Detection of Gearbox in PHM Context [570382]

Duan, Pengfei

Fault Diagnosis of RCV Letdown Flow Based on LSTM Network [570478]

Duan, Ran

Study on Performance Evaluation and Prediction of Mixed-flow Hydraulic Turbine Units under Variable Operating Conditions [570334]

Duan, Xiaojun

Test Design of Small Sample Launch Vehicle Based on Composite Equivalency Bayesian Fusion [570376]

Duan, Yuhang

An Improved Similarity Matching Bidirectional Gated Recurrent Unit Autoencoder Scheme for Remaining Useful Life Prediction [570222]

Remaining Useful Life Prediction of Parts and Components based on BiLSTM Autoencoder with Attention Mechanism and Skip Connection [570223]

Dun, Yingjun

Adaptive Beamforming of Interference Covariance Matrix Reconstruction Based on K-means Clustering [570347]

Dwight, Richard

RAM Database for the Railway Industry – Status and Development [570493]

E

E, Mingcheng

An Improved Fault Diagnosis Framework Based on Deep Belief Networks [570460]

Eneberg, Magnus

Design of Diagnosis Service System for Self-driving Vehicles – Learnings from the Driver's Role Today [570317]

F

Fan, Feilong

Naturally-induced Early Aviation Bearing Fault Test and Early Bearing Fault Detection [570441]

Fan, Hongyan

A Data-driven Remaining Useful Life Prediction Methodology: Optimization Based on Digital Twin [570462]

Fan, Shicai

AME-TCN: Attention Mechanism Enhanced Temporal Convolutional Network for Fault Diagnosis in Industrial Processes [570297]

Fan, Zhongming

Architecture Design of Intelligent Maintenance System in Steel Industry [p54]

Fang, Yining

Experimental Study on the Effects of Wear and Clearance in a 3D Revolute Joint [570339]

Fei, Chengwei

Full-Parameters Identification Technique of Attenuated Oscillations in Power System Monitoring

[570239]

Fei, Hang

Research on Bubble Monitoring Method of Lubricating Oil System Based on DPM Model [570403]

Fei, Jian

Condition-based Maintenance and Spare Parts Ordering Strategy Considering the Influence of Condition Detection [570366]

Fei, Liu

Research on Prognostics and Health Management System Technology in the Field of Nuclear Power Plant [570481]

Feng, Jianshe

Trace Abstraction: A Novel Method to Enhance Fault Detection in Semiconductor Manufacturing Process with An Optimization Approach [570385]

Feng, Kun

A Vibration Acceleration Sensor-based Shock Pulse Method for Condition Evaluation of Rolling Bearings [570201]

Modulation Signal Bispectrum Optimization for Fault diagnosis of Intershaft Bearings [570306]

Labeling Degraded Full Operation Cycle Data with 2nd-Level Relaxation Clustering [570378]

Evaluation Method of Rotating Machinery Health State Based on TPE-XGBoost [570379]

Feng, Lele

Research on Key Technologies of Health Assessment for Multi-equipment Production Line [570275]

Feng, Wenquan

An Optimal DAG-LSTSVM Algorithm Based on Imbalance Factor for Vehicle Fault Diagnosis [570264]

Feng, Xinkai

Study on Static and Dynamic Characteristics of Tilting Pad Thrust Bearings with Journal Inclination [570459]

Feng, Yinli

Fault Diagnosis of Mistuned Preload in Rod Fastened Rotor in Gas Turbine Based on CWT [570218]

Feng, Zhen

Research on Cascading Effect Analysis of Civil Aircraft Shared Data and Resource System Failures [570261]

Fu, Guicui

Research on Reliability Evaluation Method of Fan-out Package Based on Sub-model [570474]

Fu, Hao

Research on the Rubbing Fault Diagnosis of Rotor Shafts Using the Double-rotor Test Bench [570450]

Fu, Hongyong

Research on Structural Health Monitoring of Composite Material Structure Based on Machine Learning Method [570396]

Fu, Xiao

Blade Tip-timing Measurement Mathematical Modeling and Simulation without OPR under the Condition of Rotating Speed Fluctuation [570377]

Fu, Xiuli

Research on Optimization Design of Shot Blasting Machine Blade Based on Modal Analysis [570429]

Fu, Zaiguo

Design Approaches of Can Premixed Combustor for Micro-gas Turbine [570263]

Fu, Zixia

Research on Bearing Incipient Failure Degradation State Recognition Method Based on Fast Spectral Kurtosis and Multi-point Optimal Minimum Entropy Deconvolution Adjusted [570245]

G

Gan, Hong

Outlier Mining Method for High Dimensional Massive Data Based on RBF Neural Network [571151]

Gao, Chen

Analytical Redundancy Estimation of Aeroengine Based on SANN [570279]

Gao, Chunhai

Research on Maintenance Decision of Rail Transit Signal Power Supply System [570427]

Gao, Jianmin

An Information Transmission Model for Offshore Wind Turbines Based on Multi-variable Coupling Relationship [570345]

Gao, Jun

Generalized Cauchy for Predicting Reliability of Power System [570250]

Gao, Kaiye

Four-Party Evolutionary Game and Simulation Analysis of E-commerce Market Supervision
[570424]

Gao, Tianyu

A Novel Fault Detection Method Based on Multiple Features for Analog Circuits [570207]

Fault Diagnosis Method of Analog Circuit Based on Enhanced Boundary Equilibrium Generative Adversarial Networks [570216]

Gao, Wenke

Reliability Modeling of Two-unit System with Degradation Interdependence [570308]

Gao, Xiangsheng

Optimization of Axial Contact Stiffness of Precision Ball Screws Based on Hertzian Theory [570268]

Tool Wear State Monitoring Based on Diagonal Slice Spectrum Amplitude Feature [570326]

Gao, Xuanyu

A Study on Torsional Stiffness of RV Reducer Considering Variable Loads and Tooth Modification
[570417]

Gao, Zhiyong

An Information Transmission Model for Offshore Wind Turbines Based on Multi-variable Coupling Relationship [570345]

Ge, Binxin

Modeling and Lifetime Prediction of Lithium-ion Battery [570300]

Ge, Daochuan

Intelligent PHM based Auxiliary Decision Framework of Advanced Modular Nuclear Systems
[570363]

Geng, He

Online Milling Chatter Detection Using Deep Residual Network and Transfer Learning [570328]

Geng, Kuiwei

Degradation Behavior and Mechanisms of E-mode GaN HEMTs with p-GaN Gate under High Temperature Gate Bias Stress [p284]

Gong, Haixiao

Three-Dimensional Reconstruction Method of High-Resolution Image Based on Independently Adjustable Sparse Coefficient [571174]

Design of Electronic Sand Table Interactive System Based on Depth Enhancement Algorithm
[571199]

Fast Fusion Method of Marine Environment Vector Data Based on Bp Neural Network [571209]

Gong, Mengtong

A Physics-informed Transfer Learning Approach for Anomaly Detection of Aerospace CMG with Limited Telemetry Data [570434]

Gong, Siqi

The Correntropy Induced Metric and Cyclic Correntropy Spectrum Method Combined With Singular Value Decomposition for Weak Signal Detection [570389]

A Novel Strategy for Signal Denoising Using Two-layer SVD and Its Application to Rub-impact Fault Diagnosis of Aero-engine [570422]

Gong, Wenjun

Fault Prognosis of Transmit-receive modules for Active Phased Array radar [570219]

Gu, Liudong

Remaining Useful Life Prediction using Dynamic Principal Component Analysis and Deep Gated Recurrent Unit Network [570281]

Gu, Shengjian

A Non-Invasive Online Condition Monitoring Method for Both SiC MOSFET and DC-Link Capacitor in a Single-Phase Inverter [570284]

Gu, Xin

Bearing Fault Diagnosis Using Fast Temporal Graph Convolutional Networks [570495]

Gu, Zhenyue

Vibration Characteristics Analysis Of A Double-Suction Centrifugal Pump Identified By Intelligent Algorithms [570446]

Guan, Tao

System Program Design for Micro Generator Set: Gasoline Engine–PMSG–Thyristor Rectifier With Low Cost and High Reliability [570469]

Guan, Yang

Fault Diagnosis of Rolling Bearing with Imbalanced Small Sample Scenarios [570383]

Guo, Bo

Real-time Prediction Model for Satellite Telemetry Parameter Based on PSRT-RVM [571214]

Imperfect-maintenance Optimization Model Based on System Reliability Constraint [570407]

Guo, Chunhui

A Semi-Markov Maintenance Model for Bridges Synthesizing with Four Types of Uncertainties
[570408]

Guo, Huayuan

Train Axle Bearing Fault Dignosis Based on Tunable Q-factor Wavelet Transform [570364]

Guo, Jiachen

Simulated Experiments of Rotor-stator Interaction Rubbing and Sand Ingestion Fault Based on Aero-engine Electrostatic Sensor [570237]

Guo, Jian

Research on Establishing Data-driven Diagnosis System of Transformer Winding's Short-circuit Withstand Ability [570220]

Guo, Kai

UAV Actuator Fault Detection using Maximal Information Coefficient and 1-D Convolutional Neural Network [570402]

Guo, Lei

A New Deep Sparse Filtering Method Applied to Transfer Learning [570242]

Guo, Lin

Sensor Fault Mode and Effect Analysis in Nuclear Power Plants [570492]

Guo, Wei

An Improved Multidimensional Distance Siamese Network for Bearing Fault Diagnosis with Few Labelled Data [570442]

A Modified CCN Based on Efficient Channel Attention and Resnet for Bearing Remaining Useful Life Prediction [570443]

An Intelligent Bearing Fault Diagnosis based on Modified Probabilistic Knowledge Distillation
[570444]

Application of Denoising Autoencoder in Intelligent Fault Diagnosis for Bearings under Varying Working Conditions [570445]

Guo, Xudong

A Novel Model of Bearing Fault Diagnosis Based on Convolutional Auto-encoder and Capsule Network [570260]

Remaining Useful Life Prediction of Mechanical Equipment Based on Temporal Convolutional Network and Asymmetric Loss Function [570367]

H

Han, Baokun

Multilayer Domain Adaptation-Based Convolutional Auto Encoder for Fault Diagnosis under Different Speeds [570212]

Han, Dongyang

A Novel Similarity-based Method for Remaining Useful Life Prediction under Multiple Fault Modes [570224]

Han, Haoran

Robust Vibration Signal Denoising and Diagnosis Using Encoder-Decoder Networks with Cross-layer Residual Connection [570341]

Han, Ming

Research on Fast Enhancement of Motion Blurred Image Based on Improved Deep Learning [571205]

Research on Single Image Super Resolution Enhancement Algorithm Based on Deep Learning [571206]

Han, Qingkai

Diagnosis Methodology of Joint Faults in Single-Stage Actuation Ring-Vanes System Based on FRF Characterization [570454]

Research on Extraction Method of Sensitive Feature of Thin-wall Plate Crack Fault [570214]

Analysis of Unbalance Sensitive Position of Flexible Slender Shaft Rotor [570423]

A Fault Diagnosis Study of Aero-engine Hydraulic Piping Clamp Based on Deep Learning [570496]

Han, Qingpeng

Fault Diagnose of the Rolling Bearings Vibration Signals Based on Kalman Filter Method [570319]

Research on Vibration Reduction of Regular Hexahedral Honeycomb Structure with Periodic Strut [570362]

Han, Ruoran

Product key reliability characteristics identification method based on XGBoost in manufacturing process [570338]

Han, Shuo

A Fault Diagnosis Study of Aero-engine Hydraulic Piping Clamp Based on Deep Learning [570496]

Analysis of Unbalance Sensitive Position of Flexible Slender Shaft Rotor [570423]

Han, Songyu

Gearbox Fault Diagnosis using Novel Dilated CNN and Piecewise Loss under Unbalanced Data
[570390]

Han, Wenhua

Online Milling Chatter Detection Using Deep Residual Network and Transfer Learning [570328]

Han, Yaojia

Design and Dynamic Analysis of Random Vibration Test Fixture for Aerospace Valve [570313]

Han, Yaoyu

Stiffness Analysis of High-speed Cylindrical Roller Bearing Subjected to Combined Loads [570228]

Han, Yunteng

Study on Dynamics Characteristics of Labyrinth-seal -rotor System with Pedestal Looseness
[570270]

Hao, Pengcheng

Early Fault Detection of Gearbox Using TSA and VAR Model Considering Load Variation [570418]

Hao, Wangshen

Adaptive Beamforming of Interference Covariance Matrix Reconstruction Based on K-means Clustering [570347]

He, Dingnan

Design and Dynamic Analysis of Random Vibration Test Fixture for Aerospace Valve [570313]

He, Jiahui

Real-time Prediction Model for Satellite Telemetry Parameter Based on PSRT-RVM [571214]

He, Jie

Three-Dimensional Reconstruction Method of High-Resolution Image Based on Independently Adjustable Sparse Coefficient [571174]

Optimization Method of Virtual Sand Table Background Server Based on Unity 3D [571175]

He, Jing

Design of High-Precision Indoor 3D Space Positioning System Based on Ray Tracing [571182]

Construction of Indoor Environment Spatial Layout Planning Model Based on 3D Virtual Simulation Technology [571183]

He, Junwang

A Universal High Performance Intelligent Processor Of Satellite [571242]

He, Mengqi

Remaining Useful Life Prediction of Parts and Components based on BiLSTM Autoencoder with Attention Mechanism and Skip Connection [570223]

He, Qingchuan

An Accelerated Degradation Testing Method for Quantifying Lifetime of DC-DC Power Supply [570241]

He, Xuan

A Fault Diagnosis Method For Hydraulic End Of Drilling Pump Based On Dynamic Fault Tree [570253]

He, Ya

A Vibration Acceleration Sensor-based Shock Pulse Method for Condition Evaluation of Rolling Bearings [570201]

Modulation Signal Bispectrum Optimization for Fault diagnosis of Intershaft Bearings [570306]

He, Yihai

Functional Failure Diagnosis Method of Multi-state Manufacturing System Based on Extended Quality State Task Network [570202]

Product Key Reliability Characteristics Identification Approach Using GA in Manufacturing Process [570211]

KRCs Driven Product Manufacturing Quality Improvement Approach Using DMAIC [570213]

Product key reliability characteristics identification method based on XGBoost in manufacturing process [570338]

He, You

Dynamic Diagnosis Method for Continuous and Equidistant Wheel Burn based on Axle Box Acceleration [570456]

An improved marginal index method to diagnose poor welded joints of Heavy-haul Railway [571143]

Xu, Xuebing

Intelligent Fault Diagnosis of Engine Bolt Tightening Based on One-dimensional Convolutional Neural Network [570380]

Xu, Yanhe

A Hybrid Fault Diagnosis Method for Rolling Bearing with Improved Multiscale Dispersion Entropy-based State Pre-detection and Feature Fusion [570372]

Xu, Yufei

Integrated System Health Management Research and Application on Satellite [570475]

Xu, Yuhui

A Novel Similarity-based Method for Remaining Useful Life Prediction under Multiple Fault Modes [570224]

Xuan, Jianping

An Uncertainty Correlation Metric in Gradual Inference to Improve Domain Adaptation for Cross-location Fault Diagnosis [570266]

Compound Fault Recognition Based on Wavelet Packet Transform and the Transferable Combination of ResNet50 and Multi-label Classifier [570358]

Xue, Cheng

Early Fault Detection of Gearbox Using TSA and VAR Model Considering Load Variation [570418]

Xue, Shufei

Reliability Model of Single Internal and External Meshing Planetary Gear Transmission Mechanism Considering Load Correlation [570448]

A Maintenance Analysis Method Associated Functional Structure for Complex Equipment [570449]

Xue, Zhengkun

Quantitative Identification of Crack Faults in Aviation Hydraulic Pipeline Based on Multifractal Theory [570302]

Y

Yan, Jundong

Research on Health Assessment System of Aircraft Power Supply System [570292]

Yan, Ruqiang

An Analytical Representation Method for Dynamic Behavior of Rotating Blade with Transverse Crack [570332]

Yan, Xiaozhen

Trilateration Based on the Combination and K-Means Clustering [570289]

Yan, Yun-Xue

Student Online Learning Behavior Management System Based on Deep Data Mining [571207]

Yan, Zhenhao

A New Deep Sparse Filtering Method Applied to Transfer Learning [570242]

Yang, Bin

Tool Wear State Monitoring Based on Diagonal Slice Spectrum Amplitude Feature [570326]

Yang, Chaoying

Power Spectral Entropy-based Graph Construction for Rotating Machinery Diagnosis Using Multi-sensor [570343]

Yang, Cheng

Fault Diagnosis Method of Analog Circuit Based on Enhanced Boundary Equilibrium Generative Adversarial Networks [570216]

Yang, Dingxin

The Wear Status Evaluation of Bearing based on Online Oil Parameters and Vibration Signals [571145]

Yang, Hua-Kui

Bridge Deck Drainage System Design Based on GIS [571156]

Yang, Jiawei

Fault Feature Extraction Method of Rotating Machinery Based on DeepLabV3+ Semantic Segmentation [570354]

Yang, Jingli

A Novel Fault Detection Method Based on Multiple Features for Analog Circuits [570207]

Fault Diagnosis Method of Analog Circuit Based on Enhanced Boundary Equilibrium Generative Adversarial Networks [570216]

Yang, Ke

An Aeroengine Fault Diagnosis Method Based on UTCA and DBN [570257]

Yang, Kexin

Trilateration Based on the Combination and K-Means Clustering [570289]

Yang, Laihao

An Analytical Representation Method for Dynamic Behavior of Rotating Blade with Transverse Crack [570332]

Yang, Li

Reliability Assessment of Power Systems with Warm Standby and Energy Storage [570473]

Yang, Lichen

Preventive Prognosis of Aluminum Electrolytic Capacitors Based on SAPSO-LSTM [570486]

Yang, Lihua

Stiffness Analysis of High-speed Cylindrical Roller Bearing Subjected to Combined Loads [570228]

Study on Static and Dynamic Characteristics of Tilting Pad Thrust Bearings with Journal Inclination [570459]

Yang, Liping

Evaluation Method of Rotating Machinery Health State Based on TPE-XGBoost [570379]

Yang, Nan

Research on Fault Diagnosis Based on transfer learning and fault sensitivity analysis [570428]

Yang, Ning

Development of an Online Fault-Diagnostic-System Based on STM32 for Actuators [570240]

Yang, Ruifeng

Demand Analysis of Joint Decision-Making Modeling of Equipment Maintenance and Spare Parts Inventory Based on PHM [571481]

Yang, Ruiyi

A FE-DE-FV Parallel Computing Method Based on OpenMP for the Hydraulic Fracturing [570491]

Yang, Shanshui

Reliability Evaluation of Aircraft Power Supply System Based on Factoring Algorithm [570463]

Extraction of Solar Cell Model Parameters Based on Quantum Whale Optimization Algorithm [570296]

Modeling and Lifetime Prediction of Lithium-ion Battery [570300]

Yang, Tongguang

Quantitative Identification of Crack Faults in Aviation Hydraulic Pipeline Based on Multifractal Theory [570302]

A Fault Diagnosis Study of Aero-engine Hydraulic Piping Clamp Based on Deep Learning [570496]

Analysis of Unbalance Sensitive Position of Flexible Slender Shaft Rotor [570423]

Yang, Wansheng

Federated Transfer Learning for Bearing Fault Diagnosis Based on Averaging Shared Layers [570425]

Yang, Weixin

An Analytical Method for the Elastic Supporter Dynamic Stress Signals Applied to Aero-engine Fault Diagnosis [571142]

Research on Multiple Cross Correlation Fusion Method of Fault Vibration Signal [570355]

Yang, Xiangfei

State Recognition Method of the Recoil System of the Artillery Based on Time-domain Envelope Analysis [570370]

Yang, Xiao

A Study on Torsional Stiffness of RV Reducer Considering Variable Loads and Tooth Modification [570417]

Yang, Xiuzhen

Functional Failure Diagnosis Method of Multi-state Manufacturing System Based on Extended Quality State Task Network [570202]

Yang, Xuesong

Research on a Reliability Prediction Method Based on Fuzzy Cognitive Map [570265]

Yang, Yi

Demagnetization Fault Detection in Surface-Mounted Permanent Magnet Synchronous Machine [570274]

Vibration Analysis of a Marine Propulsion Shaft System with the Torsional-longitudinal Coupling Effect Induced by Propeller and Crankshaft [570291]

Transmission System Bearing Fault Detection Method Based on Modulated Signal Bi-spectrum Analysis [570293]

Fault Analysis of Typical Structure of Helicopter Transmission System Based on Lumped-Parameter Modeling [570312]

Yang, Yongsheng

RUSHAP: A Unified Approach to Interpret Deep Learning Model for Remaining Useful Life Estimation [570283]

Knowledge Graph Construction for Fault Diagnosis of Aircraft Environmental Control System [570310]

Yang, Yulong

Research on the Rubbing Fault Diagnosis of Rotor Shafts Using the Double-rotor Test Bench [570450]

Yang, Yunfan

Fault Simulation and Experimental Verification of Axial Piston Pump Based on AMEsim [570361]

Plunger Pump Cavitation Fault Recognition Based on Analysis of Low Frequency Energy [570457]

Yang, Zheshuai

An Analytical Representation Method for Dynamic Behavior of Rotating Blade with Transverse Crack [570332]

Yang, Zhiming

Industrial Fault Diagnosis Based on Few Shot Learning [570487]

Yao, Jiachen

A One-Dimensional Vision Transformer with Multiscale Convolution Fusion for Bearing Fault

Diagnosis [570371]

Bearing Fault Diagnosis Using Fast Temporal Graph Convolutional Networks [570495]

Yao, Jianyong

Imbalanced Fault Diagnosis of Bearing-Rotor System via Normalized Conditional Variational Auto-Encoder with Adaptive Focal Loss [570323]

Yao, Pei

A Network Structure Search Method Based on Reinforcement Learning for Rolling Bearing Fault Diagnosis [570282]

Yao, Wanning

The Abnormal Detection Strategy for Spacecraft Components with Multi-dimension Parameters [571149]

Yao, Wenqing

Sensor Fault Mode and Effect Analysis in Nuclear Power Plants [570492]

Yao, Xiaosong

A Universal High Performance Intelligent Processor Of Satellite [571242]

Yao, Yuan

Mechanical Fault Diagnosis Based on Self-sensing Motor Drive: Review and Key Issues [570455]

Yao, Yuantao

Intelligent PHM based Auxiliary Decision Framework of Advanced Modular Nuclear Systems [570363]

Yao, Yunpeng

Distributed Fault-tolerant Adaptive Flocking Control of Multi-agent System with Model Perturbation and Actuator Failure [570235]

Yao, Zhengyin

A SysML Description for TT&C System [570387]

Ye, Peng

Research on Group Preventive Maintenance Method based on Components Dependence [570246]

Ye, Qi

A Simulation-based Study of the Effects of Incomplete Data on Lifetime Distribution Estimation due to Censorship [570369]

Accurate Multiple-site Damage Localization of Aircraft Composite Structures under Environmental and Operational Conditions [570435]

Ye, Qunfeng

Comprehensive Design and Investigation of Civil Aircraft Reliability /Maintainability/Safety/Testability Engineering [570259]

Ye, Zhengyu

Distributed Fault-tolerant Adaptive Flocking Control of Multi-agent System with Model Perturbation and Actuator Failure [570235]

Yi, Da-jiang

Dynamic Binary Translation Cache Optimization Algorithm in Cloud Computing Environment [571152]

Yi, Guanxiu

Research on Prediction of Turbine Mechanical Performance Degradation Based on Attention LSTM [570286]

Yi, Sheng

The Comparative Experiments between the Vibration Signal and the Current signal of Rotor System based on Deep Learning Method [570278]

Yi, Xiaojian

Reliability Model of Single Internal and External Meshing Planetary Gear Transmission Mechanism Considering Load Correlation [570448]

A Maintenance Analysis Method Associated Functional Structure for Complex Equipment [570449]

Yi, Xinhua

Dynamic Analysis and Simulation for Under Water Engineering Robot [571480]

Yin, Hao

Research on Bearing Incipient Failure Degradation State Recognition Method Based on Fast Spectral Kurtosis and Multi-point Optimal Minimum Entropy Deconvolution Adjusted [570245]

Yin, Hong-yan

Moving Load Identification Method of Complex Bridge Structure Based on Information Platform [571186]

Design of Intelligent Health Monitoring Hybrid Information System for Large Bridge Structures [571187]

Yin, Zhendong

Extraction of Solar Cell Model Parameters Based on Quantum Whale Optimization Algorithm [570296]

Modeling and Lifetime Prediction of Lithium-ion Battery [570300]

Yin, Zhengyang

Demagnetization Fault Detection in Surface-Mounted Permanent Magnet Synchronous Machine
[570274]

*Vibration Analysis of a Marine Propulsion Shaft System with the Torsional-longitudinal Coupling
Effect Induced by Propeller and Crankshaft* [570291]

*Transmission System Bearing Fault Detection Method Based on Modulated Signal Bi-spectrum
Analysis* [570293]

Yin, Zihan

Modeling and Lifetime Prediction of Lithium-ion Battery [570300]

Ying, Yulong

ADS-B Signal Recognition Method Based on Entropy Feature Fusion [570232]

Rolling Bearing Fault Diagnosis Method Based on LMD Entropy Feature Fusion [570233]

Yoshimatsu, Shogo

*Research on Inspection and Diagnosis Robots for Plant Facilities -Trajectory Tracking Control by
Fuzzy Genetic Algorithm and Self-Positioning Correction Method by Deep Learning* [570353]

Yu, Bo

Study on Static and Dynamic Characteristics of Tilting Pad Thrust Bearings with Journal Inclination
[570459]

Yu, Huahuang

*A Method Using Quantum Genetic Algorithm Optimized BP Neural Network of Real-time Fault
Detection for the Liquid Rocket Engine* [570301]

Yu, Jinsong

*A Physics-informed Transfer Learning Approach for Anomaly Detection of Aerospace CMG with
Limited Telemetry Data* [570434]

Yu, Junquan

*Fault Diagnosis of Gear Pitting Based on Dynamic Strain Measurements from Fiber Bragg Grating
Sensors* [570464]

Yu, Liangqin

*Analysis of the Evaluation Indicators' System for Health Management Effectiveness of
Communication Equipment* [570479]

Yu, Xia

Research on Reliability Test of Hybrid Information Intelligent Retrieval in Mobile English Teaching
[571155]

Evaluation Model of New English Talents Training Model Based on AHP-Entropy Method [571201]

Yu, Xiaoguang

Quantitative Identification of Crack Faults in Aviation Hydraulic Pipeline Based on Multifractal Theory [570302]

A Fault Diagnosis Study of Aero-engine Hydraulic Piping Clamp Based on Deep Learning [570496]

Yu, Xijin

Quantitative Identification of Crack Faults in Aviation Hydraulic Pipeline Based on Multifractal Theory [570302]

Yu, Xingchen

Online Milling Chatter Detection Using Deep Residual Network and Transfer Learning [570328]

Yu, Xutao

Structure Optimization Design and Fault Simulation of Permanent Magnet Synchronous Direct Drive Motor [570311]

Yu, Yahan

Fast Fault Diagnosis System Based on Data Mining AR Algorithm [570409]

Yu, Yang

Industrial Fault Diagnosis Based on Few Shot Learning [570487]

Yu, Yingang

Research on Maintenance Decision of Rail Transit Signal Power Supply System [570427]

Yu, Ziquan

Distributed Fault-tolerant Adaptive Flocking Control of Multi-agent System with Model Perturbation and Actuator Failure [570235]

Yuan, Binxia

Research on Vibration Reduction of Regular Hexahedral Honeycomb Structure with Periodic Strut
[570362]

Yuan, Dongfeng

Reinforcement Lion Swarm Optimization Algorithm for Tool Wear Prediction [570247]

Tool Remaining Useful Life Prediction Method Based on Time-frequency Features Fusion and Long Short-term Memory Network [570406]

Yuan, Liu-Yin

Full-Parameters Identification Technique of Attenuated Oscillations in Power System Monitoring
[570239]

Yuan, Shenfeng

On-line Crack Propagation Prognostics Using a Resample-move Particle Filter [570234]

Accurate Multiple-site Damage Localization of Aircraft Composite Structures under Environmental and Operational Conditions [570435]

Yuan, Shuai

An Optimal DAG-LSTSVM Algorithm Based on Imbalance Factor for Vehicle Fault Diagnosis
[570264]

Yuan, Xin

A Novel Strategy for Signal Denoising Using Two-layer SVD and Its Application to Rub-impact Fault Diagnosis of Aero-engine [570422]

Yuan, Yuan

Fault-tolerant Control Scheme for the Sensor Fault in the Transition Process of Variable Cycle Engine [570210]

Z

Zan, Tao

Tool Wear State Monitoring Based on Diagonal Slice Spectrum Amplitude Feature [570326]

Zeng, Mengjie

Adversarial Domain Adaptation for Transfer Fault Diagnosis of Roller Bearings based on Multi-MMD Alignment [570373]

Zeng, Xin

Research on Sub-array Digital Phased Array Testing Method [570453]

Zhan, Keyi

A Novel Strategy for Signal Denoising Using Two-layer SVD and Its Application to Rub-impact Fault Diagnosis of Aero-engine [570422]

Zhan, Wei-Wei

Settlement Prediction Method of Bridge Pile Foundation on Soft Soil Foundation Based on Hyperbolic Method [571180]

Research on Quality Control Method of Road Engineering Construction Based on Genetic Algorithm [571181]

Zhang, Anqi

Product Key Reliability Characteristics Identification Approach Using GA in Manufacturing Process [570211]

KRCs Driven Product Manufacturing Quality Improvement Approach Using DMAIC [570213]

Product key reliability characteristics identification method based on XGBoost in manufacturing process [570338]

Zhang, Bin

ADS-B Signal Recognition Method Based on Entropy Feature Fusion [570232]

Rolling Bearing Fault Diagnosis Method Based on LMD Entropy Feature Fusion [570233]

Zhang, Bo-wen

NSP-CNN Rolling Bearing Fault Diagnosis Method [570471]

Zhang, Chao

Evaluation of Vibration Induced Local Fatigue in Aluminum Alloy Structure by Using Laser Ultrasonic Technique [570307]

Comparisons of Different Importance Measures with Hierarchical System Markov Bayesian Network Model [570337]

Zhang, Di

A Fault Diagnosis Method Composed of Gaussian Cloud Model and Domain-Invariant Features Extraction [571370]

Zhang, Dianzheng

Densely Connected Fully Convolutional Auto-Encoder Based Slewing Bearing Degradation Trend Prediction Method [570280]

Zhang, Dingcheng

Train Axle Bearing Fault Diagnosis Based on Tunable Q-factor Wavelet Transform [570364]

Zhang, Duqing

Deep Convolution Adaptive Network-based Bearing Fault Diagnosis under Variable Conditions [570368]

Zhang, Erliang

Adaptive Beamforming of Interference Covariance Matrix Reconstruction Based on K-means Clustering [570347]

Zhang, Faping

State Recognition Method of the Recoil System of the Artillery Based on Time-domain Envelope

Analysis [570370]

Zhang, Fengling

A Novel Method for Inter-shaft Bearing Fault Feature Extraction Based Generalized Refined Composite Multiscale Quantum Entropy [570430]

Zhang, Guigang

A Digital Twin Framework and an Implementation Method for Urban Rail Transit [570399]

Fast Fault Diagnosis System Based on Data Mining AR Algorithm [570409]

Research on Fault Diagnosis Based on transfer learning and fault sensitivity analysis [570428]

PHM of Rail Vehicle Based on Digital Twin [570485]

Zhang, Hailong

Gyro Anomaly Detection Method Based on Information Entropy [570436]

Zhang, Haitao

Parameter Estimation of Mixed Weibull Distribution Based on Genetic Algorithm and Gradient Descent Method [570381]

Zhang, Hao

Analysis of Unbalance Sensitive Position of Flexible Slender Shaft Rotor [570423]

Zhang, Henghao

Modified Stacked Convolutional Auto-Encoder for Hydraulic Pump Fault Diagnosis with Unbalanced Data [570351]

Zhang, Hexiang

Reliability Analysis and Noise Prediction of Small High-Speed Centrifugal Fan with Improved Volute Tongue [570272]

Zhang, Huan

Research on Statics Model of Aircraft Fuel Tank Inspection Robot [570229]

Zhang, Hui

Tool Reliability Modeling Based on Gamma Process in Multiple Working Conditions [570388]

Zheng, Hao

Blade Tip-timing Measurement Mathematical Modeling and Simulation without OPR under the Condition of Rotating Speed Fluctuation [570377]

Zheng, Rui

Optimal Pricing Strategy for a Flexible Extended Warranty Policy [570465]

Zheng, Shi-lin

Magneto-Optical Imaging Feature Extraction of Angle Welding Defects Based on Polarization Information [571163]

Zheng, Youshi

Research on Civil Aircraft Maintenance Man-Hour Evaluation Method Based on Maintenance Sequence [570276]

Research on Safety Analysis Method Based on Civil Aircraft Maintenance Operation [570277]

Research for Proposed Master Minimum Equipment List(PMMEL) Items Analysis Method Based on System Safety Assessment [570303]

Zheng, Yuanzhu

Fault Prognosis of Transmit-receive modules for Active Phased Array radar [570219]

Zhi, Fengyao

Blade Tip-timing Measurement Mathematical Modeling and Simulation without OPR under the Condition of Rotating Speed Fluctuation [570377]

Zhi, Wang

A Novel Method for Inter-shaft Bearing Fault Feature Extraction Based Generalized Refined Composite Multiscale Quantum Entropy [570430]

Zhi, Yifan

Design of Intelligent Diagnosis Operation and Maintenance System for Circulating Water Pump [570490]

Zhong, Cheng

Design of Wireless Transmitting Power Amplifier Chip Applied to the Internet of Things in Smart Cities [571216]

A Low Noise Amplifier of Wireless Receiver for Internet of Things Towards a Smart City [571217]

Zhong, Jian

Imperfect-maintenance Optimization Model Based on System Reliability Constraint [570407]

Zhong, Wenyan

Fault Diagnosis of Mistuned Preload in Rod Fastened Rotor in Gas Turbine Based on CWT
[570218]

Zhong, Zhirong

Simulated Experiments of Rotor-stator Interaction Rubbing and Sand Ingestion Fault Based on Aero-engine Electrostatic Sensor [570237]

Zhong, Zhiwei

Induction Motor Fault Diagnosis Based on Multi-sensor Fusion Under High Noise and Sensor Failure Condition [570244]

Zhou, Chun-ke

Design of Electronic Sand Table Interactive System Based on Depth Enhancement Algorithm
[571199]

Zhou, Chun-rong

Evaluation Method of English Listening Distance Teaching Based on ID3 Algorithm [571154]

Anonymous Access Control Model of Mobile RFID System in Internet of Things [571193]

Orthogonal Matching Pursuit Hybrid Precoding Algorithm Based on Multi Source Security Information [571194]

Research on Reversible Ciphertext Field Information Hiding Algorithm Based on Data Stream
[571204]

Zhou, Dankan

A Universal High Performance Intelligent Processor Of Satellite [571242]

Zhou, Di

A Wiener Process Model with Kernel-based Time Transformation for Nonlinear Degradation Data
[570305]

Zhou, Hao

Research on the Control Method of Electromechanical Action System Based On Improved Sliding Mode Algorithm [570365]

Zhou, Haotian

EFMEA-Based Design of Prognostics and Health Management System for Heavy Vehicles [570414]

Zhou, Jian

Fault Simulation and Experimental Verification of Axial Piston Pump Based on AMESim [570361]

Research on Tracking the Health Status of Industrial Robot [570458]

Zhou, Jianzhong

Study on Performance Evaluation and Prediction of Mixed-flow Hydraulic Turbine Units under Variable Operating Conditions [570334]

Zhou, Jun

Rotating Machinery Fault Diagnosis using Light Gradient Boosting Machine [570243]

Zhou, Kaibo

Power Spectral Entropy-based Graph Construction for Rotating Machinery Diagnosis Using Multi-sensor [570343]

Zhou, Peng

Virtual-Signal-Injection Based Dual-Plane MTPA Control for Five-Phase PMSM [570470]

Zhou, Qi

Application of Reliability Technology in Railway System [570309]

Zhou, Tao

Study on Dynamics Characteristics of Labyrinth-seal -rotor System with Pedestal Looseness [570270]

Study on Dynamic Characteristics of Double Span Rotor-Bearing System with Slowly-varying Excitation Frequency [570294]

Zhou, Xiaotian

Reinforcement Lion Swarm Optimization Algorithm for Tool Wear Prediction [570247]

Zhou, Yang

Neural Networks Based Immune Recognition Model for Aeroengine Coupled Rotor System Fault Detection [571150]

Sensor fault detection based on self organizing immune network [571146]

Vibration Analysis of a Marine Propulsion Shaft System with the Torsional-longitudinal Coupling Effect Induced by Propeller and Crankshaft [570291]

Fault Analysis of Typical Structure of Helicopter Transmission System Based on Lumped- Parameter Modeling [570312]

Sensor Fault Detection Based on Self Organizing Immune Network [571146]

Zhou, Yifan

Remaining Useful Life Prediction using Dynamic Principal Component Analysis and Deep Gated Recurrent Unit Network [570281]

Optimal Pricing Strategy for a Flexible Extended Warranty Policy [570465]

Tool Reliability Modeling Based on Gamma Process in Multiple Working Conditions [570388]

Convolution and Long Short-Term Memory Neural Network for PECVD Process Quality Prediction
[570394]

Zhou, Yong

Research on the Control Method of Electromechanical Action System Based On Improved Sliding Mode Algorithm [570365]

Zhou, Yuan

Failure Analysis for Pressure Fluctuation of Oxygen Phase-change Heat Exchanger in Rocket Engine [570329]

Zhou, Yunshan

Research on Establishing Data-driven Diagnosis System of Transformer Winding's Short-circuit Withstand Ability [570220]

Zhou, Zhiting

Convolution and Long Short-Term Memory Neural Network for PECVD Process Quality Prediction
[570394]

Zhu, Anqi

Four-Party Evolutionary Game and Simulation Analysis of E-commerce Market Supervision
[570424]

Zhu, Feng

Trace Abstraction: A Novel Method to Enhance Fault Detection in Semiconductor Manufacturing Process with An Optimization Approach [570385]

Zhu, Haiyan

The Study of Entire Aircraft Level Direct Maintenance Cost Analysis Method for Civil Aircraft
[570350]

A Whole Life Cycle Maintenance Strategy of Civil Aircraft Precooler Based on Case-based Reasoning and Probability Model [570384]

Zhu, Qingyu

Research on Extraction Method of Sensitive Feature of Thin-wall Plate Crack Fault [570214]

A Fault Diagnosis Study of Aero-engine Hydraulic Piping Clamp Based on Deep Learning [570496]

Zhu, Rui

Fault Diagnose of the Rolling Bearings Vibration Signals Based on Kalman Filter Method [570319]

Research on Vibration Reduction of Regular Hexahedral Honeycomb Structure with Periodic Strut
[570362]

Zhu, Sensen

EEMD---Wavelet Adaptive Threshold Function Denoising and Its Application in Damage Monitoring of Aviation Connection Structure [570206]

Zhu, Shenrui

EEMD---Wavelet Adaptive Threshold Function Denoising and Its Application in Damage Monitoring of Aviation Connection Structure [570206]

Zhu, Xulan

Reliability Analysis of Power Electronic Topology Based on Bayesian Network [571369]

Zhu, Zhongkui

An Optimized Multivariate Variational Mode Decomposition for the Fault Diagnosis of Rotating Machinery [570231]

Zhu, Zhu

Integrated System Health Management Research and Application on Satellite [570475]

Zhuang, Yonghao

Double Layer Feature Selection and Feature Fusion Method for Rolling Bearing Based on AFF-AAKR [570386]

Zong, Yipeng

EEMD---Wavelet Adaptive Threshold Function Denoising and Its Application in Damage Monitoring of Aviation Connection Structure [570206]

Zou, Jianxiao

AME-TCN: Attention Mechanism Enhanced Temporal Convolutional Network for Fault Diagnosis in Industrial Processes [570297]

Zuo, Dunwen

The Comparative Experiments between the Vibration Signal and the Current signal of Rotor System based on Deep Learning Method [570278]

Marine Propulsion Shaft Bearing Fault Feature Extraction and Diagnosis Based on Strong Tracking State Principal Component [570304]

Research on Inspection and Diagnosis Robots for Plant Facilities -Trajectory Tracking Control by Fuzzy Genetic Algorithm and Self-Positioning Correction Method by Deep Learning [570353]

Zuo, Hongfu

Research on Statics Model of Aircraft Fuel Tank Inspection Robot [570229]

Simulated Experiments of Rotor-stator Interaction Rubbing and Sand Ingestion Fault Based on

Aero-engine Electrostatic Sensor [570237]

Detection of Delamination Defects in Carbon Fiber Composites based on Infrared Thermal Imaging [570346]

Research on Bubble Monitoring Method of Lubricating Oil System Based on DPM Model [570403]

Early Fault Detection of Gearbox Using TSA and VAR Model Considering Load Variation [570418]
