QuRating: Selecting High-Quality Data for Training Language Models

Alexander Wettig 1 Aatmik Gupta 1 Saumya Malik 1 Danqi Chen 1

Abstract

Selecting high-quality pre-training data is important for creating capable language models, but existing methods rely on simple heuristics. We introduce QuRating, a method for selecting pretraining data that captures the abstract qualities of texts which humans intuitively perceive. In this paper, we investigate four qualities—writing style, required expertise, facts & trivia, and educational value. We find that LLMs are able to discern these qualities and observe that they are better at making pairwise judgments of texts than at rating the quality of a text directly. We train a QuRater model to learn scalar ratings from pairwise judgments, and use it to annotate a 260B training corpus with quality ratings for each of the four criteria. In our experiments, we select 30B tokens according to the different quality ratings and train 1.3B-parameter language models on the selected data. We find that it is important to balance quality and diversity, as selecting only the highest-rated documents leads to poor results. When we sample using quality ratings as logits over documents, our models achieve lower perplexity and stronger in-context learning performance than baselines. Beyond data selection, we use the quality ratings to construct a training curriculum which improves performance without changing the training dataset. We extensively analyze the quality ratings and discuss their characteristics, biases, and wider implications.²

1. Introduction

There is increasing evidence that choosing the right training data is essential for producing state-of-the-art large language models (LLMs) (Brown et al., 2020; Chowdhery et al., 2023; Rae et al., 2021). Researchers have found that model performance can be improved by deduplicating training data (Lee

Figure 1. In QuRating, we obtain comparative judgements from an LLM to train a QuRater model, which assigns scalar quality ratings to the documents in a language model training corpus.

et al., 2022; Abbas et al., 2023), finding the right balance of domains (Touvron et al., 2023a; Xie et al., 2023a), or selecting data that resembles a high-quality corpus (Brown et al., 2020; Chowdhery et al., 2023; Xie et al., 2023b). However, the ideal properties of training data remain hard to characterize; an improved understanding could enable open research to train stronger models under resource constraints.

In this work, we aim to capture the abstract qualities of texts which humans intuitively perceive. As part of our approach, which we call QuRating (quality rating),³ (1) we compare pairs of texts along a quality criterion, (2) we train a model that translates the resulting judgments into scalar quality ratings, (3) we use these ratings to select pre-training data, and (4) we identify which abstract qualities are valuable by training language models on the selected subsets and evaluating their performance.

Throughout the paper, we focus on four particular qualities of a text as our criteria for data selection: the text's *writing style*, the amount of *facts & trivia* it contains, its *educational value*, and the *required expertise* needed to understand it. These qualities are necessarily subjective. However, we verify that state-of-the-art LLMs can discern their presence in clear-cut cases. In particular, we find that LLMs produce more stable and accurate judgments when prompted to compare documents in a pairwise setting.

²To encourage further research, we release our prompts, models, and data at https://github.com/princeton-nlp/QuRating.

³QuRating/QuRater can be pronounced like curating/curator.

We use the Bradley-Terry model (Bradley & Terry, 1952) to translate the LLM-derived pairwise judgments into quantitative ratings for each piece of text. We treat the ratings as logits over documents, from which we sample without replacement for subset selection. We add a temperature τ to trade off quality and diversity: $\tau \to 0$ becomes top-k selection, while $\tau \to \infty$ is equivalent to uniform random sampling. We show that in this formulation, quality ratings are connected to rewards in RLHF (Ouyang et al., 2022).

For our experiments, we query GPT-3.5 to judge 250K text pairs for each of the four quality criteria and fine-tune a Sheared-Llama-1.3B model (Xia et al., 2023) to learn the implied quality ratings. We then use this fine-tuned *QuRater* model to predict quality ratings across 260B tokens from the SlimPajama corpus (Soboleva et al., 2023) to produce the *QuRatedPajama* dataset. Finally, we train new 1.3B-parameter language models from scratch by selecting subsets of 30B out of 260B tokens. We compare our method to uniform sampling and importance resampling (Xie et al., 2023b) with respect to high-quality domains. Our evaluation focuses on in-context learning on 10 diverse tasks as a measure of model capability (Gao et al., 2021).

We find that selecting only the highest-rated documents produces weaker models than uniform selection. However, sampling with a temperature τ to balance quality and diversity is effective. When we use our best selection criterion, educational value, we improve in-context learning (ICL) performance on all 10 tasks by an average of 1.8% compared to uniform selection. Similarly, selecting data rich in facts & trivia, improves performance on 8 tasks by an average of 1.3%. Selecting based on writing style leads to the best perplexity but surprisingly does not lead to substantial improvements in downstream task performance. We explore leveraging the quality ratings to build a training curriculum. Our experiments show that models trained on data ordered based on required expertise outperform models which are trained on the same data in a random order.

We perform an extensive analysis of the quality ratings. For each domain, we study the distribution of ratings and report insights from inspecting high and low-ranking documents. Finally, we document the social impact of QuRating data selection by applying our method to documents annotated with social roles, topics, and geographical information in the AboutMe dataset (Lucy et al., 2024).

Our work demonstrates how intuitive notions about data quality can be used to effectively select training data at scale. We release our code, the GPT-3.5 outputs, the fine-tuned QuRater model and the annotated SlimPajama subset to encourage data exploration and efficient LLM training.

2. Background

We review some best practices in data engineering for language models and discuss them in relation to our approach.

Rule-based heuristics. Data selection pipelines commonly include hand-crafted heuristics that filter out low-quality data (Rae et al., 2021; Laurençon et al., 2022; TogetherAI, 2023; Soldaini et al., 2023). These typically involve thresholds on mean word length, stop word fraction, and word repetitions, e.g., the so-called C4 filters (Raffel et al., 2020) and the Gopher rules (Rae et al., 2021). While binary rules are useful for excluding noisy internet text, we need fine-grained ratings to identify the most desirable data.

Model-based heuristics. In heuristic classification (Brown et al., 2020), a bigram discriminator model selects data that resembles a high-quality target domain, such as Wikipedia articles. This paradigm has been widely adopted (Du et al., 2022; Gao et al., 2020; Chowdhery et al., 2023; Touvron et al., 2023a). In Data Selection with Importance Resampling (DSIR), Xie et al. (2023b) sample from generative models instead of discriminators, and show that this improves performance. We argue that an entire domain such as Wikipedia is an imprecise proxy for data quality. Another popular method is perplexity filtering (Wenzek et al., 2020; Muennighoff et al., 2023; Marion et al., 2023), i.e., choosing data that has high likelihood under a language model. However, we note that this includes data with simple and repetitive content, which is easy to predict for a model.

LLM quality signals. Most similar to our work, Gunasekar et al. (2023) filter data by querying GPT-4 to identify documents with "educational value for a student whose goal is to learn basic coding concepts". In contrast to our work, they augment filtered web data with synthetic data generated by LLMs. We study four quality criteria and use pairwise comparisons, which produce more stable rankings with GPT-3.5. Our work is also connected to Korbak et al. (2023), who incorporate human preferences into LM training and focus on toxicity and privacy. We select data with the goal of teaching language models strong skills with fewer samples.

Deduplication. Deduplicating training data has become standard practice (Lee et al., 2022; Anil et al., 2023; Touvron et al., 2023a), as it improves language models by removing repeated training data and boosting sample diversity. Deduplication is usually done in a fuzzy or semantic manner (Jiang et al., 2023; Abbas et al., 2023; Tirumala et al., 2023). While it reduces the number of documents in a corpus, it is not well-suited to sample a subset of a specific size. Rather, it should be run before selecting data based on quality.

Figure 2. We consider a pair of texts and report the judgments we elicit from GPT-3.5 as to which text it prefers, using different prompts that correspond to different qualitative criteria. We also report the quality ratings which we ultimately use for data selection. These ratings are given by our QuRater model, which is trained to assign ratings that best correspond to pairwise judgments.

3. Quantifying Qualitative Aspects of Text

We develop a method which can directly capture human intuition about data quality and leverage it for scalable data selection. We obtain fine-grained quality signals without having to craft heuristic rules or select proxy domains.

3.1. Overview of the Method

We associate a *quality criterion* with a question that asks which of two pieces of text (t_A, t_B) exhibits a certain quality to a higher degree. We record the probability $p_{B\succ A}$ with which a judge chooses B over A. In this paper, we sample pairs of texts from a vast collection of documents and use a large language model (LLM) to judge them based on the criterion. Thus, we can rapidly create large datasets of judgments $\mathcal{J} = \{(t_i, t_j, p_{i\succ j})\}$.

We use the Bradley-Terry model (Bradley & Terry, 1952) to translate binary judgments into scalar quality ratings,

$$p_{B\succ A} = \sigma \left(s_B - s_A \right),$$

where σ is the sigmoid function, and the ratings are estimated using maximum-likelihood estimation. We parametrize the ratings with a so-called *QuRater* model $s_{\theta}(t_i)$, which is trained with the binary cross-entropy loss,

$$\mathcal{L}_{\theta} = \mathbb{E}_{(t_A, t_B, p_{B \succ A}) \in \mathcal{J}} \left[-p_{B \succ A} \log \sigma \left(s_{\theta}(t_B) - s_{\theta}(t_A) \right) - (1 - p_{B \succ A}) \log \sigma \left(s_{\theta}(t_A) - s_{\theta}(t_B) \right) \right].$$

This parallels the training of reward models in Reinforcement Learning from Human Feedback (RLHF) (Ouyang et al., 2022) without conditioning the models on user input.

3.2. Choice of Criteria and Prompts

Which abstract qualities of text are most deserving of study? We argue that the most interesting criteria (1) are applicable to a wide variety of text, (2) require a deeper understanding of a text's content, which cannot easily be derived from surface features, (3) result in fine-grained rankings with few ties, (4) are complementary to each other. After exploring different candidates and iterating on their prompts, we choose the following four questions as our criteria:

- Which text has a more polished and beautiful writing style? We use "style" to emphasize the writing over the subject matter. In our exploration, "beautiful" and "polished" favor literary and academic writing, respectively.
- Which text contains more facts and trivia? Prefer specific facts and obscure trivia over more common knowledge. Inspired by LLMs' potential applications as knowledge bases (Petroni et al., 2019), we aim to identify texts that have a high density of long-tail factual knowledge. We find that adding "trivia" helps the LLM choose facts about niche topics and fictional worlds.
- Which text has more educational value? E.g., it includes clear explanations, step-by-step reasoning, or questions and answers. Following Gunasekar et al. (2023), we prompt for educational value and specify some properties that are considered particularly valuable for inducing reasoning capabilities in LLMs, e.g., "step-by-step reasoning" resembles Chain-of-Thought prompting (Wei et al., 2022; Kojima et al., 2022).
- Which text requires greater expertise and prerequisite knowledge to understand it? It is interesting to study how the difficulty level of the training corpus affects model capabilities. We also explore designing a training curriculum based on this criterion.

We show how these prompts act on two contrasting texts in Figure 2. The full prompts can be found in Appendix A.

Prompt validation. As quality judgments are ultimately subjective, we evaluate the prompts on clear-cut cases. For each criterion, we curate two sets of 40 documents from the web with clear differences in quality. We describe the specific constitution of this dataset in Table 4 in the appendix. We choose GPT-3.5-turbo-0613 as the LLM judge and evaluate the agreement with our preferences on 1600 document pairs. Using our prompts, GPT-3.5 agrees with our preferences over 97% of the time on all the criteria except *facts & trivia*, on which we achieve 92% agreement.

3.3. Why Use Pairwise Comparisons?

Previous work explores using LLMs to judge individual texts (Gunasekar et al., 2023). We observe that LLMs are better at comparing texts than they are at judging individual texts; specifically, they produce more reliable judgments in pairwise settings, and can better discriminate between texts with fine variations in quality.

In a case study, we rank 10 documents (see Table 5 in Appendix A) based on the authors' collective perception of their *writing style*. We use this ranking to study the LLM's ability to measure subtle gradations in quality. We ask GPT-3.5 to (1) rate the documents' *writing style* on a 1 to 10 scale or (2) make pairwise judgments for all pairs of these 10 documents. We evaluate the Kendall tau rank coefficient with our human judgment on all 45 pairs of documents and find that with GPT-3.5 achieves 0.79 ± 0.01 in the pairwise setting, compared to 0.61 ± 0.06 for individual judgments, where we compute standard deviations over 3 runs.

Pairwise judgments are usually easier to verify for human annotators, while it is difficult to assess the correctness of the precise grade assigned to a document. Research in psychology and education suggests that pairwise judgments improve human self-consistency and inter-annotator agreement (Thurstone, 1927; Pollitt, 2012); and have been found to be useful in the specific setting of evaluating essays (Pollitt & Crisp, 2004; Lesterhuis et al., 2022). In machine learning, pairwise comparisons have been used in assessing LM outputs (Ouyang et al., 2022; Dubois et al., 2023; Zeng et al., 2024) and in information retrieval (Gienapp et al., 2022; Sun et al., 2023; Qin et al., 2023).

3.4. Training the QuRater Model

Having settled on criteria and prompts, we produce a large-scale dataset of criterion-wise judgments on 250K text pairs by querying GPT-3.5-turbo-0613. For each text pair, we prompt the LLM in both (t_A,t_B) and (t_B,t_A) order, and produce multiple generations, which we average to compute the overall confidence $p_{B \succ A}$. This counteracts

the positional bias observed in pairwise comparisons with LLMs (Wang et al., 2023; Zeng et al., 2024).

The dataset is derived from 500K unique documents in SlimPajama (Soboleva et al., 2023), a web-scale pre-training corpus based on RedPajama (TogetherAI, 2023). For each pair of documents, we extract snippets of at most 512 Llama tokens (Touvron et al., 2023a). Specifically, 200K pairs are sampled randomly across all domains, and an additional 10K pairs are sampled within each of the five specialist domains Wikipedia, Book, StackExchange, Github, ArXiv. In Appendix B, Table 6 shows that we obtain many confident LLM judgments across domains, and Figure 5 shows that the judgments are not strongly correlated between criteria.

We fine-tune a 1.3B parameter Sheared-Llama model (Xia et al., 2023) on the dataset of pairwise LLM judgments. We employ a multi-task setup with separate regression heads for different criteria, which allows efficient prediction of multiple quality criteria in one forward pass. In Appendix B, we discuss the training setup in detail and show that the QuRater model has over 93% accuracy on held-out judgments.

4. Selecting Data By Quality Rating

Our goal is to select a subset of documents from a largescale corpus. We introduce the following framework for sampling according to quality ratings.

Let each document d_i in a corpus \mathcal{D} be annotated with a quality rating s_i , assigned by the QuRater model. We sample documents without replacement according to,

$$p(d_i) \propto \exp\left(\frac{s_i}{\tau}\right),$$

normalized over the corpus \mathcal{D} . This sampling scheme implicitly changes the language modeling objective to reward-weighted regression (Korbak et al., 2023; Peters & Schaal, 2007). We sample without replacement following Xie et al. (2023b), as it increases sample diversity and also allows for efficient sampling via the Gumbel top-k trick (Kim et al., 2016; Kool et al., 2019; Vieira, 2014).

The temperature term τ controls the sample diversity. As $\tau \to 0$, this strategy becomes top-k selection, the most straightforward approach of incorporating quality signals. At $\tau \to \infty$, it is equivalent to the uniform sampling baseline.

Quality ratings as rewards. In Appendix C, we show the quality ratings are connected to rewards in Reinforcment Learning from Human Feedback (RLHF) (Ouyang et al., 2022; Rafailov et al., 2023) when using this sampling strategy. For large enough sample sizes, our method approximates pre-training a language model on a random subset of the dataset, and then using RLHF to steer the language model towards generating documents with higher quality

ratings. The temperature τ becomes the weight of the KL-divergence term in the RLHF objective, constraining the RLHF model to be similar to the pre-trained model. Unlike the typical rewards used in RLHF, the quality ratings are not conditioned on user input and should serve a different purpose: to guide the model towards data from which it can learn generalizable skills (Arora & Goyal, 2023; Yu et al., 2024) and useful world knowledge (Li et al., 2023).

Curriculum from quality ratings. Sampling without replacement naturally leads to a training curriculum. In regular language model training, the examples are randomly shuffled after data selection. However, if we train on examples in reverse order in which they were sampled, examples with low quality ratings are more likely to be appear at the start of training and highly-rated examples towards the end of training. This is particularly interesting when there is sufficient budget to train on the entire corpus \mathcal{D} .

5. Experiments

We verify the QuRating approach in practice by training language models from scratch.

5.1. Setup

QuRatedPajama. We annotate a 260B token corpus with quality ratings across our four criteria—using the QuRater model from Section 3.4—to produce QuRatedPajama. The corpus is a subset of documents from SlimPajama (Soboleva et al., 2023), an extensively deduplicated version of RedPajama (TogetherAI, 2023), and consists of sequences of 1024 tokens using the Llama tokenizer (Touvron et al., 2023a). Since the QuRater model was only fine-tuned on short sequences, we compute the document-level quality rating by averaging over contiguous segments of up to 512 tokens weighted by their segment length. While the annotation process is expensive (equivalent to 514 NVIDIA H100 hours), it can be massively parallelized, and the resulting quality ratings can serve many purposes, e.g., data selection, curriculum training or data discovery.

Training. Using different data selection methods, we select a subset of 30B tokens from QuRatedPajama and train a randomly initialized language model on this training set for one epoch in a randomly shuffled order. The models have 1.3B parameters and use a transformer architecture (Vaswani et al., 2017) with RoPE embeddings (Su et al., 2024). Further details can be found in Appendix D. We train on slightly more data than the compute-optimal amount (Hoffmann et al., 2022). However, a larger number of training tokens should give a clearer signal regarding data quality.

Evaluation. We aim to provide a holistic evaluation of the

language models trained on 30B tokens:

- We measure the perplexity over 50M tokens from SlimPajama's random validation split. We report both overall perplexity and perplexity on each of the source domains.
- We evaluate the in-context learning (ICL) performance using lm-evaluation-harness (Gao et al., 2021). We study a wide range of tasks, covering reading comprehension (ARC-easy/challenge (Clark et al., 2018), SciQA (Welbl et al., 2017), LogiQA (Liu et al., 2020), BoolQ (Clark et al., 2019)), commonsense reasoning (HellaSwag (Zellers et al., 2019), PIQA (Bisk et al., 2020), WinoGrande (Sakaguchi et al., 2021)), and knowledge-intensive tasks (NQ (Kwiatkowski et al., 2019), MMLU (Hendrycks et al., 2021)). We choose the number of fewshot examples per task depending on the length of the demonstrations to ensure that all examples fit within the context window of 1024 tokens.
- We evaluate the instruction-following capabilities of our models, borrowing the setting used by Xia et al. (2023).
 We perform supervised fine-tuning on 10,000 instructionresponse pairs from the ShareGPT dataset. We evaluate on another 1,000 instructions and use the AlpacaFarm codebase (Dubois et al., 2023) to judge the responses from two models with GPT-4.

5.2. Data Selection Methods

In each experiment, we sample a 30B-token training dataset from QuRatedPajama. We compare the following methods:

- Sample with QuRating: For each of the four criteria, we sample according to the quality ratings as described in Section 4. We normalize the variance of the quality ratings to be 1 and then sample with temperatures τ ∈ {0.0 (i.e., top-k selection), 1.0, 2.0}.
- Inverse sampling: As a control study, we repeat the above procedure with transformed quality ratings $s_i \to -s_i$ to select the lowest-rated documents.
- Mix of criteria: We explore the setting of merging the QuRating-sampled data for $\tau=2.0$ for the four criteria, and subsampling it randomly to 30B tokens, while taking care to exclude duplicate documents.
- *DSIR*: We apply data selection with importance resampling (DSIR) (Xie et al., 2023b) and select examples that resemble either English Wikipedia or the Book domain (TogetherAI, 2023)—commonly used as proxies for quality (Brown et al., 2020; Touvron et al., 2023a; Xie et al., 2023b). We follow Xie et al. (2023b) and train hashed bigram models on QuRatedPajama and the target data.
- *Uniform*: We select randomly with a uniform probability across documents, equivalent to $\tau \to \infty$.

Table 1. QuRating improves average few-shot in-context learning (ICL) results when sampling with temperature $\tau=2.0$. The number of demonstrations (shown in parentheses) varies by task depending on the overall prompt length. We report accuracy for all tasks, except for NQ, where we report EM, and highlight the best result in each column. The results for all models can be found in Table 10 in Appendix D. Abbreviations: HellaSw. = HellaSwag, W.G. = WinoGrande.

QuRating: r	QuRating: mix of criteria											

For all experiments, we select a proportionate amount of data from each subdomain in SlimPajama. We leave it to future work to combine QuRating with methods that optimize the domain mixture (Xie et al., 2023a).

5.3. Results

We report the perplexity of the models in Table 2, the ICL results in Table 1, and the instruction following evaluation in Figure 3. The full set of results can be found in Appendix D.

Figure 3. Instruction following win rates of models trained with QuRating ($\tau=2.0$) vs. uniform data selection after instruction fine-tuning on 10K ShareGPT examples.

Sampling is better than top-k selection. Selecting only the top-k documents for training a language model results in substantially worse perplexity and severe performance drops in many ICL tasks. This suggests that the best-rated documents do not have good coverage of the overall text distribution. Our sampling strategy is effective at alleviating this, and typically leads to gains across many ICL tasks. Increasing sample diversity further with a temperature of $\tau=2.0$ improves perplexity over uniform sampling, despite the shift between the train and test distribution.

Choice of criterion. Selecting data with good writing style yields the lowest perplexity, but surprisingly, the smallest improvements in ICL performance. The model trained with high educational value shows the most consistent gains on ICL, and with $\tau=2.0$ improves on uniform sampling on every single task. It is the only model that gives a clear win rate of 57.3% against the uniform model after instruction tuning in Figure 3. Facts & trivia and required expertise improve ICL performance on average, and provide substantial gains in reading comprehension and world knowledge

tasks, but perform worse at commonsense reasoning. In our control experiments, in which we sample from the lowest quality ratings, no criterion leads to meaningful ICL improvements on average. However, selecting documents low in *facts & trivia* or *required expertise* benefits all 3 commonsense tasks, see Table 10 in the appendix.

Mix of criteria. Mixing the selected subsets across criteria results in the lowest perplexity overall. While this approach leads to better average ICL performance than baselines, it does not outperform selection using only *educational value* or *facts & trivia*. This may be since 25% of the data is selected based on *writing style*, our worst performing criterion. We are optimistic that future work may find more effective ways of combining criteria.

5.4. Curriculum Learning

Setting. We train two additional models on the 30B token dataset created with uniform selection. However, we change the order in which samples are seen during training based on *required expertise*. Specifically, we use our sampling method (Section 4) with temperature $\tau=2.0$, and train on data in the same order in which it was sampled (high \rightarrow low expertise), or in the reverse order (low \rightarrow high expertise). This explores whether quality ratings are useful in forming a curriculum without changing the set of training examples.

Results. The evaluation results for perplexity and ICL are included in the appendix in Tables 9 and 10 respectively. We find that, even when training on the same set of examples, quality ratings are still useful for improving performance, compared to training with a randomly permuted sample order. Both the curriculum of low-to-high expertise and its reverse improve average ICL performance by 0.6% and 0.5% respectively, with strong performance in different tasks. However, only the curriculum of increasing expertise improves perplexity on held-out data.

6. Analysis of Quality Ratings

Understanding the nature of quality ratings on a such a vast amount and variety of data is challenging. We begin by studying the distribution of ratings across domains, as well as across unsupervised clusters when domains are too coarse. We then inspect raw documents across these distributions and discuss our observations. Lastly, we document the social, topical, and geographical biases of our approach by applying it to the AboutMe dataset (Lucy et al., 2024).

6.1. Distribution of Quality Ratings

We sample 1M sequences from QuRatedPajama and visualize the normalized quality ratings across the different

Figure 4. Distribution of quality ratings per domain, normalized for each criterion to have zero mean and unit standard deviation.

RedPajama domains (TogetherAI, 2023). CommonCrawl and C4 constitute the majority of training data, but lack interpretable metadata. We therefore leverage techniques in unsupervised domain discovery. We follow Gururangan et al. (2023) and implement k-Means clustering with k=25. We name the clusters by the most salient TF-IDF terms at the cluster centroids.

In Figure 4, we plot the distribution of quality ratings across the Wikipedia, Book, StackExchange, Github and ArXiv domains. The results align with expectations: The Book domain has high ratings for *writing style*; a subset of Wikipedia is particularly rich in *facts & trivia*; ArXiv requires particularly high *expertise*. However, each domain contains a wide range of ratings, suggesting that it would be sub-optimal to select data by simply picking domains, e.g., all domains contribute towards the overall top 5% of documents in terms of *educational value*.

We visualize the distributions for the cluster in Common-Crawl and C4 in Figure 7 in the appendix. They are similarly encouraging, e.g., the clusters associated with *cells*, *protein*, *gene* and *energy*, *climate*, *species* are rated highly on *required expertise*, *educational value*, and *facts* & *trivia*. Meanwhile, the *book*, *author* cluster tends to obtain high ratings in *writing style*. However, almost all clusters encompass a wide range of quality ratings.

Comparison to perplexity filtering. We compare sequence-level log-likelihood scores from Llama-2-7b (Touvron et al., 2023b) with the quality ratings across 1M training sequences and visualize the relationship in Figure 8 in the appendix. We observe that documents with low quality ratings have a wide range of likelihoods, and the Spearman correlation coefficient varies between 0.50 for *writing style* to -0.02 for *required expertise*. Therefore, QuRating is meaningfully

Table 3. We select 10% of the webpages in the AboutMe dataset by sampling from different quality ratings with temperature $\tau = 2.0$. We report the categories that are most/least retained (amplified/suppressed) in the selected data and report their retention rates in %.

different from selecting texts based on perplexity scores from a strong LLM (Marion et al., 2023).

6.2. Data Inspection

We study raw documents from each of the domains and clusters discussed in Section 6.1. We select training examples at the 5th, 30th, 70th and 95th percentile for each criterion, and feature random extracts in Appendix F without any cherrypicking. While this is a minute sliver of the training data, the documents still exhibit clear qualitative differences and we invite the reader to inspect them in the appendix.

Behavior on code. Table 15 shows text extracts at different quality percentiles for each of the four criteria on documents from Github. Although not designed for code, the quality ratings correlate with reasonable traits. We notice writing style and facts & trivia prefer code with comments and documentation; required expertise ranks a CSS stylesheet lowest and embedded system code highest. The document with the 95th percentile educational value rating is a markdown explaining Ruby string manipulation in Spanish. We also highlight that in the StackExchange domain (Table 14), the lower-ranked documents include convoluted stack traces, logs, XML, HTML, and CSS documents, while higher-ranked documents contain a mix of code and natural language.

Preference for English. While there are high-ranking documents in non-English languages (e.g., the abovementioned Ruby tutorial), we observe a bias towards English across domains. This manifests most clearly in the Wikipedia domain (see Table 12), which is relatively rich in non-English text. We investigate this observation more quantitatively in Appendix E, where we confirm that the QuRater model rates English data slightly higher on average. Since we explicitly instruct GPT-3.5 to ignore language in its judgements in

Section 3.2, this highlights the need for more sophisticated approaches to de-bias model judgements.

Educational shortcut. We notice a potential shortcoming in the model's understanding of the *educational value* criterion. Some highly-rated documents are *about* education-related topics (schools, universities, etc.) but not inherently educational; see Tables 29, 33 and 41. This may be remedied with a better prompt or a stronger judge like GPT-4.

6.3. Documenting Social Bias

We apply our data selection pipeline to the AboutMe dataset, (Lucy et al., 2024) which associates 10M webpages with geographic, topical, and social role metadata. Following a setting by the authors, we sample a 10% subset using QuRating with temperature $\tau=2$. We calculate retention rates by measuring what fraction of the total pages associated with a topic cluster, social role, or geographical region are retained in the 10% selected subset, where a rate higher or lower than 10% means that the attribute is *amplified* or *suppressed*, respectively. We report the most amplified and suppressed topics, roles, and regions in Table 3.

Compared to prior data selection methods studied by Lucy et al. (2024), we find that the retention rates for QuRating are slightly more balanced. However, sampling is important: In Table 11 in the appendix, we show that the retention rates are far exacerbated in all categories when using top-k selection. Our results share some common trends with prior methods, e.g., topics related to shopping websites—online, store and fashion, women, (brand)—are among the most suppressed across all quality criteria; Lucy et al. (2024) make a similar observation.

We observe that the most amplified attributes reflect the quality criteria: Topics selected with high expertise (research,

law, technology, medical, software) are indeed widely considered to require specialized knowledge. Roles associated with research are amplified when we sample based on required expertise, facts & trivia, and educational value; roles associated with art and writing are amplified if we use the writing style ratings. We observe that documents associated with conventionally female roles (mommy, cosmetologist, beauty therapist, hairstylist) are suppressed across methods. The role of rapper is suppressed when selecting for writing style, suggesting a bias against vernacular language.

The geographical trends are less pronounced. We observe that selection based on *writing style* exhibits a mild preference towards websites from Europe and against websites from Asia. The criteria *facts & trivia* and *required expertise* retain a slightly higher proportion of websites from Western and Eastern Europe, Central Asia and Northern Africa.

We agree with Lucy et al. (2024) and Dodge et al. (2021) that it is important to study the effect of data filtering on social and geographical representation. The impact on the resulting language models is not well documented yet, but may be understood in terms of representational and allocative harms (Barocas et al., 2017; Suresh & Guttag, 2021), and potential manifestations include stereotyping (Caliskan et al., 2017; Manzini et al., 2019; Tan & Celis, 2019; Abid et al., 2021), erasure (Dev et al., 2021), or simply a lack of performance in relevant tasks not considered in traditional benchmarks. We note that web-scraped datasets are already immensely skewed in terms of their social and geographical factors, e.g., by ease of internet access (Bender et al., 2021), and creating a taxonomy of social factors is difficult (Blodgett et al., 2020). Given the broad coverage of web-scale data and the wide range of LLM applications, the question of what would constitute a fair pre-training distribution remains important and up for debate.

7. Conclusion

Training corpora for state-of-the-art language models are becoming increasingly large, such that there are concerns that models may run out of data (Muennighoff et al., 2023). However, under resource constraints, informed data selection with QuRating is an avenue for improving language models. However, future work is necessary to study and reduce social and cultural biases inherent in data selection. To facilitate further research, we release the pairwise judgements, the resulting QuRater model, the language model checkpoints and the annotated QuRatedPajama.

Impact Statement

Language models are increasingly applied in real-world scenarios, and their behavior is inextricably linked to their training data. Data selection may help produce models at lower computational costs, reducing the environmental footprint of model training (Strubell et al., 2019; Lacoste et al., 2019; Patterson et al., 2021), and allowing organizations with relatively fewer resources to train stronger models. Our experiments are still expensive to reproduce, as each training run takes an equivalent of 200 NVIDIA H100 GPU hours. By studying a set of intuitive qualities as the basis for data selection, our work also sheds light on the relationship between pre-training data and model capabilities.

A number of harmful behaviors of language models trained on large-scale web data are well documented, including exhibiting social biases (Nadeem et al., 2021; Abid et al., 2021) and producing toxic generations (Gehman et al., 2020). We study which social, linguistic, and geographical biases are inherent in our data selection method in Section 6.3 to promote transparency. Future research is necessary to study the effect of such biases. We recommend that in practice, QuRating should be combined with manual curation of certain languages and topics, and the resulting models should be carefully evaluated for biases before wider deployment.

Acknowledgements

We thank Luca Soldaini for their generous insights about evaluating data decisions. We are grateful to Mengzhou Xia and Tianyu Gao for their advice on experimental details. We also thank Carlos E. Jimenez, Tanya Goyal, Paul Röttger, Alexis Chevalier, Sanjeev Arora, Zirui Wang and Jiatong Yu for helpful discussions and feedback. We thank Shreyan Puri for contributing validation data. A. Full Prompts

Our full prompt templates are shown below, where the criteria on the right are substituted for {criterion} on the left. We settled on these prompts via a heuristic and iterative process, in which we varied the prompt wording and observed trends on a few examples from SlimPajama (Soboleva et al., 2023). Throughout this project, we used GPT-3.5-turbo, as we decided that it was too expensive to collect large-scale annotations with GPT-4. We believe that future work should take a more principled approach and first curate a high-quality dataset for prompt refinement.

We observe better performance with a short and generic system response, namely You are a helpful assistant. than describing a personality with expert skills in all subjects. The effect of different personalities on the subjective judgements in our data selection method is an interesting avenue for future work.

To validate our prompts, we handpick 40 documents from the web that correspond to what we believe should be either highly and poorly rated documents for each criterion. Note that we do not use these data points for prompt refinement. We report the data sources of this dataset in Table 4 below. Our prompts achieve 97.6% agreement for *writing style*, 91.9% agreement on *facts & trivia*, 98.2% agreement for *educational value* and 98.5% agreement for *required expertise*.

We add additional instructions that the judgement should not be influenced by the languages present in the texts, the length of the texts—although for the final dataset we compare texts with the same number of tokens—and the order in which the texts are presented. However, these instructions do not suffice to overcome these biases. For example, we observe that GPT-3.5-turbo still exhibits positional bias.

Prompt Template

Compare two text excerpts and choose the text
which {criterion}

Aspects that should NOT influence your judgement:

- 1. Which language the text is written in
- 2. The length of the text
- 3. The order in which the texts are presented

Note that the texts are cut off, so you have to infer their contexts. The texts might have similar quality, but you should still make a relative judgement and choose the label of the preferred text.

```
[Option A]
... {text_a} ...
[Option B]
... {text_b} ...
```

Now you have to choose between either A or B. Respond only with a single word.

Writing Style

has a more polished and beautiful writing style.

Facts & Trivia

contains more facts and trivia. Prefer specific facts and obscure trivia over more common knowledge.

Educational Value

has more educational value, e.g., it includes clear explanations, step-by-step reasoning, or questions and answers.

Required Expertise

requires greater expertise and prerequisite knowledge to understand it.

Table 4. For each of our criteria, we curate 40 documents that exhibit particularly strong or weak qualities. We use this data for prompt tuning and validating model performance. This table gives a description of the sources of documents in this validation set. Examples with citations come from existing NLP datasets.

Criterion		Sources
Writing Style	High	11 featured Wikipedia articles, 10 fiction books, 8 academic papers, 6 famous speeches, 3 Supreme Court decisions, 2 Shakespeare texts
	Low	10 Yelp reviews (Zhang et al., 2015), 10 spam messages (Almeida & Hidalgo, 2012), 10 tables/lists, 5 Amazon product reviews, and 3 Enron spam e-mails (Metsis et al., 2006)
Facts & Trivia	High	21 niche Wikipedia articles, 12 fun fact lists, 7 IMDb trivia sections
	Low	15 Wikipedia summaries of Pixar movies, 15 books (Gao et al., 2020), 5 poems, 5 textbook explanations
Educational Value	High	13 Khan Academy explanations (across subjects), 8 science textbooks, 6 history textbooks, 5 high-level Wikipedia articles
	Low	10 reality TV transcripts, 10 fantasy/sci-fi books, 10 niche Wikipedia articles, 7 gossip news posts, 3 obscure WikiHow articles
Required Expertise	High	15 Wikipedia articles, 12 technical academic papers, 9 advanced textbook excerpts, 4 patents/laws
	Low	10 WikiHow articles, 10 Children's books, 5 nursery rhymes, 5 miscellaneous how-to articles

Table 5. We handpick a list of 10 documents from various sources and present a ranking which, in the authors' view, reflect steady decreases in writing style, allowing us to test the nuance of LLM judgments.

Rank	Text	Description
1	Amory Blaine inherited from his mother every trait, except the stray inexpressible few, that made him worth while. His father, an ineffectual, inarticulate man with a taste for Byron and a habit of drowsing over the Encyclopedia Britannica, grew wealthy at thirty through the death of two elder brothers, successful Chicago brokers, and in the first flush of feeling that the world was his, went to Bar Harbor and met Beatrice O'Hara. In consequence, Stephen Blaine handed down to posterity his height of	F. Scott Fitzgerald's This Side of Paradise
2	Technologies for making and manipulating DNA have enabled advances in biology ever since the discovery of the DNA double helix. But introducing site-specific modifications in the genomes of cells and organisms remained elusive. Early approaches relied on the principle of site-specific recognition of DNA sequences by oligonucleotides, small molecules, or self-splicing introns. More recently, the site-directed zinc finger nucleases (ZFNs) and TAL effector nucleases (TALENs) using the principle of site-specific	CRISPR-Cas9 paper abstract (Doudna & Charpentier, 2014)
3	The winter of 1906-07 was the coldest in Alberta's history and was exacerbated by a shortage of coal. One cause of this shortage was the strained relationship between coal miners and mine operators in the province. At the beginning of April 1907, the Canada West Coal and Coke Company locked out the miners from its mine near Taber. The same company was also facing a work stoppage at its mine in the Crow's Nest Pass, where miners were refusing to sign a new contract. The problem spread until by April	featured Wikipedia article
4	On December 3, Venezuela held a controversial referendum over a claim to the oil-rich Essequibo region controlled by Guyana. That same day, the Vice President of Venezuela, Delcy Rodríguez, shared a video on X, formerly Twitter, showing a group of Indigenous people lowering a Guyanese flag and hoisting a Venezuelan flag in its stead over the territory, which is also known as Guayana Esequiba. 'Glory to the brave people!' she wrote, which is the first line of the country's national anthem. The post came	Bellingcat news article (Ramalho, 2023)
5	The Godfather is one of the most praised movies in cinema history. It gives everything that critics and audiences alike ask for in movies. In my opinion it gets all the attention it gets for being one of, or the best movies ever. One of the best things The Godfather does is its incredible casting and its iconic performances from each and every one of its characters. The actors are so convincing that it won the movie several academy awards. It also jumpstarted several actors, acting careers, and gave an	IMDb movie review
6	The food is good, but not a great value. Up front, I will just say, do not waste your time getting traditional sushi here because tbh it's not really that much better. For example, we ordered some maki and nigiri and while it was good, it wasn't that much better than our fave sushi places. Instead, come here for their signature dishes and you'll probably be happier. We really enjoyed some of their signature dishes. We dined as a party of 4 and we had: Spicy edamame: tasty and spicy! Yellowtail	yelp restaurant re- view
7	My Father worked for a Forbes 500 company since the 70s. Moved up the ranks as a software engineer and management, has patents for the company that saved it millions of dollars. He's almost to pension age and suddenly HR starts making his life miserable. He noticed this trend was happening to some of his coworkers when they were getting close to age 60 as well. HR Lady calls him into the office and says that he was not punching in and out at the correct time. My Father, an engineer, is very very	reddit post
8	THE ADVENTURE OF LINA AND HER ADVENTUROUS DOG SHERU Lina was a normal girl like any girl. She lived in the hills. She went to the top of the hills and she looked behind a special bush under the rearest of pine trees. She saw many pines behind it, but when she moved the pines she found a large piece of paper in which something was writen. Lina, Lina said her mother. GET UP!!You're late for school!!Oh mom!I'm too tired. Come on you have to go, no arguements. Lina was from a rich family. She lived in Los Anjilous	childhood composi- tion by friend of au- thor

B. QuRater Model Training

B.1. Dataset

We use GPT-3.5-turbo to generate 20 predictions of either "A" or "B" for a criterion and a pair of documents in either order. When we conducted this work, we did not have access to the logits of the model, and therefore reconstruct the model confidence through multiple generations. We prompt the LLM for each criterion separately, as we observed in our exploration that performance deteriorated when querying for all criteria together.

We also observe that GPT-3.5-turbo struggles to be decisive when queried with a pair of long documents, i.e., it reverts to choosing the document purely based on positional bias. We tackle this problem by only ranking pairs of short text snippets. Specifically, we randomly extract segments of n tokens (with respect to the Llama tokenizer (Touvron et al., 2023a)) for each pair, where n is chosen randomly according to $n \sim \text{Uniform}[256, 512]$ in half of cases and n = 512 otherwise.

Table 6 shows the statistics after querying with 250K pairs. Note that we only obtain judgements on the English subset of Wikipedia, instead of all the languages present in the Wikipedia split of RedPajama (TogetherAI, 2023). For a small subset of queries, we do not obtain predictions, as they are blocked by OpenAI and Azure content filters. The cost for creating this dataset was \$2820.

Figure 5 shows that while GPT-3.5-turbo predictions are all positively correlated, the Pearson correlation coefficients are less than 0.6, and therefore will differ on many documents. The correlations are typically in the range of 0.45-0.55, except between *required expertise* and *writing style*, which have a correlation of 0.29.

Table 6. Statistics of the qualitative choices generated by GPT-3.5-turbo. While we query with 250K pairs, we do not obtain labels for a small subset due to OpenAI and Azure content filters. The confidence margin for a prediction between (t_A, t_B) is defined as $|p_A - p_B| = |2p_{B \succ A} - 1|$.

Figure 5. Pearson correlation coefficients between our criteria for predictions made by GPT-3.5-turbo.

B.2. Training

We fine-tune QuRater models using Sheared-Llama-1.3B (Xia et al., 2023), a pruned version of Llama-2-7B (Touvron et al., 2023b). We only train and evaluate on judgements that have a confidence margin of at least 50%, where the confidence margin is defined as $|p_A - p_B| = |2p_{B \succ A} - 1|$ for a prediction between (t_A, t_B) , since non-confident predictions contain little signal on data quality, and can be caused by GPT-3.5-turbo's positional bias. Table 6 shows the effect of this filtering on dataset statistics. We use a random 10% of the dataset as a held-out validation split for early stopping and hyperparameter selection. For early stopping, we choose based on held-out accuracy averaged across all criteria.

We search over the following hyperparameter grid: learning rate $\in \{2 \times 10^{-5}, 5 \times 10^{-5}\}$, number of epochs $\in \{2, 4\}$, batch size of 512. Model selection is based on which model achieves the best validation examples on the criterion with lowest performance overall. The selected model was trained with a learning rate of 5×10^{-5} and is trained for 2 epochs.

In Table 7, we report accuracy on the validation set, as well on specially procured test sets of 1,428 pairs of texts from specific domains. We confirm that performance increases when evaluating only on confident GPT-3.5-turbo's judgements, where *educational value* is the hardest category to predict. Finally, we compare to separately fine-tuned models and model trained from a random initialization. Multi-task fine-tuning usually gives comparable or better performance, and a pre-trained initialization helps substantially in this task.

Table 7. We compare held-out accuracy of training a multi-task QuRater model vs. training separate QuRater models. The multi-task QuRater model is trained with separate prediction heads per criterion. We also show an ablation where we train the QuRater model from scratch instead of initializing with Sheared-Llama-1.3B (Xia et al., 2023). During the evaluation, we only predict on text pairs with confident judgement labels, i.e. a confidence (conf.) margin (defined as $|p_A - p_B| = |2p_{B \succ A} - 1|$) greater than 50% or 80%.

C. Connection of Exponential Sampling to RLHF

In RLHF (Ouyang et al., 2022), a language model p(y|x) is fine-tuned to produce outputs y given inputs x that maximize a reward r(x,y) subject to a relaxed KL constraint with respect to a reference language model $p_{ref}(y|x)$,

$$p^*(y|x) = \underset{p}{\arg\max} \underset{y \sim p(\cdot|x)}{\mathbb{E}} \left[r(y) - \tau \log \frac{p(y|x)}{p_{\text{ref}}(y|x)} \right]$$

Typically, the rewards encourage the model to act in a helpful and harmless manner (Bai et al., 2022).

It can be shown that this admits the closed-form solution (Korbak et al., 2022b; Rafailov et al., 2023; Go et al., 2023; Korbak et al., 2022a)

$$p^*(y|x) = \frac{1}{Z(x)} p_{\text{ref}}(y|x) \exp\left(\frac{r(x,y)}{\tau}\right).$$

Consider the following setting: (1) we use the QuRater model s(y) as reward model not conditioned on any user input, (2) the reference model is a language model $p_{\mathcal{D}}(y)$ pre-trained on a corpus \mathcal{D} . In that case, we write the optimal policy as:

$$p^*(y) = \frac{1}{Z} p_{\mathcal{D}}(y) \exp\left(\frac{s(y)}{\tau}\right).$$

We compare this optimal model with the model obtained from maximum log-likelihood optimization (i.e. language model training), where a document y is resampled with a probability $\propto \exp\left(\frac{s(y)}{\tau}\right)$. Let $\hat{p}_{\mathcal{D}}(y)$ be the underlying data distribution of the training corpus \mathcal{D} , resulting in the weighted cross-entropy objective,

$$\arg\max_{p} \sum_{y} \exp(s(y)/\tau) p_{\mathcal{D}}(y) \log p(y),$$

which in practice is approximated via MonteCarlo sampling and importance resampling with the exponential quality ratings. The optimal model to this objective is $\hat{p}_{\mathcal{D}}(y) \exp\left(\frac{s(y)}{\tau}\right)$. Assuming \mathcal{D} is large and $p_{\mathcal{D}}(y)$ approximates $\hat{p}_{\mathcal{D}}(y)$ sufficiently well, the maximum likelihood solution to the resampled distribution will approximate the optimal policy p*(y).

In summary, our sampling strategy is equivalent to (1) training a language model on the entire dataset, and then (2) using RLHF to guide the language model towards generating documents with higher quality ratings.

D. Experimental Details

Each data selection method retains the original domain proportions between the RedPajama subsets. Table 8 shows the domain statistics of the 260B QuRatedPajama, from which we select 30B tokens using different data selection methods. QuRatedPajama is a curated subset of SlimPajama, which is itself a subset of RedPajama. Both SlimPajama and RedPajama are released on HuggingFace under the Apache 2.0 License.

Table 8. Number of sequences in the 260B token corpus from which we select data. The data is a subset of SlimPajama, where each document is processed into sequences of exactly 1024 tokens. Therefore, the proportion of domains is different from the raw SlimPajama.

Total	254,141,282	260,240,672,768	100.0

We use a global batch size of 2048 sequences and a learning rate of 5×10^{-4} with a cosine learning rate decay to 5×10^{-5} and a linear warmup for the first 5% of training steps. Each model is trained on 8x NVIDIA H100 and costs 200 GPU hours. We use a weight decay of 0.1 and train with Adam (Kingma & Ba, 2015) with hyperparameters $\beta = (0.9, 0.95)$. We train a 1.3B parameter transformer model with RoPE embedding (Su et al., 2024) and SwiGLU activations (Shazeer, 2020).

Detailed results. We feature the full perplexity results in Table 9, including the perplexity for each of the RedPajama subsets. Table 10 contains the ICL performance for all models. The performance of the curriculum models is featured at the top of the tables.

Table 9. Held-out per-token perplexity per RedPajama domain between language models trained on 30B tokens from different data selection methods. We highlight the best result in each column (before rounding). bottom-k and inv. denote inverse sampling, in which we sample documents with the lowest quality ratings. Abbreviations: HellaSw. = HellaSwag, W.G. = WinoGrande, exp. = expertise.

E. Further Analysis of Quality Ratings

We provide further details of the quality ratings on a random subset of 1M sequences from the 260B QuRatedPajama dataset. Table 8 shows the domain constitution of this dataset.

Quality ratings across clusters. Figure 7 shows the distribution of ratings of the C4 and CommonCrawl subset of RedPajama. Since this subset contains diverse data, we visualize by performing unsupervised clustering of TF-IDF features. Our method follows Gururangan et al. (2023), including using whole-word tokenization with a special placeholder for numbers. However, we do not enforce an balanced cluster assignments during the k-Means clustering and use k = 25. The resulting proportions of examples per cluster are also shown in Figure 7.

Correlation with log-likelihood. In Figure 8, we show correlations between the quality ratings and log-likelihood scores assigned by Llama-2-7B (Touvron et al., 2023b). We observe no clear correlations, with the exception of *writing style*, which has a Spearman correlation coefficient of 0.50.

Quality ratings across languages. We study how ratings are distributed across different languages by considering trends for the top 10 languages in the 1M sequences in our analysis subset. We identify sequence languages using the fasttext-language tect Python library (https://github.com/zafercavdar/fasttext-languagetect), a wrapper for Facebook's fastText language identification models (Facebook, 2016; Joulin et al., 2016; Bojanowski et al., 2017). We observe that

English comprises the overwhelming majority of our dataset, which is unsurprising given that we annotate a subset of the SlimPajama dataset (Soboleva et al., 2023), which is itself majority English. We find that English language data has the widest distribution of ratings, and that it also tends to have slightly higher median ratings compared to data from other languages. However, we observe that some languages do receive higher median ratings than English for some criteria; across criteria, sizable quantities of non-English data get ranked as high quality. We note that the QuRater appears to particularly penalize non-Latin scripts (usually expressed as Unicode characters); Russian and Ukrainian tend to have some of the lowest ratings across criteria, and receive particularly low writing style ratings.

AboutMe analysis. In an additional experiment, we repeat the analysis from Section 6.3 with top-k selection ($\tau=0$) in Table 11. While trends across categories are similar to selecting with $\tau=2.0$ in Figure 3, the retention rates are far more extreme across clusters and social roles. This highlights that $\tau=2.0$ improves sample diversity in practice, which empirically also results in improved downstream performance. In contrast, top-k selection has a far stronger tendency to select certain topics and qualities.

Figure 6. Distribution of quality ratings for the 10 most common languages in 1M documents randomly sampled from SlimPajama, normalized for each criterion to have zero mean and standard deviation.

Figure 7. Distribution of normalized quality ratings over clusters of 760K CommonCrawl and C4 training sequences.

Figure 8. Correlations of quality ratings and negative log-likelihood scores by Llama-2-7B(Touvron et al., 2023b) over 1M training sequences. The negative log-likelihoods are averaged over the number of tokens, and are the logarithm of the perplexity score of a single sequence. We observe that perplexity scores are not good approximations for any quality criteria.

Table 11. We select the top 10% of the webpages in the AboutMe dataset according to different quality ratings (top-k selection). We report the categories that are most/least retained (amplified/suppressed) in the selected data, and report their retention rates in %.

F. Inspecting Raw Documents and Ratings

Finally, we present snippets from raw documents for the Wikipedia, Book, Stack Exchange, Github and ArXiv subsets of SlimPajama in Tables 12-16; and documents from the clusters for C4 and CommonCrawl in Tables 17-41. The documents are taken at the 5th, 30th, 70th and 95th percentiles of quality ratings shown in Figures 4 and 7, respectively. We believe it is important to give an unfiltered view of the training data, and therefore do not filter these documents.

A small number of documents contain potentially sensitive content.

Table 12. Raw training examples selected to have quality ratings at the 5th, 30th, 70th and 95th percentile within Wikipedia. For each criterion, the ratings are normalized to have zero mean and unit variance across the corpus and reflect the distributions in Figure 4.

свою плоть, мог обращаться стол бом чёрного дыма и принимать облик других людей. (Он принимал облик Из абеллы, Кристиана Шепарда, Йеми, Па ука Медузы, Джона Локка и Алекс) « Человек в черном (XIX век) « Человек в черном пришёл на берег у статуи, г в черном пришёл на берег у статуи, де в это время завтракал Джейкоб. н увидел корабль на горизонте и ска зал, что знает, что их привёл Джейко б. Он сказал, что Джейкоб всё ещё пы тается доказать ему, что он не прав Он приводит людей на остров, и всег да это кончается одним. Потом он сп рашивает, знает ли Джейкоб, как сил ьно он хочет убить его. Получив утв ердительный ответ, он говорит, что когда-нибудь он найдёт лазейку. Пос ле этого он уходит. (Инцидент). Когд а «Чёрная скала» потерпела крушение на острове, и капитан начал убивать

... bbey Show in the 1970s until the 1990s. Kelly played the part of a culchie, "Gobnait O'Lúnasa", the sketches typically started with the sound of h im putting coins in an old freckle coin box, and w hen the phone rang and was answered, his words wer e, "Hello! Guess who? Is that you Nuala?" Kelly ac ted the part of an English BBC reporter interviewi ng rural inhabitants about local customs, such as watching bacon being sliced, or "ha-hooing" (shout ing a rebel yell) competitions. The village was ca lled Ballykilferret and described by the BBC man a s being in "the Republic of Eer-ah" (a mispronunci ation of Éire). « « Music career « In 1982, Kell y released a single, "Christmas Countdown", a come dy monologue based on the Christmas song "The Twe lve Days of Christmas" and credited to the pseudo vmic Gobnait O'Lúnasa. It reached number eight in the Irish Singles Chart in 1982, and peaked at num ber 26 in the UK Singles Chart and number 15 in Au stralia in 1984. « He performed the single live o Top of the Pops on 5 January of that year. The

hijo Absalón y fue posteriormente el instrume to para traer al rey Salomón al trono. Después de que se construvese el Primer Templo de Salomón en Jerusalén, Sadoc fue el primer Sumo sacerdote de I srael en servir allí. « « El profeta Ezequiel ens alza a los hijos de Sadoc como acércimos adversari os del paganismo durante la era del culto pagano, e indica su defensa de privilegios y deberes único s en el futuro templo. « « Biblia « La Biblia de clara que Sadoc era descendiente patrilineal de El eazar, el hijo de Aarón el sumo sacerdote. El lina je de Sadoc es presentado en la genealogía de Esdr as (su descendiente) como de la novena generación de descendencia patrilineal directa de Fineas, el hijo de Eleazar. o o Por orden cronológico, Sadoc es mencionado por primera vez como apoyo de David en Hebrón. Durante la rebelión de Absalón. Sadoc e s mencionado, cuando él y los levitas desearon aco mpañar el David en su huida para traer el Arca de la Alianza, pero el rey les ordenó quedarse en Jer usalén. donde le podrían hacer mejor servicio. de

blast, and cold-blast. Both hot-blast and cold blast designs are called tubular lanterns and are safer than dead-flame lamps, as tipping over a tub ular lantern cuts off the oxygen flow to the burne r and will extinguish the flame within seconds. « The earliest portable kerosene "glass globe" lan terns, of the 1850s and 1860s, were of the dead-fl ame type, meaning that it had an open wick, but the airflow to the flame was strictly controlled in upward motion by a combination of vents at the bottom of the burner and an open topped chimney This had the effect of removing side-to-side draft s and thus significantly reducing or even eliminat ing the flickering that can occur with an exposed flame. and Later lanterns, such as the hot-blast and cold-blast lanterns, took this airflow control even further by partially or fully enclosing the w ick in a "deflector" or "burner cone" and then cha nneling the air to be supplied for combustion at t he wick while at the same time pre-heating the air combustion. « « The hot-blast design. also kn

... at equity is required for a player to offer th e cube (offer to double the game's stakes)? a How is that calculated? We don't know whether the cube recipient will accept or not. e as question 1: The giver will double when his ex pected value of doubling is greater than his EV of not doubing (duh!). If \$EV(rolling)\$ is \$p-(1-p)\$, and \$EV(doubling)\$ is \$2p-2(1-p)\$, then ⊲ \$E(doubl ing) > E(rolling) \\ $\[= 2p-2(1-p) > p-(1-p) \\ \] \] p - .5$ <math>\[= 0 \]$ Which can't possibly be correct. While I'r not BG expert, I did used to play for (small amoun I got. How do we figure this out? a Thanks. a a A Let's assume that you and your opponent are mast er analysts, so both of you always know the equity exactly. It's a full-information game anyway. « I think the reason why you wouldn't double with a 51 % advantage is that after you double, you lose the right do double again, until your opponent has red oubled. @ If you double with a 51% advantage, the

of harmonic functions in \${\mathbb{{{R}}}}}^{{ {2}}}\$. Admittedly, none would be guaranteed to co rrespond with analytic functions let alone approxi mate a desired function \${f{{\left({z}\right)}}}\$ within a sufficiently small error bound. @ Next, I considered the viability of taking a Fourier dec omposition of the real and imaginary components se parately, which could be superposed to recover the original function. While this approach merits cons ideration for sufficiently simple functions. I not iced that it would fail for cases where separabili ty is more enigmatic. For an example, I turn to th e Schwarz-Christoffel transform. # \$\${f{{\left({z})}} \right)}}}={\int_{{{z}_{{0}}}}}^{{{z}}}}\frac{{{A }{\left.{d}{z}\right.}}}{{\left.{d}{z}\right.}}}{{\prod_{{{j}={1}}}}^{{{n} ral representation of the formula, I find that it would present a particular challenge to separate the components for an arbitrary choice of \${x}_{{\{\{\{\}\}}}}}

... ance levels, \$\alpha = 0.01, 0.05, 0.1,\$ and \$ 0.2\$. The knockoff method using lasso-based LCD fe ature statistics outperforms BH by a wide margin w hen \$\alpha = 0.2\$ by successfully exploiting spar sity, but it fails for smaller values of \$\alpha\$ due to the threshold phenomenon. The cKnockoff met hod described in this paper outperforms both BH an d knockoffs.} « \label{fig:mcc-block} a \end{ d knockons. J & \labeling inc-block J & \end figure) & d \subsection(Outline and contribut ions) \label{sec:outline} & In this work, we pr opose the {\em calibrated Knockoff procedure} (cKn ockoff), a method that controls finite-sample FDR in the Gaussian linear model with fixed design. Ou method acts as a ``wrapper'' around any implemen tation of fixed-\$X\$ knockoffs, uniformly improving its power by means of a {\em fallback test} that a llows for the rejection of variables not rejected by knockoffs. of of For a generic fallback test st atistic \$T_j(\vct y)\$, we calibrate a data-adaptiv e rejection threshold $\hat{c}_j(\vec{y})$, and reject H_j for any j in the knockoff rejection se

 \dots en ${\it \omega}$ one of these point particles is modelled as the source of ${\it \omega}$ an appropriate metric of gener al relativity. For example, neutral particles & a re modelled by Schwarzschild metric and electrical ly or magnetically charged @ particles are modell ed by Reissner-Nordstr\"om metric. Finally, « the quantum mechanical wave-function of the other part icle in the « background of this space-time is an alysed to deduce the corresponding of scattering a mplitude. The effect of electromagnetism is also s tudied when of the particles also carry electric a nd/or magnetic charges. o o Next, we replace these black hole metrics by their counterparts in o o ilaton gravity, i.e. those that arise in low energ y string theory. Here, & we see that the above me ntioned modelling cannot be done by generic black & holes as was the case for general relativity. If we consider charged of particles, for example modelling can be successfully done only by of emal black holes to be able to calculate the scatt ering amplitudes. « This supports the conjecture

...... Push Ziggler! 7 of Find all posts by FordTa urusSM094 of That Don Guy of I wouldn't be surprised if the Money In The Bank winner ends up being eith er Cena or a surprise return by Batista (remember when everybody thought Daniel Bryan was leaving WW E72, who then decides, "I don't want the belt this way; I'll wait for Daniel Bryan to return, and the n cash in the briefcase." of What they should have done: have him hand over one of his two belts, the n, when he's better, they'll hang both belts over the ring and have a ladder match for the "unfied" title (after which they can finally retire one of them - having both of them around is meaningless u nless there's another split coming up). 8 of Find a 11 posts by That Don Guy of I am hoping the days of a non-heel Cena winning the championship in any way at all are OVER. OB Batista/Bryan could be good, as the "broken promises" relate to Batista not getting the title at Wrestlemania. But if we are supposedly moving to Brock/Bryan at Summerslam, we rea lly don't need Cena at all in the title picture. B

... e pens offered as a selection. I'm not looking for exact names so duplicating what I wrote as the name isn't required and having a typo won't disqualify you. Picking a Visioneer would disqualify you since there's no universe where that's a typo or a good choice. # 2. One entry per person. # 3. This is open internationally as long as USPS will ship there. Prizes will be declared as a gift but I am required to indicate a value. While this value will be relatively small you will be responsible for any customs fees or taxes. # 4. I can't (won't) re place any prizes that may be lost or delayed in tr ansit. I use the lowest cost method with no insurance and often no tracking outside the US. After many years of problem free shipping my recent histor y has some international deliveries taking over 30 days while touring the customs house in multiple countries only to be sent back. This applies to U.S. winners too, but it's mainly been an issue internationally. # 5. Plesse leave you email address in the appropriate comment field. It will not be made

... sturised. & Got any cuts on your hands? This 1 ovely soap is full of aloe so it'll speed up the recovery process and help avoid any nasty infection s from developing. & Most importantly, I like that this is a big bottle that lasts about 2-3 months b ased on a normal family (although what is normal r ight?). It means it's one thing of my list at the supermarket. Or two if you count the hand cream I don't need to buy. Or three because I also don't need to buy baby bath. I'm all about the thrifty bu ying! & We all want to protect our baby's delicate skin from harsh chemicals; it's just what we do as mums right? We want nothing but the best. These are the five products that I've swapped into our bab y boy's routine which have been absolutely amazing . Aloe Vera Soap - Super gentle for all types of sensitive skin but especially good for babies. I just put a pump in the bath for lots of bubbly fun. It's got a nice, natural scent and gives baby bum that fresh baby smell. & Aloe Vera Gelly - This on e has been absolutely amazing for teething! When b

... st as it is awkward to ask wealthy people why they need so much money, why they use their wealth so poorly, and why they don't just get rid of it when they recognize that it is the cause of their unhappiness. Anton Chekhov & Maybe that's what we look for in the people we love, the spark of unhappiness we think we know how to extinguish. — Tom Perrotta & I suddenly wondered whether Mother might not actually be happy now, whether the sensation of happiness might not be something like faintly glittering gold sunken at the bottom of the river of sorrow. The feeling of that strange pale light when once on as exceeded all the bounds of unhappiness - if that can be called a sensation of happiness s - if that can be called a sensation of happiness of our lives the days pass waywardly, featureless, without meaning, without particular happiness or unhappiness. Then, like turning over a tapestry when you have only known the back of it, there is sprea d the pattern. — Jane Gardam « Today, I go east.

... o be able to grieve that, right? No, you can, that's okay. That's okay. It doesn't bother me, right. I know how amazing my partner is for my girls and vice versa. But I also understand that as a parent, you have these visions of what your child's life is going to look like as an adult. And when it doesn't turn out that way, and it almost never does, it is okay to grieve that vision. And I think the response I got was, it was incredible to me be cause it was so many people sent that post to their parents and said, It's okay for you to grieve. A nd then those parents came back to me and were like, thank you because I needed that. Right. And that twas just that. I think that was a huge part of why we started that because the support group is that we need those places. We need those places where we can feel that whole spectrum of emotion. « We absolutely do. In fact, I told, and one of the few things that I have let slip since the kids have come out is, I think it was last weekend said, "You know, I'm sad. I'm never going to get a son-in-la

... et up. « It is apropos that I am especially grateful today, but I aim to cultivate an attitude of gratitude daily. So for all of you reading this who have helped make this fall a little more bearable, thank you. « I know. This post is LOMS overdue. But I'm posting it anyway, because we have an a wful lot to be thankful for, and because I think I 'll be glad we have a Thanksgiving 2015 post somed ay. « We spent Thanksgiving in Islip with Grammie's side of the family, a long-standing tradition for Will (and at this point, for me!), but a first for Henry, Jack, and Sophie. This meant lots of fam illy, lots of food (though let's be honest, these kiddos just ate mac'n cheese like it was any other Thursday), and lots of fresh air and wide open spaces. With the weather as warm as it was, we took full advantage of the immediate access to the outdo ors. How different from our city lives! « If you I ook closely, you'll see two kiddos running around on this glorious afternoon. The third one is in the bushes around the corner. I think they were play

... uch faster focusing and consistently sharp acr oss the entire aperture range which makes me think the smart money is on the SIGMA 50. It think the SI GMA 50 will hold its value much better and be a le ns that works nicely with newer sensors in the fut ure, whereas I consider the 50mm f71.4G to be a re asonable bargain alternative. D800 series users should probably for the SIGMA 50 as the Superior resolution will no doubt be more noticeable. It's i mpossible to do exact compares for the following due to different sensor sizes and focal lengths, but just for fun I included these comparisons I did for my own personal curiosity. I figured you might enjoy seeing them too, but strictly speaking these are apples to oranges comparisons. As a lens, I think the Fujifilm 50mm f71.2R is probably sharper but I think the sensor is superior on the 1D X. As a result, I don't think this lens compares as favo rably as it would if I could do an apples to apple s comparison of both lenses on the same camera bod y. It's clear the Fujifilm lens is just about as s

... ever seen. Cameron's camera captures the subt le structure of the thing with a naturalist's precision. Her up-close framing strips away context and sense of scale; her high-speed film records more detail and clarity than the naked eye can see. The result is a defiantly alien beauty. This flower is a "floral" in name only. & That's just a sample of the powerful art you'll see here -- inages beautiful, tactile, weird, highly personal, fiercely objective, and occasionally disturbing. To make it eve n more disturbing, these images aren't first-gene ration photographs, drawings, paintings or assembl ages. They're prints, although you'd never know it at a casual glance. What's going on? & On a techn ical level, it's easy to explain. & Chris Schumake r scanned in the original art at insamely high resolution, then generated large-scale prints on ever ything from paper to canvas to aluminum. Some piece sa are screen-printed; others are continuous tone, giclée output. The images are so good, you have to wonder: Is it fine art on the walls, or high-tech

...'s performance in the Daytona 500, the meaning might just fit. In the final six laps of the race, Gordon made several moves to prey on leader Tony S tewart, and rob Budweiser nation of another Dayton a victory. Running in second as the laps wound dow n, Gordon had two options. He could stay in line a nd push Stewart to a victory. Or he could take his chances and pull out of line, hoping that his team mate back in fifth place could move up and help hi m. Nobody would have faulted Gordon for taking the safe road. After all, in a day that saw some drama tic wrecks, a runner-up finish would have been a fine start to the new season. But this is Jeff Gord on... this is the Daytona 500... this is Jeff Gord on... this is the Daytona 500... this is crunch ti me. There are no safe roads. « Gordon Dulled out of line with six laps to go and immediately lost the runner-up spot to Kurt Busch. As expected, Johns on jumped to the outside to push Gordon. Dale Earn hardt Jr. drafted off Stewart and pulled high to move into the race lead. The crowd roard its appro val. But Gordon's chess game wasn't over just yet.

... lways encouraged them to take it into their te acher when school started. This made them so proud to have their teacher read it and give them a "GRE AT JOB" pat on the back. « Never leave home withou t them. Make sure it is not a messy snack. As a mo m you want them to eat healthy stuff like carrots and celery, but we know that might be tough so lim it their dry snack intake. Don't forget the drinks too. Keep them well fed and hydrated is key here. Also feed them healthy lunches too. « Always stop to burn energy. I know if you have a husband that likes to drive straight through this can be a prob lem, but honestly either you have a miserable trip or you stop to let them burn energy. Nice, clean a nd busy rest stops are the best of course. Some ha ve play areas or find a corner with no traffic and let them run a little bit, of course with supervision. Take chalk and draw hopscotch or draw a circle and have them stay within that circle with a bal 1. Take their scooter along if they're old enough to ride one. #BE ACTIVE AND PLAY WITH THEM. * & KID

... abits are formed through the instances where y ou make a successful decision, which in turn becomes a more "natural instinct". Even if you make the wrong decision, you will still have a valuable learning experience. A bad choice will just open up the door for a better one. & Your library and books tore probably have an entire section devoted to self-help. The best of these types of books can trul y give you new advice and ideas that work for improving your specific life situations and challenges. Many personal development books are poorly written, so pick one that has good reviews. & Try to be prepared to record your ideas no matter where you are. Pack some paper with you when you go out. If an idea grabs you while you are on the subway, write it down, then do something about it when inspiration strikes. & You should know the values that be ear importance to you prior to planning a self improvement program. Focus on those areas first to make the positive changes that are most important to your happiness. Instead, focus on all that is impo

... ilk jugs.putting one in twice a day. They have done well with this, but I am concerned about thei relectrolytes too, so I will add the recipe. « than ks Lisa! I had fans on all night along with addin g electrolytes to the water. Soun are a fire saver. T hanks a bunch for this recipe-going now to make. « Thanks so much. I was paying a dollar per packet of electrolyte solution to mix with 1 gallon of water. This will save me a lot off omney. Just made up a batch first thane. « I not offering the wade to it powder that I received with my baby chicks is something similar...it says its a mix of vitamins a nd electrolytes so maybe I could use that as well? « THANK YOU for this recipe!!! and... for astalled a \$25 misting system that we got from Tractor Supply... it only uses 0.9 gallons of water per hour, drop s the temp by 15 to 20 degrees (we tested it with a thermometer) and the chickens LOVE i!!!! The CAT S even lay under i!!!! It has proven to be a great

... unity to re install the CV to fit employer and that job. Another thing concerning the existing jo b and also the employer info, if any, need to get mentioned. «Your CV gives a synopsis of everythin g you have to give an organization and that which you have. Make certain that there was. Even the CV allows one to center on the skills you might have developed in a lot of elements of one's life. «Ma ke certain you are represented by the CV! Make certain your CV communicates that. It's quite important to organize your CV before you begin creating it. You also needs to mention that your CV and covering correspondence are all attached. Your CV is easy readable and to scan through! CVs are designed to get an crowd that was specific. Deciding the appropriate CV out to highlight your abilities and experiences is vital. «Additionally, there certainly are a lot of all CVs utilized in the great britain now and despite it is correct that you find it possible to have distinct formats of CV, in addition ow will need to take into account the form

... posted a message opining that the community co uld do better job of running a conferece. Guido ag reed that the Python Software Foundation (PSF) wou ld underwrite the event, we found a university ven ue to try and keep costs down, and started to ask for volunteers and speakers. PyCon was born. At the second event I announced I would only chair on e more conference, and the community would have to find a replacement chair if the conferences were to continue. I didn't want PyCon to become one pers on's plaything. Happily someone did come forward, and now there are PyCons all over the world. I have en't missed a single PyCon US so far. It's a fun conference. A Many people like to say they are "giving something back to the community," which is fine if you have to take first. Personally I think paying it forward is a more viable way to ensure that open source initiatives succeed. Running the PSF is a fine way contribute to the open source community, though it doesn't necessarily serve my financial interests best. A Te first linux distribution

... rpreting his statements. # We can abstract fro m our values to principles, and so on, but what ma kes the difference between an instrumental value a nd a terminal value is that a terminal value is on e that exists for its own sake. Inclusive genetic fitness does match that definition, because natura 1 selection is a thing that slowly replaces things with lower inclusive genetic fitness. With things we with higher inclusive genetic fitness. This is what biologists mean by 'maximize,' and it's different from what numerical optimization / math people mean by 'maximize.' # Is it true that you are doing the most you can to maximize your inclusive genetic fitness (IGF)? No, you're clearly suboptimal. But it is clearly true that your ancestors reproduced, and thus your genes are a product of the evolution ary project to gradually replace lower IGF with his pler IGF, and in that sense you are doing more on average to increase your IGF than the counterfactual yous that do not exist because their anecestors failed to reproduce. That seems to be what PhiliCee

bur disagreed. a "Because these cuts have just been proposed, we haven't yet evaluated which step we will take to deal with possible staff cuts, he said. « In response to whether he thought the c uts would affect the department's ability to provi de service, Wilbur answered, "Yes, that's why we will have to plead our case when our turn comes." H e added that if the cuts do occur, the department will have to consider taking an engine company out of service or reducing fire prevention to cope with the reduced staff. a "On the issues of layoffs t hemselves, I clearly recognize the controversy the y engender and the impact it has on our workforce, "Cohen said. "With labor costs constituting over 70 percent of our budget, and equipment and suppli es cut to the point that it is starting to get dif ficult for departments to perform their basic func tions, we have little choice but to now look for savings in personnel." & However, layoffs are not t he only measures being proposed to save money. The avor, with the approval of the department heads

xity increases without warning, and it engulfs the world in dimensions not even comprehensible. H ow to design globalisation taking care of complexi ty is what innovation should be focusing on - ther ein is the play - the globalisation, complexity an d innovation as the three-pronged world dimensions need to be taken care of simultaneously. a When We stern countries (read US) forced India and other A sian countries to open their markets in the late 1 980s and early 1990s, the West believed that they would get large markets for their products as well as cheap labour. They forced economies to open through multiple thrusts and forces that the so-calle d poor protected economies had no means to push ha to poin protected economies had no means to push of ck. The poor relented. In the 1990s, the opening u p of the Indian economy was criticised and generat ed a feeling of fear of new products coming into I ndia thus ending the so-called monopoly of existin g players in protected economy. « We are moving to wards an uncertain. unstable and chaotic state of

... nformation online, we fill out forms and turn them in to government agencies online. Therefore, the question of whether ADA requirements concerning accessibility for people with disabilities be applied to websites has been brought to the for e. & Generally, people with disabilities must have access to goods and services that are open to the public. People with disabilities have run into som e barriers in terms of access to and usability of certain websites. @ This is a sip-and-puff device, sometimes called a puff mouse, which allows a per son with a disability to control computer interface screens by blowing and inhaling into the device. a Joebeone, Wikipedia. Some rights reserved. a ADA Compliance, Websites and Some Court Cases a Early court cases in which this issue was addressed brou ght decisions that stated that the ADA did not app ly to websites. However, some advocacy groups soon brought cases to court and the tide began to turn. ed Target for having an inaccessible website.

osal to build up to 48 apartments in the subdi vision. Apartment residents could not exceed certa in income requirements in order to rent there. « K ris Henry, a Waverly Pointe resident, told council members the proposal needs to be stopped right now . « "Call it what it is," Henry said. "It's going be people with income of \$25,000 paying rents Crime will go up. Drugs will go up in this ty." of In early September, council members agreed to issue a letter of support for the develo per to obtain tax credits on the low-income apartm ent complex. Overland Property Group submitted an application to the Kansas Department of Housing in ugust for tax credits to build up to 48 units three apartment buildings in Gardner's Waverly Poi nte subdivision in August. ⊲ Council's resolution of support does not guarantee that revisions to Wa verly Pointe's preliminary development, which incl udes a Home Owners Association requiring that subd ivision owners occupy their property, would be app

And we did say that up front and at the time of Question: Yes. of Deputy Spokesman: It remains to be seen what evidence they can collect, but we'll keep in touch with them to try and get whatever in formation they have to make sure that they are abl e to look thoroughly at this. And of course, what that means is that they need to have access to all the information that they can get hold of in order to make a reasoned judgment about what actually ha ppened in Tabit. Yes? * Question: I just wanted to ask yesterday about the announcement of the Board of Inquiry, described as an internal and independe nt UN Headquarters Board of Inquiry. By internal, how much of this report is going to be public? Tha t's my question. I have a couple other questions o n reports, but can you say what "internal" means?

Deputy Spokesman: As with all United Nations boards of inquiry, the Board's report will be an inte rnal document of the Organization and not for publ ic release. However, the Secretary-General intends roved by the council or by the planning commission to make publicly available a summary of its findin

le-class mediocrity, has been great indeed! Go od Lord! Sacrosanct property has been attacked. The e quivering bourgeois must have visions of looting and riot flashing before their eyes: all because t he demonstrations of hate by those who own nothing against a recuperator such as Jacob have ceased. T he prejudices that underpinned the old authoritari an society have melted away. Which just goes to sh ow that our propaganda is on the right track!' The n he takes the jury to task: 'Sometimes, doctors' certificates are convenient.' He breaks down by pr ofession... each profession accompanied by some ep ithet of his own devising... the 'panel list' from which Jacob's jurors have been chosen by lot. Then e is among them, he notes, 'not one worker, not on e peasant, not a single proletarian'. How come? Be cause if justice was just and were Jacob's jury ma de up of twelve workers, he would necessarily have been acquitted! What, then, is the difference betw een the judges and the judged? It is that the thie ves are not the ones that are believed to be so!'

ishes broad plans for the administration, and the administration, deploying its own separate ratio nality of decision-making, gives a universalisable legal form to these plans. (King & Thornhill 2003, 87.) a officials. They should not be seen here as 'persons' but as 'carriers' of & political communi cation. "They are the result of office-holding and for & political behaviour", or, "they are politica l data and decision premises in the & offices they exercise" (Luhmann 1990, 61). « Second, I shall gi ve an overview of the relation between the public and @ politics. It is well known that in democracy the needs and interests of the @ public have an in fluence on the themes or binding decisions of the political # system. The public can influence the b inding decisions through public # opinion and mass media, which are the structural couplings between the « public and politics. In democratic societies g of the public opinion. They also produce topics

e also by Tessier & Sarrou. During his stay in China, Semallé wrote Four years in Beijing, in whi ch he writes about his journeys, his missions in t he South of China or the numerous incursions in To nkin. The works of art he brings back with him to France comprise important pieces, including this s tunning bell. @ This Imperial bell, called bianzho ng is, in many ways, exceptional. The magnificent and highly detailed chiseling of the bell speaks or itself: this bianzhong is truly a superb exampl e of Kangxi refinement. A twofaced dragon stands on top of the bell, its muscular body firmly stand ing on clawed legs, used to hang the bell from the wooden frame. The body of the bell is divided in t hree registers: the upper one holds a pattern of s tylized clouds, so does the lower one, with added perfectly round medallions, where the bell is hit to produce the sound. In between, the dragon's bod ies chasing the pearl among swirls of clouds unfur ls, revealing glistening scales chiseled to perfec tion. $\ensuremath{\text{@}}$ Bianzhong bells are grouped as carillons.

healthcare business. And then on the positive side too, the other piece I would throw out is, as the economy moves to a digital-first, thinking abo ut how we play in our semiconductor space, data ce factory automation is another area of stren gth that has helped us and through COVID. « Got th at. And then as a follow-up, when I looked at the guidance that you had given or the framework for the third quarter, and you came in pretty darn clos e to -- and actually above on revenues and above o margins. What might be the prospects for restori ng guidance? I know you've given our framework for 4Q. But just if you -- in the position we are pret ty darn close at this stage, when might guidance b e restored? And when might you restore buybacks? I mean, you commented on disciplined capital allocat ion, but you had really good cash flow. 🕫 You paid down debt, when might buybacks be restored? Thanks . of Yeah Dean, maybe I'll take the first part of that and just talk about how we think about guidanc e. And as we went through Q3 and got halfway throu

ties independently as well as in different pro jects with the government. These organizations has also implemented social accountability standard (I SO-26000). Thus employee at managerial or supervis ory level is considered as a unit of analysis for this study. This study used survey based methodolo gy and a questionnaire was developed after a compr ehensive review of literature. CSR items are taken as independent variables and financial performance as dependent variable. Data was collected using ou estionnaire and distributed to the respondent ever, a formal permission was taken through HR dep artment of each organization before conducting the survey. A stratified random sampling technique was used to reduce the common bias in the data. « Oues tionnaire for this study consists of two sections: first section was about the general information ab out the respondent and the second section is to in quire respondent perceptions about the CSR items a nd its impact on the dependent variables. This stu dy was based on employees experience and their exp

... arily until most currencies were sold and the entire market got into a slump. #However, after reaching its pinnacle in January 2018, the market crashed and has since been dwindling. In Televisor y's earlier blog, Blockchain, an emerging concept, a disruptive technology, we tried to explain the e volution of cryptocurrency and its technical knowhow. In this blog, Televisory attempted to underst and the volatility in its prices. Over the last 24 hours, Ether, the currency for the Ethereum network, went from ₹1,09,964 to ₹1,11,465, with a marke t cap of ₹13.7T. ≈ So far, professional investors say they would actually welcome new regulations - as long as they are not too stringent. But Gensler has called on Congress to give regulators the auth ority to write new rules. "In the absence of, you know, definitive regulation that applies to crypto assets, we work with them to craft policies, proce dures, and processes," she says. ≈ One of the olde st cryptocurrencies had forked from Bitcoin in 2017. By major market parameters, Bitcoin Cash has al

... to form teams and identify the best talent for projects across the organization. One thing the company has found is that like—minded workers gravitate towards each other, aided by technology, sparking bubbles of innovation. **Just as important, AI has helped Cisco make breakthroughs in hiring and talent development. **Now we are doing what we call 'blind hiring', where we don't see the name or the university the candidate attended. It's helped eliminate bias and let's us just review the purity of a person's work. This has opened up a whole new pool of talent we can tap — individuals who may no t have a college degree but are skilled at coding and a host of other expertise. ** a It's a whole new dynamic. **By 2025 I envision we will have a hybrid model and we will be more deliberate in who comes to the office and for what purpose. That may inclu de engineers working in our labs, customer visits that would bring us into the office or innovation days to bring in project teams. That's because we've found we can do so much remotely, including Web

However, the OIG called for the Global Fund to develop a longer term strategy to tackle the three diseases be yond 2016, including a more coordinated approach w ith other donors and health service providers in the country. The Global Fund Secretariat, working w ith country partners, has agreed to a number of corrective actions. # Kenya, with approximately \$% of the global HIV/AIDS disease burden as well as su bstantial shares of the malaria and tuberculosis (TB) epidemics, has made good progress in reducing

... st-earning, they would have a market value - the present value of the capital inflows (interest received) - which can be capped at 50 years, etcet era, or issued as interest-paying in perpetuity. Here again, an argument may arise regarding the via bility of the repayment of these inflows, which may be considered as debt. of However, classifying these inflows as debt wouldn't be accurate. This money collected from individuals and businesses would, in conjunction with the primary amount of the fund, be injected into the economy and the economic agents that receive payments from the SWF, or the equity that the SWF buy would be assets held by the SWF, a portion of which would be used to pay the businesses and individuals that provide the inflows to the SWF. Therefore, the inflows for the providers of inflows should be considered as equity they hold, with the SWF acting as an intermediary.

of The SWF would issue debt and acquire equity based on the inflows, if we bypass the middle entity the SWF in the inflows, if we bypass the middle entity the SWF.

while at the same time providing a cost effici architecture and method for updating a single ported Z-buffer memory. Ø A method and architectur e for updating a pipelined, single ported Z-buffer is disclosed for use in a raster scan, computer co ntrolled video display system for presenting a 3-d imensional representation of an image on a video d isplay apparatus, such as a computer monitor, to a n observer of the video display apparatus. The computer controlled video display system includes a Z -buffer for storing Z values and a frame buffer fo r storing pixel values. The Z-buffer has a single, bi-directional data port which is coupled to a gra phics update controller which is substantially sim ilar to the prior art graphics update controller. The frame buffer may be a single port random acces memory or a dual port random access memory method of the invention for updating the Z-buffe with new Z values to replace the old Z values be gins with the calculation of a new Z value and a n ew pixel value for each pixel location in a plural

ual sources observed. « The observations were ranged in duty cycles. Each duty cycle covered a subset of two to four close-by sources (with integration times between 30 and 60 s in each source po inting), in a similar way as the duty cycles descr ibed in Paper III. The duty cycles were designed to maximize the antenna elevations, which optimize the quality of the differential phase delays. We s how in Fig. 1 the time distribution of all the obs ervations. The frequency-switching changes were ap plied in two types of duty cycles, which were alte rnated every four iterations. In the first type of cycle (optimized for the frequency-switching calib ration, see Sect. 3.2), half of the switchings wer e applied while the antennas were slewing among so urces. If AL and AH are observations of source A a t 14.4 GHz and 43.1 GHz, respectively, the duty cy e due to switching. In the second type of duty cyc le, observations of different sources at the highe st frequencies were put close in time: This approa

⊲ To travel a certain distance you must first traverse half of it. « Makes perfect sense. one plus one. And one is one-half plus one-half. R ut don't be fooled by this seemingly innocent reas oning; it's a trap! (Admiral Ackbar!) @ To appreci ate what's going on—and connect Zeno's paradox bac k to calculus—let's pretend Zeno is in line at Sta rbucks, two feet away from the cash register. He's almost done scanning the menu when the barista yel ls out "next!" And that's when poor Zeno panics. H e must now walk two feet. but because of his minds et, he walks only half that distance with his firs t step. He then walks half of the remaining distan ce with his second step. (Can you imagine how anno ying those in line behind him are getting?) The fi gure below keeps track of the total distance d Zen o has walked and the change in distance Δd after each of his steps. # Fig. 1.2: Zeno trying to walk a distance of 2 feet by traversing half the remain ing distance with each step. (Reprinted, with perm ission, from Calculus Simplified.) d Here's a tabu

... are made at home and taken with us on road trips, on airplanes, trains, buses or field trips. A small flat ice pack comes in handy for taking item s along that need some chilling or in their school lunchboxes for sandwiches that need a bit of chilling before lunchtime. « Sandwiches are a favorite for my munchkins. There are endless possibilities as broad as your imagination. There's always good 'ol peanut butter and jelly but wait...not just an y PB&J. Here we have so many different jellies and jams and types of peanut butter or spreadable kind s of butter. Don't forget Nutella. Just try to lim it how much you spread on the bread, as it has a 1 ot of sugar in it. It's made with hazelnuts, and a s long as it's used sparingly, it's a fun surprise once in awhile. « Types of jelly and jam my kids 1 ike - If we aren't picking berries from where ever we find them and making our own jelly, we buy jell y and jam with the fewest ingredients, no high fru ctose corn syrup (HFCS), a natural preservative li ke ascorbic acid or the ingredients are all organi

... flated prices on his produce. But it saves us a journey on the crappy track to town and the stuff is pretty good quality. He even sometimes has go odies like yoghurt and meat! Moohoo. There is also a truck that comes around who will fill the underg round water tanks and will fill your water bottles , rare visits. In fact in two months we've only se en them once. A Another fabulous pro to this parad ise is the delicious fresh coconut water and flesh that Chris does most mornings to put on our breakf ast. So fresh, literally fallen from the tree the day before. Erm, there's the con. I'm terrified of walking under these danned coconut trees, especial ly when it's windy which at the moment is quite a lot. I am sure it would kill you if one fell on you rhead and they're pretty stealth and you only he ar them when they hit the sand with that very fina I dull thud. In fact I have googled it and apparently only about 150 people a year die from falling coconuts, I am very surprised! ** With our nearest neighbours at nearly two kilometres away and there

... long since become the village hall. *Still, its at heirs, and the leaving was deeply painful for the older villagers. And like Normanton Church, which had lost its congregation long before the 1970s, it was symbolic enough for local people that they spent time and trouble keeping it intact. *Ihat's surely worth a visit from the land of the 1 iving. *Normanton Church: 01780 65800; anglianwater.co.uk. Check for openings and events such as concerts. *Tyneham Village: tynehampor.org.uk. The village is usually open at weekends and more frequently during school holidays - check firing sched ules. ... m like we were the ones who made the mistake, not the kitchen. A simple dinner that should have taken an hour turned into almost two hours while we all sat there with empty water glasses put in the far corner of a quiet restaurant. At one point a gentleman in a suit - presumably a manager? he did not really introduce himself - came over to ask ho w things were and when we explained, he said "oh o kay we'll take care of that" - well we sat there for another 20 mins or so waiting for the check expecting our apps to be comped or something but received absolutely nothing. No offense but for \$140 bill without tip - there are A LOT of better places our money could have been spent - this place won't receive a dime of business again. « My family and I had a great time there. « I would recommend Red stone to my friends! « Waitress was nice. Food was horrible.. very disappointed. The manager did not even offer to accommodate us given the food issues . Will not visit this location again. « Redstone is always good, but they outdid themselves this tim

... turned our experience around dramatically. In the end, I had a good time. Pro-tip: Each table se ats 6, and they pair up their tables with very lit tle space in between, so even though our party was split into two separate tables, we felt like we we re sitting at the same one. They did put our order s on separate tabs, though: one per table. « The food: pretty delicious. Unlike other Korean B80 places, the sides were already served, meaning we sat down to a full table. I was a little overwhelmed at first, a bit confused by what all the dishes we re, but our placemats had instructions, and so by process of elimination, I was able to figure out which dishes held items meant to be consumed with the meat, and which were meant as sides that could be eaten separately. Another A++ for thoughtfulnes s. « It was also pretty different that the grill h ad a little moat where the warm sides - eggs and corn with cheese - could be cooked and kept warm. The cold sides included kimchi, pickled radish sou p, pickled radish sou p, pickled radish sou p, pickled radish sou

team behind the garden labelled it "a sculpte d art installation, not constrained by the rigours of season, climate or geography". The models were made by hundreds of volunteers including school ch ldren, war veterans and professional model makers « I can't decide whether I think it's a very cl niece of art designed to highlight gardening for all age groups or a stunt to gain publicity for May's new television show about children's favou rite toys. The question that sticks in my mind, is how it could it be judged as a garden if it contai ned no real plants? The Chelsea judges obviously k new they couldn't judge it as a normal garden and therefore it was awarded a plasticine medal instea d. a While I'm sure there are many true gardeners whose distaste for the garden will linger long aft er the plasticine has melted. The people have spok en and voted for it in their thousands. It has gai ned the much coveted Peoples Choice Award for smal 1 gardens. a These little pretty little flowers ap pear quintessentially British. Although most speci

... n cores, address environmental concerns, and p reserve history - all of which help to redefine the post-industrial city (Loures, 2015). « One of the earliest precedents of a post-industrial landsca pe is Parc des Buttes-Chaumont in Paris. The project was initiated by Napoléon III, who wished to clean up the slums and bring "green lungs" to produce healthy air for the city and improve the aesthet ics and image of Paris. Designer Jean-Charles Adol phe Alphand transformed the site of an old refuse dump and quarry site within the new industrial are a of the 19th arrondissement, into Parc des Buttes -Chaumont (Komara, 2013). The design of the park e ngaged new construction techniques and new materials, such as irrigation systems, hydraulic pumps, t ree-planting machinery, new uses of concrete, and more. Alphand played along with the theme of the E xposition Universelle, which was Industry, in the idea that some things found in nature look artificial, but what's new looks organic (Komara, 2013). « After World War II, the industrial city shifted

The cathedral named in honor of Santa Maria del Fiore is a vast Gothic structure built on the site of the 7th century church of Santa Reparata, the remains of which can be seen in the crypt. The cathedral was begun at the end of the 13th century by Arnolfo di Cambio, and the dome, which dominates the exterior, was added in the 15th century on a design of Filippo Brunelleschi. A statue to each of these important architects can be found outside to the right of the cathedral, both admiring their work for the rest of eternity. Florence's cathedral is the 4th largest in the world, after St. Peter's in Rom e, St. Paul's in London and the Duomo in Milan. The exterior is covered in a decorative mix of pink, exterior is covered in a decorative mix of pink, exterior is covered in a decorative mix of pink, exterior is covered in a decorative mix of pink,

... ecide who would represent the Families. Said representative had the authority to speak no behalf of the five Families and each Representative would hold the position for a 10 year period before a new Representative would be selected in the same man ner. * To this day, Azmath has been the centre of Food production and 'population' in the Principali ties, making it a ripe target for Bandits and Slav ers from Ik'sumar, as a result the number of Guard sman Irregulars and Kurgarn Battleborn tend to slo wly rise and fall as a dissuasive measure. A prime target for any invader, but the beating heart of the Principalities on the whole. * Falava City: The Default Capital City of the Region, Falava was first founded as a settlement meant to house the surplus population that came first. As time passed, wooden huts and tents gave way to a sprawling city metropolis of stone wood and bricks, the hierarchy made very clear: at the heart of the City are the Five Noble Families, all housed in the Grand House s surrounding the Keep, the residence of the Regio

... o but they got rejected because he wasn't ther e so it was nice to have a success on a my second try (this time c/o the Rangers stadium). Always gr eat to add another signed custom to the album too even though he didn't keep any of the extras I sen t. It's also always fun to add a signed 1993 Upper Deck card. I'd love to try building that set but I 'm scared of the UV bricking. A Another great return, this time larry Walker in 1000 days. I saw a lo t of people blaming Coors Field for Walker's numbers while he was on the Hall of Fame ballot but my enduring memory of him is watching him crush balls to all fields during night games at Candlestick. D ude could rake anywhere in the league and is a tot ally deserving member of Cooperstown. A 210-day return from Kevin Tapani brought a nice 1991 card back to me. I remember him being a solid pitcher for the Twins that year (and he was) and, since 199 1 is right in the sweet spot of my childhood fando m, that means that I think of his 1991 form first and forget pretty much everything that happened to

... tournament in which more than one game is played per day on consecutive days, players should have additional time off from sports activities foll owing the event to allow for recovery. **YeYoung a thletes in these age ranges who are approaching the semaximum hour limits should NOT be playing another sport concurrently. *REST GUIDELINES **MINIMUM REST DAYS PER WEEK **MAX MONTHS PER YEAR IN ORGA NIZED BASKETBALL **RECOMMENDED HOURS OF SLEEP PER NIGHT **9-12 hours **8-10 hours *** **For 12-year-olds, 9-12 hours of sleep is recommended ad Definitions and additional information regarding the recommended and maximum participation tables are provided in Appendix B. **Player Segmentation Model ** Basketball currently lacks a consistent way to group kids for competition, and the result is a patchwork of different structures, age requirements and rules. Classmates may be able to play with one another in a given tournament that uses a grade-based classification system (based on academic year in school), but be prohibited from competing together

... 8. Meanwhile, the 10 most successful non-Big S ix clubs of these five seasons (according to avera ge points won per match) included the direct, vert ical and 43% possession Leicester squad that won the league in 2016; the 2018-19 Molves squad that had 46% possession, played bend-don't-break defens e and allowed almost no clean shots on goal; and the definitively old-school 2017-18 Burnley team that enjoyed 43% possession, threw bodies in front of every opposing shot and attempted mostly forward passes, take-ons and crosses on offense. «Possession has primarily been the favorite's tactic, not the underdog's. But that has not been the story in 2019-20. «1. There are a few identity crises with in the Big Six. I have mostly spoken in this piece about the six richest clubs as a monolith, deploying the same strategy and equally sharing the top s ix spots in the table among themselves. That, of course, is not how things have played out, especial ly since Guardiola's second season. The 2017-18 and 2018-19 City squads dominated the Premier League

... gainst Florida on only one attempt. & AlSo, I would say that losing 70-19 is better than losing 56-6. My reasoning is as follows: Florida outscore d South Carolina by more than an 9-1 ratio, but on 1y outscored The Citadel by a little more than a 3 -6-1 ratio. Advantage, Bulldogs. & The good side & The basketball game also went about as expected, and this was a good thing. The Citadel was never th reatened by Cincinnati Christian and pulled away down the stretch for a convincing victory. CCU had no answer for Cameron Wells, who had a good game n ot only on the stat sheet, but in terms of letting the game come to him. Zach Urbanus had a strong fi rst half and a solid overall game. The Bulldogs did a good job in this game of getting to the foul 1 ine and converting. Getting their fair share of free throw attempts has to be a priority for the Bulldogs, especially when shooting foul shots is one of The Citadel's strengths. & Speaking of that, Phillip Pandak got into the game late, and was almost immediately fouled. I was rooting for him to mak

... h praise, I guess, from a seasoned veteran suc h as The Bont, accumulator of 56 games now, and al 1 of 20 years old. « The Bont had 19 disposals. No t many by his peerless standards, yet to my mind h e was, if not the best, the most influential playe r on the ground. « There was a wonderful moment, right in front of where the Iragician Tribe sit. Firrito had the ball, close to the boundary, and tri ed to launch a booming kick out of the danger zone of our forward line. But The Bont was right there, and with an athletic leap and full deployment of those "go-go-gadget" arms, spoilt the kick and force dit out of bounds. « 'Spud' looked crestfallen. And The Bont's reaction, visible only to us facing the two players, was a sight to behold. There was jubilation, and a full and utter appreciation of e verything the moment meant. « And there was a touch of that facial expression, the one that generation of mothers have threatened to wipe off their children's faces. A smirk. « And among all the sub blime and audacious things The Bont did that day.

...s arrival in the Welsh capital and then Maeter linck's honour led to an unknown Cardiff City supp orter deciding to call the team, resplendent in the resplender that the time Cardiff City appeared in their first FA Cup final in 1925 and took the FA Cup out of England for the first and only time in 1927 the club sported the coat of arm so fit the city as their emblem. These arms were granted on 26 August 1906. The shield of the arms bears a red dragon, the national symbol of Wales. The dragon symbol has been in practically continuous use since the Romans brought it to Britain. When Rome withdrew her troops the dragon remained as the symbol of authority and unity among the Romanized Britons and became their standard in the wars against the invading Angles and Saxons. It was from this emblem the war-leader would take the name Pendragon, and would particularly be associated with the semi-mythical King Arthur. To this day the red de

at the dock"—I said it did open certain place s at the dock-he said it was the key of the room h e hired of a publican in Old Gravel-lane, and the room was at No. 3, Johnson-street-I said, "Am I to understand that it was the key of the garret at No . 3, Johnson-street?"—he said it was—I said, shall have fair play"—I then went to No. 3, n-street, and found the key fitted the garret door lock—I said to Clark, "When I asked you on Friday where you got the key, you told me you did not known the said to clark, "When I asked you on Friday where you got the key, you told me you did not known the said to clark, "When I asked you on Friday where you got the key, you told me you did not known the said to clark, "When I asked you on Friday where you got the key, you told me you did not known the said to clark, "When I asked you on Friday where you got the key, you told me you did not known the said to clark," w"-he said. "Yes. I was so confused. I did not kno w what I was saying"—I found some lucifers on the the warehouse—I saw the foreman pick up som e lucifers under the lantern near Tent-street-here are some lucifers produced by Swingland and by Jud ge-they all appear to be of the same description—t here were four more matches, which were left at th e police-court-this is a piece of cord I found on the head of one of the hogsheads of tobacco under the lantern. @ Cross-examined by MR. WILKINS. O. A re you at all acquainted with the process of makin

urse, in the meantime, everybody knew what had happened. Everybody knew that I got lost in the fo rest. Everybody knew that I had to be helicoptered out. They found it generally quite amusing, mostly made fun of me. There wasn't a lot of sympathy. Pe ople around me thought, "Listen, you should have k nown better, and you didn't. Too bad for you," whi nown better, and you didn't. Too bad for you," whi ch really isn't wrong. a People in this very smal l community, including my very good friends, were Swiss ski instructors, which is an extremely hard profession to obtain, triathletes, really serious outdoors people. The idea that this North American bikes into the forest and can't find her way out. They were not sympathetic really at all. My friend did find the situation funny. And I did, too. So there was really a sense of embarrassment. All t he same emotions that I had felt sitting in that s helter, I felt again afterward because I thought,
"Oh, what's my defense to this?" Then, I received
a bill in the mail, and the bill was from the very nice folks who had arrived with the helicopter. It

ymanski and Caroline scouted out the pens and quickly found the two fillies Caroline had on he list, but the colt was on the northern side of the Island, which meant Caroline wouldn't have a chanc e to see him until the northern herd was rounded u p and put in the pens on the southern side to awai t the much anticipated swim. When Caroline finally saw the colt. it was love at first sight. ⊲ The da y before the swim, Caroline was at the pens to s what foals would be tagged as "buybacks" (foals at are returned to the island to replenish the her Caroline had been told only fillies (female f oals) would be kept as there were too many stallio ns on the island already. As she looked over the p ens, her heart did a summersault. Both the fillies she was considering bore the red tag of a buyback. She was glad her number one pick was a colt and th at she would at least have a shot at bidding on hi m. Just as that thought went through her mind, her phone went off. It was one of the Feather Fund gir ls calling to tell Caroline the colt the she had f

... e lit window serves as a beacon. Someone is aw ake within the practice. Too late to be still work ing. @ The light belongs to one of the offices. Dr . Bethany Brooks within it, perusing patient files and making notations here or there. Busy work. To keep her awake and to stave off the blood filled d reams that have haunted her the past few evenings. Silence in the darkness is easy for one that liv s solely within the evening's embrace. For severa nights now, Marius has stood in the shadows, wat ching, listening to the movements that lie within those walls, both on the lower level and above; si nce he's learned where it is she works, and appare ntly resides. « Often spending time alone in the e vening is a good way to hone one's senses. Though vampires have the ability to move quietly, doorkno bs do not. The familiar squeaky creak of the knob. is heard. The light in the office snuffed as she waits only a heartbeat to see if there will follow other noises. « None appear to be forthcoming. Gat hering her robe from the chair Bethany situates it

ologise, grovel, whatever it takes," a Jason's stern gaze pierced her soul. "It must be sincere or r he won't accept it." He leaned back in the chair , crossing his arms, appearing extremely forbiddin g. She actually shivered. & "Don't worry, he will believe me. I promise." She assured him. & "I have also summoned Anna and Karen via email to be at my also summined with and Adlet via email to be at most office at 9 o'clock sharp. I intend giving them bo th a severe verbal warning and a disciplinary on t heir record." # He noted Alicia's satisfied expres "However, I will be asking you to at 9.30 to apologise for what you did to them. Her mouth dropped open and she gasped. "No, Jason, don't make me do that, please." She pleaded with h er eves as well as her words. « "That is only fair Alicia You don't want to fuel their accusations with favouritism, do you? And I expect you to reim burse Anna for her tyres. They need to know that y ou have been punished for your part in this fiasco ." @ He was adamant and she knew better than to ar

nce McMahon wouldn't allow it until he got int o an angle with Jerry Lawler, which led to him bei ng at the announcers table . # [Vince] didn't wan t me to talk," Taz revealed. "I didn't get on the mic and believe me, I had some pretty good promo w ork at ECW and I had my catchphrase 'beat me if yo u can, survive if I let you' and he didn't care. H e kind of wanted to re-brand me. And they don't te 11 you that. You kind of have to figure that out o n your own. So fast forward a little bit, maybe a year or so, year and a half, I got into an angle w ith JR [Jim Ross] and that was at the Garden where I got verbal with JR and cut a promo on JR. Then t hey had Jerry Lawler punch me and he knocks me on my ass. I get into a big pull apart with king and and king get into this angle for a couple weeks Well, that angle is what put me at the announce desk because they had me take out Lawler before Sm ackDown, or something like that, and I sat next to Michael Cole. I was supposed to sit there for a se gment and then Jerry Lawler was supposed to attack

but still present, heart churning. You watch t organ throb from underneath the holes in the lu - it's just begging to escape. It would be so e ng asy to reach in and take it, and you would if it c ould save your sister. She's nearly at the top of the donor waiting list. @ Distracted, you look bac k at the black burnt rubber on the payement leadin g up to impact. Your hands go through the motions of saving her; it's second nature at this point, of saving her; it is second nature of STAS plant, but when everything happens at this speed it's eas v to get left behind, so you refocus. Saving lives to get left behind, so you refocus. Saving lives s your job. of The left side of the girl's face is only halfway there, almost as charred as her arm, which sports a new unnatural angle thanks to an ur sheathed bone. When she was thrown from her seat s he must've turned slightly for her fatal surf alon g the cement. This isn't anyone's first call; you re all veterans who have seen every horror imagina ble before. Knowing when people will live or die comes with the territory. This girl will die. She w ill not live long enough to see the hospital. Your

av around the lavacombs. The sewage system's l ack of life had her thoroughly confused. Even back home, where there was technology aplenty, the unde rground waterways were flooded, not just with wast e, but also with monsters. Their unsanitary condit ions provided the perfect nesting grounds for para uses slimes gorches and other incarnations of f ilth. @ By contrast, Borrok Peak's sewers were emp ty, devoid of both excrement and the life it attra cted. Anything that was discarded was incinerated the moment it reached the pipe's bottom. The envir onment served as the perfect disposal system, so l ong as the people inhabiting it didn't mind the constant threat of a society-ending eruption. The pi pes, the vessels used to transport the borroks' wa ste, could just as easily serve to carry magma up into the city. « Staring at the plumbing, the half breed wandered around until she stumbled across a landmark. She realised, as she neared the lava cha mber's center, that not all the tubes were open. T he ones directly above the largest pit were shut \boldsymbol{o}

 \dots r, run along to fetch me some clothes." $\mbox{\ensuremath{\emptyset}}$ That shut him up even if he remained facing her. "Xfine wfikagdolpa?" He spoke to her in a guttural tongue that sent shivers dancing along her skin. 4 She ig nored how his voice affected her and concentrated on the fact she didn't understand a damned thing he said. "I don't know what the hell you just said so do you want to try again in English instead o f whatever alien language you're using." She tappe d a bare foot as she glared at him imperiously—nak ed or not, she refused to show fear even if inside , she quivered at the situation. of He snarled some foreign words before throwing something at her and stalking out of the room. Fabric hit her as she wa tched in stunned amazement how the previously unse en door just slid across the opening, leaving the wall seamless again. # Unsure of when the annoyed alien freak would return, she scrambled to get int o the clothes, his she surmised judging by the siz e and style: a white tunic shirt that hung to her es and pants that hugged her rounded ass but we

 \dots more fishy goodness from that red bucket in fr ont of me. $\mbox{\ensuremath{\text{\tiny d}}}\ \ I$ fished out the second fish (see wha t I did there?) and focused on making a better thr ow of it this time. I'd noticed that the Keeper ha d chucked them higher up on the rocks so that Huds on would have to climb up to get them, and thus be visible to more people than he was down by the edg e of the pool. So I heaved the fish treat and mana ged to get it up a couple of levels, which was a c ouple of levels higher than the first throw - not too shabby! « Pleased with myself, I pulled out th e third and final fish in the bucket, and waited w hile Hudson ate the one I hadn't botched. He seeme d to like wandering across the exhibit, making sur e no one was feeling left out, and that everyone ould see him from where they were standing. He ecially wanted them to know he was eating fish. an d that he had an amazing bucket to show them after the fish were done! When Hudson came back to our e nd of the exhibit. I paused to take some pics on m commemorating the moment for myself, and

.. nd he was enthralled. His workload piling up a the lab, he couldn't pull himself away from the whale. He quickly learned that auditory stimulatio n was a much greater reward for Skana than food. W hat came in the following months was a melody of t unes as Paul played everything from the Beatles an d Rolling Stones to Bach. Skana loved them all. Pa ul was forced to accept that Skana was much more i ntelligent than any other terrestrial mammal he'd come in contact with. She was almost certainly, go ing crazy in her little pool, her calls reverberat ing and echoing off the concrete walls, with just a few humans for company. Capable of speeds up to 30 knots, Skana was resigned to swimming in slow of ircles day after day. It was apparent to Paul what needed to be done: Skana needed to go home. « But when he did present his findings, a storm of contr oversy followed at the aquarium. They didn't want Skana to be a sentient intelligent being. They wan ted the equivalent of an aquatic dog that would do tricks and keep people coming through the turnstil

as she didn't have the energy for anything els of Play: W made beds for her toy dogs out of sho e boxes, using all the face cloths, napkins and to wels in the house for bedding.

She also played w ith her magnetic pop-up toys a lot, then later pla yed independently with her dolls and cars, getting them set up for a journey and working out a compli cated hierarchy regarding who sat where. This last ed over a few days. « Board Games: My stepdaughter , D (8) had a new board game - Chinese Chequers. W e all played it and W picked up the rules quickly and followed them well. She even figured out skilf ul moves. « Politics: General conversations with W this week have covered: the law around sending chi ldren to school, children's rights in relation to this, Donald Trump and his wall, who pays for the Queen's palaces, gay rights, racism in America. gu n control in America, and women's rights. All of t hese conversations were instigated by W, who appea rs at this stage to have a keen interest in politi cs and how the world works. ∅ Hopefully, we

... ew one of them, my friend Megs. The other peop le were her friends she'd met in Hong Kong. Two of the girls were visiting from Australia. Another wa s a native Utahn who brought her husband along to the dinner—they were newlyweds. of Eventually, the conversation turned to the subject of marriage and the two at the table who had any say in it spoke \boldsymbol{u} p. The husband was several years younger than his wife, something that surprised me because of how o ften a few of my guy friends would reiterate the f act that they would never date an older woman. « S he went on to explain he might have had a guess bu t he didn't really know until he had already falle n for her. « So I guess that's how you do it. If y ou want to snag a younger man, don't tell him your age. « Okay, fast forward a number of months. « I' m on a blind date with this guys that my younger b rother set me up with. They told me that he was yo rother set me up with, iney toru me true we will unger than me, but didn't tell me by how much. Whe n I met him he looked 22. As we talked, I learned that he was at least older than that judging by th s paying more attention to how Joe moves around on

nstructions, safe but it did linger for a few days. ${\scriptstyle ext{\tiny d}}$ I found night one and the next few nights pretty uncomfortable, but that says more about our old mattress than the Rem-Fit 400. According to th e Ts & Cs at Rem-Fit they recommend that you sleep on your new mattress for a minimum of 30 nights to allow enough time for your body to fully adjust, which gives some comforting encourage to pursue (it 's worth it, honest). We tested this mattress duri er months, too, which has been somewhat ng the summ mixed bag of temperatures but the mattress h its open cell memory foam which provides a degre e of temperature regulation - coped perfectly. Wit h our wool duvet (cool in summer, warm in winter), cotton mattress protector (for extending the mattr ess longevity) and the window open we both slept t hrough the nights, undisturbed unless it was to to p up my glass of water which I like to keep full a t my side of the bed at all times (it's comfort th ing). ${\it \omega}$ To get an idea of the motion transfer I wa

as come forward with a shocking story about ho who is mother attempted to force him to be transgen der starting at the age of eight. d "I didn't know who I was," Lucas told Sausage Roll. His mother dr essed him in girl's clothes before school, which r esulted in alienation and confusion within the poo r lad. He explained the shocking story about how t he LGBT abuse started in his life. « "My parents m et online on some, now defunct, dating website. My father is an Australian labour worker and my mother r was working as a waitress in Los Angeles, Califo rnia, at the time," Lucas wrote in an email. a "I grew up and went to school in Australia and everyt hing was quite normal. I had a few friend and we'd hang out and play video-games or just mess around at the local part," he added. « Lucas' childhood was normal until his parents split up, which is en his mother without a strong patriarchal figure around to keep her in check started abusing her so n by instilling transgender dogma into him. Lucas

sentence is our introduction to The Crooked M an, and it warrants examination, for it contains a very singular point of interest. « Notice that Wat son tells us that the day in question occurred a f ew months after his marriage. We have commented or the frequency of Watson's participation in Holmes' cases in the months following Watson's marriage, a nd yet, it begs repeating, for it really is quite suggestive. Recall that Watson, according to Barin g-Gould, married Mary Morstan on May 1, 1889. Acco rding to Baring-Gould, the following cases took pl ace 'a few months after Watson's marriage: a The B oscombe Valley Mystery ${\scriptstyle @}$ The Stockbroker's Clerk ${\scriptstyle @}$ r's Thumb @ And this is limited to using Baring-Go uld's dates. If we assume Mary to be Watson's firs t (and possibly only) wife, then we must also acco unt for the cases Baring-Gould dated during Watson 's supposed first marriage. In fact, were we to co unt the number of cases Watson's sets some few mon was forced to move to America, which alienated him ths after his marriage, I expect we would be quite

vement in this particular terrain. Perhaps the lion has evolved a distinct montane version, speci fically adapted for success in this very different habitat from the lion's more typical savannah home of Supporting this possibility is the apparent ex istence of comparable mystery cats in other mounta in ranges in East and Central Africa. Here they ar e referred to variously as the ntarargo (in Uganda e reterred to variously as the ntarargo (in Uganda), ikimizi (in Rwanda), bung bung (Cameroon), and abasambo (Ethiopia). # WINGED CATS # The concept of domestic cats with wings would normally be confined to fantasy books and 'silly season' tabloid st ories, were it not for the remarkable fact that su ch creatures are unquestionably real. As the world 's leading investigator of winged cats, I have rev ealed and documented dozens of verified cases from around the world. One of the earliest, and still a mong the most famous, cases was that of a kitten f rom Wiveliscombe in Somerset, which was photograph ed in the Strand Magazine in November 1899, clearl revealing a pair of large fluffy wing-like exten

 \dots company to build. Can you talk a little bit about that process and how it works? $\mbox{\ensuremath{\emptyset}}$ Yeah, absolut ely. To be honest, those outcomes are really wellined, but they're constantly in flux. tell you what we think are the most important thin gs now, but they constantly change in terms of rel ative importance and relative confidence. d So ins ide of this idea of net-zero transition for us. th ere are sort of five key requirements that we're c urrently working on. One is that we need to remedi ate historical emissions. Another is that we need to reduce the emissions going into the future. A third is that we need to find a way of eliminating the sunk cost in the oil and gas industry and making it easy for that huge wealth of assets to move across. A fourth is that we need to kind of oil th e work so the financial sector, is such that we se e huge influxes of capital into the space. And a f ifth is that we need to generate energy and create energy systems that are capable of holding renewab ergy successfully. So under each of those, we

ften colonies of up to half a dozen squat urch in shrimp of varying sizes will all share the same urchin. Beyond its circumtropical distribution and perfect camouflage, the squat urchin shrimp furth er demonstrates its successfulness by feeding upon the epidermal tissue of the very spines that grant it protection. This is a relatively benign form of parasitism that doesn't seem to bother the urchin. These shrimp will also feed opportunistically upon detritus that the urchin picks up as it moves alon g the sea floor. The squat urchin shrimp is a crea ture that has found a near perfect niche in a trul y self-sustaining, self-contained world of spines. « ZEOvit has just released the latest in their Dre am Tank of the Quarter Series. n for mortality (P-POSSUM). This study involve d 153 consecutive patients aged 75 years and older who underwent elective gastric or colorectal surge ry between July 2004 and June 2006. A retrospective analysis was performed on data collected prior t o each surgery. The predicted mortality and morbid ity risks were calculated using each of the scorin g systems and were used to obtain the observed/pre dicted (O/E) mortality and morbidity ratios. New 1 ogistic regression equations for morbidity and mor were then calculated using the scores fr the POSSUM system and applied retrospectively. The O/E ratio for morbidity obtained from POSSUM score was 0.23. The O/E ratios for mortality from the PO SSUM score and the P-POSSUM were 0.15 and 0.38, re spectively. Utilizing the new equations using scor es from the POSSUM, the O/E ratio increased to 0.8 8. Both the POSSUM and P-POSSUM over-predicted the morbidity and mortality in elective gastrointestin al surgery for malignant tumors in elderly patient s. However, if a surgical unit makes appropriate \boldsymbol{c}

ticipants fasted overnight and had a test brea kfast smoothie with 205 kcal of either MCT oil, co conut oil, or vegetable oil (control) on three sep arate days . @ They found out that MCT oil showed significant in food intake compared to coconut and control oil. The control oil increased food intake compared to MCT and coconut oil MCT oil also incr eased satiety for over 3 hours after breakfast com pared to the other two oils. The results from this study also provide evidence to the fact that pure MCT oil and coconut oil are not the same. @ Even a reasonably old study from 1998 supports the theory that MCT reduces food intake by increasing the fee ling of fullness for longer . # A 2008 study compa red the effectiveness of MCT oil and olive oil for weight loss. Forty-nine men and women (aged 19-50) were divided into two groups. One group consumed 1 8-24 g of MCT oil per day and the other group cons umed the same amount of olive oil as part of a wei ght loss program for 16 weeks. They found out that consumption of MCT oil had a significant reduction

11 rise up and no longer support all of the ca llous unthinking military adventures. Hence what s ome view as the illogical funding of Al-Qaeda and terrorists to carry out the dirty work 1 happen when these terrorist elements begin to re alize that they have been merely disposable pawns for the US and that they have been killing their wn brothers and mothers and sisters? Of course the US has not thought of that. The backlash when Al-Q aeda and all of the motley groups of terrorists re alize they have been killing their brethren for th e enemy will be monumental and Americans will fina lly see what real terrorism is all about, I believ e that is a given. But that is okay for Washington too, they have all of the plans in place and this will allow the military industrial complex to expa nd and invade even more countries. What are a few American lives? @ What about Israel? As I have sai d in the past, in reality the United States does n ot care about Israel. The maelstrom that will occu r if the US strikes Syria will be monumental and r

the U.S. Capitol on December 21, 2022 in Wash ington, DC. In his first known trip outside of Ukr aine since Russia invaded, Zelensky met with U.S. President Joe Biden and outlined Ukraine's request for continued military aid. (Photo by Chip Somodey illa/Getty Images) of In 2023 The west will need to decide how it wants to protect democracy in Ukrain e because the winter could stretch deep into April and May of 2023. If the west does not step up to help Ukraine the constant rocket attacks could crip ple the country. There is immense intellectual cap ital in Ukraine that needs to protection and nurturing. Listen to my podcast about the rebuilding of Ukraine here. & Welcome to the new volatile labor markets - globally each of us needs a very astute sports agent. & Scott Boras is a hated man by spor ts franchise CEO's and owners in the USA. There ar e similar agents in soccer in Europe, like Jorge M endes. They have something in common. Even if we f ight over the idea that one sport is called footba 11 or soccer. They make incredibly high sums of mo

and Qatar was resolved in March 2001. The bord with Oman also is not demarcated. « Saudi force s did not participate in the Six-Day (Arab-Israeli) War of June 1967, but the government later provi ded annual subsidies to Egypt. Jordan. and Syria t o support their economies. During the 1973 Arab-Is raeli war, Saudi Arabia participated in the Arab o il boycott of the United States and Netherlands. A member of the Organization of Petroleum Exporting Countries (OPEC), Saudi Arabia had joined other me mber countries in moderate oil price increases beg inning in 1971. After the 1973 war, the price of o il rose substantially, dramatically increasing Sau di Arabia's wealth and political influence. « King Fahd suffered a stroke in November 1995. From 1997, Crown Prince Abdullah took on much of the day-to -day responsibilities of running the government. U on King Fahd's death on August 1, 2005, Abdullah assumed the throne as King, Prince Sultan, Ministe r of Defense and Aviation, became Crown Prince and First Deputy Prime Minister. « The central institu

e, but a second wave of wars began when the Co ssacks allied with Russia and pushed deep into Lit huania in 1655. In the same year, Sweden piled on capturing several of Poland's major cities. The Co ssacks and the Russians treated the Jews far more brutally than the Swedes, but they were trouble to o. The successful Polish counterattack against Swe dish forces was also disastrous for the Jews, who were accused of treacherously assisting them. dreds, if not thousands, of Jews were killed, a mass exodus began." @ How many Jews were killed uprooted during these years? Relying, like Chaz , on the research of Shaul Stampfer, Teller repo rts that of the 40 000 Jews in Ukraine some 18 00 0 died between 1648 and 1654, in addition to an in determinable number of others who were massacred i n other parts of the Polish Lithuanian Commonwealt h. Refugees who remained within the borders of the Commonwealth must have numbered at least 15,000, a nd another 10.000 seem to have migrated beyond the Contemporary but unreliable reports refer to 20

s off in Subic Bay of From the Philippine Daily Inquirer (Oct 9, 2019): PH-US military drill kicks off in Subic Bay & Philippine Marine Corps officia Is lead the opening ceremony of the third edition of "Kamandag" or "Kaagapay ng mga Mandirigma ng Da gat (Cooperation of Warriors of the Sea)" at the S ubic Bay International Airport on Wednesday. Photo by Joanna Rose Aglibot & SUBIC BAY FREEPORT — A 10 -day joint military training involving more than 1 .500 Filipino and American troops officially began here on Wednesday. o The military drill was dubbed "Kamandag" or "Kaagapay ng mga Mandirigma ng Dagat (Cooperation of Warriors of the Sea)is on its thir edition. @ The training is a Philippine-led mili tary training exercise between the Armed Forces of the Philippines and US forces that will run until Oct. 18, according to Capt. Felix Serapio, directo r of the Marine Corps Public Affairs Office. « Maj Gen. Ramiro Manuel Rey, chief of the Northern Lu on Command, led the opening ceremony of the exerc ise at the Subic Bay International Airport here on ug. 6: Pres. Bush received a briefing titled: "Bin

at. No. I was told, this was a training exerci se for the Central Intelligence Agency, the CIA, a nd they wanted to know if I would be willing to pa rticipate. a I opened the conversation by saying rticipate. «I opened the conversation by saying: "According to your original charter from when the CIA was created in 1947, you're not supposed to be working directly within the US." Well, I got the he em-haw. «I twasn't long after the meeting when I found out something else. I was stunned to learn t hat there are CIA operatives inside some state gov ernments. I'm left to wonder why our Constitution is being violated. Source: Don't Start the Revolut ion, by Jesse Ventura, p. 98-94 , Apr 1, 2008 a Bu sh administration knew 9/11 was coming a When it c omes to the question of "what did they know and wh en did they know it," as the old Watergate phrase goes, my B.S. detector antenna goes sky-high. Consider these facts about the summer of 2001: @ July 26: Attorney General Ashcroft stopped flying comm rcial airlines because of a threat assessment.

r a hundred years of bloody wars I finally rea lize this is the Jewish national home, too. We nee d a two-state solution. Can you imagine? ... But n o one is ready to do it." & In the political imagi nations of Israeli Jews and Palestinian Arabs, "Eu rope" continues to play an overwhelming role. Oz d eclares: "The Jews and the Arabs had the same oppr essors. The Europeans were guilty of anti-Semitism and the Holocaust, and the Europeans were guilty o f colonialism in the Middle East and, the exploita tion of the Arabs. In Brecht's poems, the oppresse d join hands and march together. But the two child ren of the same oppressive parent can often be the worst of enemies. The Palestinians look at me, the Israeli, as an extension of white, sophisticated, solonizing Europe, which returned to the Middle Ea st to do the same old thing: dominate, humiliate, like European crusaders. The other side, the Israe lis, see the Palestinians not as fellow-victims bu t as pogrom-makers, Cossacks, Nazis, oppressors in

East, was made clear by Tillerson's response t o Tuesday's events. The secretary of state denounc ed Assad for his "brutal, unabashed barbarism," be fore adding that Russia and Iran bore "moral respo nsibility" for the attack. @ Tillerson's provocati ve remarks come on the heels of last week's commen ts from General Joseph Votel, chief of the US Cent ral Command, who told a House Armed Services Commi ttee hearing that Iran "poses the greatest long-te rm threat to security in this part of the world Since Trump took office, the war initiated by Ob ama in Syria and Iraq has been drastically intensi fied. Trump has given a free hand to commanders or the ground to launch air strikes and other attacks , while increasing the number of troops deployed o n the ground and expanding their mandates to act c loser to the front lines of fighting. The result h as been a devastating rise in civilian casualties in both countries, with the death of hundreds of c ivilians in the Iraqi city of Mosul and hundreds m kaffivehs and mustaches playing the same ancient g ore in air strikes in northern Svria. @ Trump has

cracy. « *** « The directions of research have to be planned in a transparent way and submitted t o democratic deliberation. » OK. But it is better to add some space of free research for the scienti sts themselves, allowing them to study some fields where they feel there is hope of discovery. Useful results may come by indirect ways, and therefore r esearch must not be 100% planned. # *** Furthermor e we must beware that the planning proposals could cover censorship of some fields : groups may propo se discarding research in some fields not really b ecause they think money would be more useful elsew but because they are afraid this research co uld lead to unpleasant results. @ *** Ferey underl ines how useful may be diversity among the scienti sts. But she omits an important parameter : the in tellectual training. When all the scientists in a field have the same training, conformity is much e asier to get. If for instances the sociological st udies are made by people of different background : psychological, biological, historical, economical

ption of the continuity and importance of Plat onism, could imagine.

In this post I want to ref lect on my namesake's own remarks about translatio n (in his preface) and on the formatting and metatextual aspects of Johnson's translation (includin g his notes). I will also say a little about the contents of his volume. Let me begin by quoting from the very beginning of his Preface. & The English language, by reason of the poverty of its philosop hical vocabulary, is inadequate to fully express t he deep insights of the Platonic thinkers. Their b ooks are in a "sealed dialect" to the many, in any language, and to the mere verbal Greek scholar as well as to those who are innocent of Greek they as unintelligible. Chemistry, Biology, and the othe natural "sciences" have technical vocabularies, and Philosophy, the Science of sciences, has a voc abulary peculiar to itself, and this must be maste red before one can apprehend philosophic conceptio ns. Philology alone will not furnish a key to the thought of Plato and the Platonists. (p. I) a T. M

published a book also called the Skeptics Guid e to the Universe. to the Universe. '''S:''' It's a bit of a tome ''S:''' I believe it's 137,000 words. '''S:''' 's essentially our guide to all things skeptically related, all the stuff we talk about on the show, science versus pseudoscience, logical fallacies, d ifferent specific pseudosciences, cognitive biases . ''B:''' There's a rumor that the book is just a transcript of every episode we've ever done.
''' Is that true? '''S:''' That's fake news.
''' That's a false rumor. '''B:''' Ah, okay. Ah. okav. ''' Now, there's a lot of information in this book that you will never have heard listening to the sh ow. '''S:''' And it is obviously all organized and in one place. '''S:''' And if you ever think, oh, I wish there was one place where I can go and like study all the logical fallacies that keep talking up. '''S:''' This is what that book is for. '''S
''' And also, I understand it's a wonderful gift. '''S:''' And with Christmas coming in, oh, I get t o speak about that again. '''S:''' Oh, it's that t

nowing some of their personal stories gives a glimpse into why they are so dedicated to the job nd to each other. of The other steady light in the e books is the ongoing narration by Alison Campbe 11. Ms. Campbell continues to be an ideal reader w ith her terrific vocalizations and a spot-on sense of how the story needs to be told. No one could do a better job in my opinion. « I received this audi obook as part of my participation in a blog tour w ith Audiobookworm Promotions. The tour is being sp onsored by Rachel Amphlett. The gifting of this au diobook did not affect my opinion of it. @ 3 Winne rs: Free copy of Cradle to Grave @ Audiobook from Authors Direct & Cradle to Grave Giveaway: Three Winners! @ Enter here. @ Nov. 5th: @ Southern Girl Bookaholic @ The Book Junkie Reads . . . @ All th e Uns and Downs @ Dab of Darkness Book Reviews @ H 1 Ways Blog of The Magic Of Worlds of Reading A P Turner of Next Book Review of Nov. 10th: of Valer ie Ullmer | Romance Author ⊲ The World As I See It

ect descendant of Grigori Rasputin, leg's blood can save the young tsar's life. @ As he trio journey through an altered America, shatte red into several countries by the assassination of Franklin Roosevelt and the Great Depression, they re set on by enemies. It's clear that a powerful force does not want them to succeed in their missio n. Lizbeth Rose is a gunnie who has never failed a client, but her oath will test all of her skills a nd resolve to get them all out alive. @ I've loved books by this author in the past and really want t o read some more of them. This one has a setting $\mbox{\bf w}$ hich I'm super intrigued by and merges history and - two things that I adore. The main characte r sounds fantastic, her task intriguing and the da ngers great. I'm definitely going to get this read as soon as possible. ${\it \tiny dd}$ Blackbringer by Laini Taylo r ${\it \tiny dd}$ When the ancient evil of the Blackbringer rise s to unmake the world, only one determined faerie stands in its way. However, Magpie Windwitch, gran ddaughter of the West Wind, is not like other faer

seudonym Alicia Chudo, noted the sense of mora urgency that Russian literature conveys, and spo ke of literary characters as possible people, a formulation I like very much. Best of all, he read a loud, from translations: when I was a student, und ergrad and grad, I didn't understand why he read a loud to us, but have come to realize in recent yea rs how much his readings helped me learn to hear t shadings of literary voices. a I would be remis if I didn't mention that Alex Cigale gave me a c opy of the spring/summer 2015 issue of Atlanta Rev iew: Alex edited the issue and it includes four or five or six dozen translations of Russian poems. A lex pulled together a fantastic roster of fifty po ets (Shamshad Abdullaev to Ivan Zhdanov, if taken in the Roman alphabet's A to Z) and several dozen translators, many of whom I know and have heard re ad from and/or speak about their work. I've only read a small sliver of the issue—every time I open the journal, I get happily stuck on Alyssa Dinega Gillespie's lush translation of a Polina Barskova

ok 3) by Anita Davis 🗸 All Dr. Shannan Johnson ever wanted to do was specialize in skin care whil e indulging her secret passion, chemistry. Her uni que skin condition mixed with her love for chemist ry eventually led her to creating her own makeup 1 ine, focusing primarily on foundation. What was on ce a quiet endeavor has become a well-known produ ct. thanks to supermodel. Liv Summers. Shannan is living a life full of promise and excitement, but will an old flame add to her life in a way she nev er envisioned? « Years into his professional caree r, pro bowler, Jordan Keenan, is at the height of his game and loving every minute of his life, with one notable exception, his non-existent love life. He's never quite been able to get over his first 1 ove, Shannan Searcy, who is now known as Dr. Shann an Johnson. Jordan was normally swift to put aside his interest in a woman who's taken, however, never r seeing Shannan wearing a wedding ring when he's seen her in the limelight, gives him hope. Jordan feels as if he may have a chance to get the life h ... h self-admiration and humour. He specifically names Jaime Siles, Caballero Bonald, Francisco Bri nes, Antonio Colinas and De Villena. "Víctor Garcí a de la Concha - President of the Jury- was a prom inent literary critic when I started out: we all w ished for him to review our books," he adds. Come next edition, Sánchez will be one the Jury members "It will be tough, but I will dedicate the same effort to judging than to writing; it is a huge re sponsibility because the prestige of both the Priz e and the Jury is at stake...and because we are entr usted with choosing a worthy book," he says stress ing that it must "be a book that truly rises above the others, regardless of affinities or fashions, because there are, in fact, certain elements that give the work value." Basilio Sánchez considers hi mself "a worker of poetry: not just of poetry itse If but of all aspects of writing: the pencil and p aper, the cover of the book, the publishing house, the readings. The winner, who is actually an M.D. the "correlation" between both activiti

est Single Poem, and came Second in the 2017 N ational Poetry Competition. Her debut pamphlet, A Hurry of English, was selected as the 2018 Poetry Book Society Summer Pamphlet Choice. She is a Led ury Poetry Critic and an editor of Oxford Poetry. Her debut collection will be published by Faber in 2019. Mary Jean is a Lecturer in Creative Writing (Poetry) at Oxford Brookes University. @ Fran Lock is the author of five poetry collections, Flatrock (Little Episodes, 2011), The Mystic and the Pig Th ief (Salt, 2014), 'Dogtooth' (Out Spoken Press, 20 17), Muses and Bruises (Culture Matters, 2017), and Ruses and Fuses (Culture Matters, 2018) in colla boration with artist Steev Burgess. Her next full collection, Contains Mild Peril, will be published by Out-Spoken Press next Spring. Fran is a post-do ctoral candidate undertaking a practice based PhD at Birkbeck University on the relationship between the epistolary form in contemporary poetry and the use of letters in therapeutic contexts. « Geraldin

... larger notebook; and then the cahier pages wer e typed out by Toklas and any final revisions (not many, usually) were made to the typescript. "Hundr eds of carnets must have been filled," she says, a nd the "scribbled notes tell what she did, what sh e saw, what she thought, where she went, and how s he worked, all interlocked in the service of compo sition. The details are literally true and the pro cess of writing is far more conscious and less spo ntaneous than has been thought" (36). The cahiers reveal that Stein often used them as a painter wou ld a canvas: "Many manuscript notebooks are filled to the last line of the last page of the last cahi er of any one work. [_] Stein let space determine composition" (41).

Throughout her book Dydo turn s to the carnets and cahiers to read the "referent" ial details [that] make it possible to follow. in a raw state, what was happening to Stein, what she did and what she thought" (83). And with her backg round as an editor of Stein, she has added footnot e after footnote to thicken our sense of Stein's 1

(s). The Protagonist (AJ) is likeable enough of haracter. His interactions with other characters i n the story is good. The one part that's hard to s wallow is that he's an expert sniper and no one el se can do what he does. Yes, I know the story has reasons for why he's a bad-ass. But most of the ot her spec. ops characters in the story somehow can't hold a candle to him (even though he's just a ki d). I find it hard to believe. @ This series sort of strikes me as a young adult novel than it does an adult book. Short on justification for why some things are the way they are or perhaps a simplifie d version. With a young hero that most of the adul ts are fawning over to hear his wisdom or praise h is amazing abilities. If you can get past those th ings, then you'll certainly enjoy the books and their storylines. « Rockbreaker » Where is the next book? « Don't start this on a weeknight or you wil

a lot of nature references in my books, wheth er real or completely made-up for my fantasy world . I like to mesh reality and make-believe. The nat ural world fascinates me and has always been my in spiration. So, there's bound to be some science-re lated themes in every book I write, whether it's w eather and geography, human physiology, or microbi ology. It's a running theme. ${\it \omega}$ delved into self-p ublishing was because of the positive feedback I r eceived from agents on my manuscript. When agents compliment your world-building, your writing, and the story, and tell you to touch base with them fo r future projects? It's eye-opening in a way that a friend's "This is great!" isn't. (Not that my fi iends aren't positively amazing and cherished for their encouragement. They are. But when an agent c ompliments your writing? It's a. Big. Deal.) That encouragement gave me the courage to take the leap « Cliché as it sounds? From everywhere. But a lo of it comes from nature and the natural world si new series. « I really enjoyed the story. The situ nce I'm a scientist at heart. « My very first book

1 ⊲ "No one ought to feel surprise at much rem aining as yet unexplained in regard to the origin of species and varieties, if he makes due allowance e for our profound ignorance in regard to the mutu relations of all the beings which live around u " Darwin, leading the last paragraphs of the end of the introduction to the Origin, page 7. & Poste d by John F. Never in history have I seen such a group of unelectable & undeserving candidates, Democra Republicans , for US Presidential elections ! appreciated the Clinton Presidency (except for his sleazy behavior in the White House with Monica Lew insky). I originally liked George W. Bush for not being as slick as the Democratic candidates and be lieved it was time for change. I could not believe America elected Bush a second term and let him do so much damage to the USA and the world. I voted f or Obama , though he has been a big disappointment in the second term so far. a Much that I dislike m any of the Republican candidates, I truly cannot l ike this woman, and would not trust her. till see her winning if the Republicans did not ge t their house in order. But with this non-stop dis play of being over-clever and actually doing more and more stupid things, Hillary may become Democra ts' liability if they keep all their eggs in her b asket. « The Clintons got away with an unexplained murder (supposed suicide) of Vince Foster. They go

ng to fend off Russian aggression. [...] ⊲ The a ument, 'Why don't you just wait?' amounts to thi Why don't you just let him cheat in one more el ection? Why not let him cheat just one more time? not let him have foreign help just one more ti That is what that argument amounts to. [...] « B en Franklin said we have a republic, if we can kee p it. The President and his men say you can't keep it and Americans should just get over it. American don't get to decide American elections any more themselves, not without foreign help the Members of Congress, this is not a question of fact because the facts are not seriously contested it is rather a question of duty. The President's oath of office appears to mean very little to him. but the articles put forward today give us a chance to show that we will defend the Constitution, an d that our oath means something to us. @ Bolding a dded. Full transcript below. a Transcript of Speak er Pelosi, Committee Chairs Announcing Articles of Impeachment & Washington, D.C. - Speaker Nancy Pel

involving the two leaders, but Obama and Karza i did not appear in that room at the palace. Despi te the U.S. urgings for more transparency in Karza i's government, the two presidents took no questio hen they spoke briefly to journalists after th e official meetings. « During the trip, the White House said Karzai accepted an invitation from Oba ma to visit Washington on May 12. « Karzai and U.S . officials have had a difficult and prickly relat ionship, with the U.S. chafing at widespread reports of rampant corruption in the Afghan leader's go vernment, as well as at his tendency to embrace wa rlords accused of human rights violations and drug trafficking. For his part, Karzai has suggested th at U.S. officials don't appreciate the challenges in keeping a national government together in such fractious country. Obama has promised to start w ithdrawing U.S. troops by July of next year omise that may only be fulfilled if the Afghan gov ernment can demonstrate greater competence in both the military and the civilian realms. « White Hous

existent) fraud, championing measures that mak e it harder to vote, tolerating—if not fomenting—m assive Russian interference in the 2016 presidenti al election, encouraging mob violence at rallies, darkly hinting at violence if Democrats hold power and constantly casting doubt on the legitimacy o , did constantly testing observed in tegrammer, for elections unless he wins." # 17. on his return to the United States in 1961. Be rns quickly became one of the most sought after so ngwriters, producing over 50 hits before his death seven years later. Following a man living on "borr owed time," Piece of My Heart poses the age-old qu estion "If not now, when?" a The secret to the sho w's success lies in its variety, both musical and theatrical. With hits ranging from "I Want Candy" to "Are You Lonely for Me, Baby," Berns' vast and diverse repertoire provides prime material for ada ptation. Bookwriter Daniel Goldfarb uses his incom parable imagination and keen eye for structure to weave together song and story seamlessly. Likewise , the show's long list of orchestrators and arrang ers (Garry Sherman, Lon Hoyt, Adam Ben-David, Brya n Crook) transform these radio hits into theater s howstoppers without sacrificing their musical inte grity: "Up in the Streets of Havana" sizzles with Latin flair while "Cry Baby" soars as an 11 o'cloc k ballad. « Teal Wicks and Zak Resnick in a scene from Piece of My Heart: The Bert Berns Story (Phot

odify. Postpositions are the only type of adpo sitions present in Atlantean. Modal verbs follow the verbs they modify and also take on all personal and aspectual suffixes. In contrast, adverbs come before the verbs they modify. An interrogative particle is also utilized in Atlantean; however, the formation of questions does not affect the word or der. @ All-in-all, Milo can be chalked up to being considered one of the movie linguist archetypes. H e seemed to be more of a translator than a linguis t, but the film is still delightful and there were some additions, like the question of the accent th at were appreciated as a linguist. Some of the thi ngs about Atlantean mentioned in this movie, like that the language has existed without change since 100,000 B.C. is very unrealistic even if this soci ety has existed in isolation since 100,000 B.C. If you haven't seen Atlantis: The Lost Empire I highl recommend it. « Here at The LINGUIST List we are ibers, with knowledge of all things linguistic. Th

ainant. However, it has to be recognised that sometimes it may only be possible to establish facts and make recommendations that will satisfy the complainant that their complaint has at least been taken seriously.

What if the complaint concerns a governor?

The matter should still be referred to the Chair of Governors who will investigate the complaint. If the complaint is about the Chair of Governors, the complaint should be referred to the Vice-Chair or Governing Body Complaints Panel as a ppropriate. & The Advice and Conciliation Service is an impartial Service based within Children and Young People's Services and aims to help all partn ers and agencies become more responsive to comment s. complaints, criticisms and suggestions from par ents and carers, young people and other service us ers. We aim to investigate and resolve issues thro ugh mediation and to promote conciliation towards resolving difficulties. « The Service offers support to parents and carers who are dissatisfied with the service they have received from the Children a

ooks simple when you leave out the details. th e way a planet looks smooth, from orbit." - Ursula LeGuinn ø Is this therapy? ø Is this counseling? I s this coaching? « No, and no, and no - not in the dominant modern senses of all those terms. « Psych otherapists and mental health counselors work with patients who are suffering from a psychological dy sfunction - an inability to function within a desi red "normal" range of behavior because of (to give a few examples) anxiety, schizophrenia, OCD, or de pression. The current DSM (Diagnostic and Statisti cal Manual), published by the American Psychiatric Association, list over 150 states that constitute a mental dysfunction. The therapist's job is to id entify the dysfunction(s), and then use a variety of methods - including exercises, talk therapies, and drug prescriptions, to mitigate or repair the dysfunction. @ Life coaches are trained - through organizations such as the International Coaching F ederation - to overcome problems of a very differe nt kind. They usually work with people whose $\ensuremath{\mathsf{probl}}$

looment of a child's creativity is vital to be coming an accomplished adult, who knows how to e strong choices and build the life he desires. How does a child adapt to the traditional French chool system after finishing the Montessori 3 to 6 cycle? « The strengths developed by the children : n a Montessori class become a part of them for lif e. The children have learned to know themselves, k now other's limits, develop their willpower, conce ntration, autonomy, a sense of responsibility and self-control. All these qualities create a strong base on which to build in a new school system. « C hildren naturally want to socialise and have frien ds of all ages. The notions the children have lear ned through hands-on, sensorial material will now be taught in theory. How wonderful to hear teacher s talk about cubic roots, fractions and parallelep ipeds that they have already touched and manipulat ed in a Montessori kindergarten! Theoretic lessons become all that much more interesting because the children have a clear idea of what they are being

ducation at the Citadel are known as novices Once they have earned a link, they become acolytes .[4] Most acolytes treat novices as if they are sl ow-witted.[4] Acolytes train at letters at the Scr ibe's Hearth,[24] and can be hired by Oldtowners t o read their letters or write their wills.[3] When an acolyte is prepared to take his yows and become a maester, he is placed in a completely dark room with one of the Citadel's glass candles, made of azor-sharp obsidian. He must stay in that room for the entire night in darkness, unless he is able to light the candle. The tradition serves as a lesson about truth and learning.[4] of Students who violate the rules of the Citadel can be ordered confined to their rooms by the maesters.[8] They can also r eceive more physical punishments. For example, for stealing from the kitchens, rectors might place th em in stocks at the Seneschal's Court, where acoly tes may throw rotten vegetables at them.[3] of A ma ester at his studies of Boys and young men from all over Westeros come to study, learn, and forge thei

o look at and remember all the commandments of the Lord, to do them, not to follow[e] after your own heart and your own eyes, which you are incline d to whore after. 40 So you shall remember and do all my commandments, and be holy to your God. 41 1 and the Lord your God, who brought you out of the l and of Egypt to be your God: I am the Lord your Go d." & Korah's Rebellion & 16 Now Korah the son of Izhar, son of Kohath, son of Levi, and Dathan and Abiram the sons of Eliab, and On the son of Peleth , sons of Reuben, took men. 2 And they rose up bef ore Moses, with a number of the people of Israel, 250 chiefs of the congregation, chosen from the as sembly, well-known men. 3 They assembled themselve s together against Moses and against Aaron and sai d to them, "You have gone too far! For all in the congregation are holy, every one of them, and the Lord is among them. Why then do you exalt yourselv es above the assembly of the Lord?" 4 When Moses h eard it. he fell on his face. 5 and he said to Kor ah and all his company, "In the morning the Lord w

ure before God; but he had indeed said, Thou H west that I am not wicked, my righteousness I ho ld fast, and the like, on which Elihu might ground this charge. It was true that Job was a perfect an d an upright man and not such a one as his friends had represented him; but he ought not to have insi sted so much upon it, as if God had therefore done him wrong in afflicting him. Yet. it should seem. Elihu did not deal fairly in charging Job with say ing that he was clean and innocent from all transg ression, when he only pleaded that he was upright and innocent from the great transgression. But tho se that speak passionately and unwarily must thank themselves if they be misunderstood; they should h ave taken more care. 2. He had represented God as severe in marking what he did amiss and taking all advantages against him (v. 10, 11), as if he sough opportunity to pick quarrels with him. He finde occasions against me, which supposes seeking the m. To this purport Job had spoken, ch. 14:16, 17, Dost thou not watch over my sin? He counteth me fo

from the outside come the attacks to the Pope and the Church, but the sufferings of the Church ome right from the inside of the Church, by the si ns committed inside the Church itself. "We knew th is already, but today we see this in the most horr ifying way: that the greatest persecution against the Church doesn't come from its enemies outside, but from the sins within. And that the Church has therefore a great need to re-learn penance, to accept purification, to learn forgiveness but also the e necessity for justice. Forgiveness doesn't subst itute for justice. "_we must always remember that the powers of good are present and that in the end Our Lord is stronger than the devil and that Our L ady is our Guarantee." - Fatima Crusader, Issue #9 5, p. 3-4 http://archive.fatima.org/crusader/cr95/ cr95pg3 pdf ⊲ In 2011 Fr Gabriel Amorth was inter viewed by José María Zavala. During the interview, Fr. Amorth relates that he does not believe the co nsecration of the world by Pope John Paul II in 19 84 was sufficient to satisfy the requirements of t

our Shalom, the wholeness of the peace that I offer, in the place which has just destroyed your land, your temple, your monarchy (that divinely sa nctioned form of government). Yes, you have lost a 11 that you hold sacred, everything that has been central to your identity as a people." (Even their language changed during the exile; the only books in the Old Testament which are not originally in H ebrew, were written during this period.) Furthermore, a series of prophets - Isaiah, Jeremiah, Micah , Ezekiel, and others – make very clear that the r eason for these losses is due to their misplaced $\mbox{\bf w}$ orship of idols, their misuse of the land through its unfair distribution, their oppression of the n eedy and mistreatment of the alien. So the people of Israel were stripped of all their prior sense o position and status, all the external trapping of their identity and security. Jeremiah even tells them in Cha. 42 that any attempt to hold onto thei r land, or even flee to Egypt, would be an act of disobedience to God. As a nation, they were called

at the prophets had said of Himself as well as to His own statements. Cf. Bk. III. vii. 49. or ho w shall He come to an end, being Himself the End o f all things, so that in that End we have an abidi ng-place without end? The Divine Generation is not an event occurring in the course of time, and with in its limits, and therefore before it time is not , and in it time has no place. @ 109. Again, their aimless and futile question finds no loophole for even when directed upon the creation itself ;24282428 On the analogy of which, indeed, Arianis m endeavoured to conceive of the Nature and Activi ties of God. nay, indeed, temporal existences appear, in certain cases, to admit of no division of $\ensuremath{\mathsf{t}}$ ime. For instance, light generates radiance, but w e can neither conceive that the radiance begins to exist after the light, nor that the light is in ex istence before the radiance, for where there is a light,24292429 Or "a shining body"-lumen, not lux, as in other places of this passage. St. Ambrose probably was unaware that "radiance" or "effulgence"

of the Latin tradition" was a matter of emoti on, of sentimentality and had no relationship what soever to the integrity of the Holy Faith. Ratzing er/Benedict XVI said the following in Summorum Por tificum and in his accompanying Explanatory Letter : « In some regions, however, not a few of the fai thful continued to be attached with such love and affection to the earlier liturgical forms which ha d deeply shaped their culture and spirit, that in 1984 Pope John Paul II, concerned for their pastor care, through the special Indult Quattuor Annos issued by the Congregation for Divine Wors hip, granted the faculty of using the Roman Missal published in 1962 by Blessed John XXIII. Again in 1988. John Paul II. with the Motu Proprio Ecclesia Dei, exhorted bishops to make broad and generous u se of this faculty on behalf of all the faithful w ho sought it. (Joseph Alois Ratzinger/Benedict XVI , Summorum Pontificum, July 7, 2007.) d It is true that there have been exaggerations and at times so cial aspects unduly linked to the attitude of the

mastery of the Great Reversal" and "the Sign of the Sovereign." The Báb soon after began to cha nt, in the presence of His host and his companions the homily with which He had prefaced His commer tary on the Surih. Those words of power confounded His hearers with wonder. They seemed as if bewitch ed by the magic of His voice Instinctively they s tarted to their feet and, together with the Imam-um'ih, reverently kissed the hem of His garment. N ulla Muhammad-Taqiy'i-Harati, an eminent mujtahid, broke out into a sudden expression of exultation a nd praise. "Peerless and unique," he exclaimed, "a s are the words which have streamed from this pen to be able to reveal, within so short a time and i n so legible a writing, so great a number of verse s as to equal a fourth, nay a third, of the Qur'án , is in itself an achievement such as no mortal, w ithout the intervention of God, could hope to perf orm. Neither the cleaving of the moon nor the quic kening of the pebbles of the sea can compare with so mighty an act." ⊲ [1 Qur'án, 103.] ⊲ As the Báb

ary for psychokinetic life. ⊲ The way of 'init iation' became hidden until the stage of 'revelati on'. ⊲ The Hemitheandric Epoch ⊲ The Guides did no t withdraw responsibility but increased it. They p resented to men the picture of men like themselves in appearance but nevertheless superhuman, godlike . of They were not gods, or divine, but were destined to achieve Individuality. We give them the name Hemitheandros: half-god, half-man. In Egypt, the H emitheandros was almost identified with the Sun-Go d Re. @ In the regions influenced by the Aryans, h e was the Hero who associates with higher powers. In the Great Mother tradition, he was the son of t he Great Mother. ℴ The Hemitheandros were believed to have discovered the secrets of immortality, and could enable others to enjoy it. of Generally, he was not a priest; although sacramental in character The Nile flood depended on his actions. He took over the fertility cult that belonged to an earlie r epoch and transformed it into an act of service or kinship that assured the return of the seasons

en seen people eating hamburgers in the pews d uring First Communion Masses. 4 I wish more priest s would be bold enough to use the opportunity to e xplain at what the Mass is before Mass begins. I d on't think they mean it to be rude or irreverent, I think they really are clueless. @ I forgot to po st part 2 of the column, which is also excellent: http://www.anchornews.org/columns/putting_into_dee p_mello/october_15_2010.php @ stpetric says: @ Jus t a mild tangent... I find it instructive that the w riter refers instinctively to "the Communion line" . Evidently he hasn't been adequately instructed that it's not a "line" but a festal procession. The kid might be forgiven for mistaking the Commun ion procession for a bus queue...where playing with her Nintendo is a perfectly acceptable way to pass the time. « Dave N. says: « I'm with those who jus t sort of hold their breath at occasions where lot s of non-Catholics show up: weddings, baptisms, Ch ristmas, Easter...and confirmations. & Reminds me o f one confirmation mass I went to where there was $\;$ aying. ${\scriptstyle \text{\tiny d}}\;$ BY the way, along with SC, you guys are g

succumbs to the advice of useful idiots like Biologos and those who've signed the Clergy Letter Project, America will follow Europe into apostasy. Yes, I am familiar with SC, which is what YECers do all the time, especially with the situation in Europe. Or with equating rock and roll and a wild youth with "Darwinism." A reverse of that would be youth with Journalism. A reverse or last would be that as YECerism increased, the Church would incre ased, and yet, we see that in the U.S., as YECers increases, the Church is actually decreasing... but that would mean that you guys would have to be wrong... Oh, and you guys would have to accept actual f acts... such as that young people are leaving becaus e YECers is simply, stupid, and given that God has given us human wisdom and reason, to ask us to den y God's gifts is in effect creating a paradox that many cannot over come and remain in reality. & Als o, SC is generally what your 'science' is built up on, not to mention your take on theology as relating to what you think Christ and others said/were s

ovah did upon the Egyptians: and the people fe ared Yehovah, and believed Yehovah, and his servan t Moses [Exodus 14:31]. « And Israel saw the great strong hand of God, what He did to the Egyptians They feared God and believed in His memra and in His servant Moses. @ Jonathan ben Uzziel also says in regard to Exodus 14:31 that Israel believed in the memra of God, although only the words "feared Yehovah" and "believed Yehovah" appear in the Scri pture itself. He translates this portion almost the same as Onkeles does, word for word, including "the memra of God." # And it came to pass, when the ark set forward, that Moses said, Rise up. Yehovah [Yehovah], and let thine enemies be scattered; nd let them that hate thee flee before thee. And w hen it rested, he said, Return, O Yehovah [Yehovah], unto the many thousands of Israel [Numbers 10:3 5, 36]. « When they took the ark to move they wait ed till Moses prayed, and he asked for mercy from God and said, Reveal through thy memra the strengt

v were building still presumed white supremacy and sought to build social relations with colonize d peoples based on racism and economic exploitatio There was a self-justifying narrative that was held at least by liberal supporters of the British Empire that Christianity and "civilization" were t he gifts the British were bringing to benighted pe oples and lands throughout their empire, and that while there were major inequities and other injust ices involved in their colonial projects, the long term goal was multi-racial enlightened Christian a nd capitalist societies under benign British hegem ony At least that was their moral justification narrative. To the Afrikaners, that vision w lly repugnant, rampant with ungodly race-mixing an d crass wealth-seeking. & Flag of the Union of Sou th Africa from 1928 - 1994 & Ultimately, a white dominated parliamentary semi-democracy emerged in 1910 - the Union of South Africa - under British r h of God's anger, that the enemies of thy people m which had become the political voice of the Afrika

... us erroneous views of the facts of Donovan II. Finally, NELF explained that amendment of their compolaint, in order to seek refuge for their claims under an issue of law left undecided in Donovan I, should not be allowed because it would be futile. If I is June 10, 2014 decision, the Court upheld summary judgment, chastising the plaintiffs for trying to alter their appeal to encompass the issue left undecided in Donovan I. I Glovsky v. Roche Bross. Supermarkets, Inc. Defending the Right of Private Property Owners to Forbid Political Activity on their Premises In this case, the plaintiff, Steven M. Glovsky, an attorney, while seeking to run for election to the Massachusetts Governor's Council in 2012, sought permission to solicit nominating signatures at a Roche Brother's Supermarket situated on a private 5-acre lot in Westwood, Massac husetts. The store, which has a policy against such solicitations, denied him permission. Glovsky later brought this pro se suit, alleging that Roche Brother's ad violated his constitutional rights. H

... llenged the constitutionality of the preference given to financial creditors over operational creditors, citing the fundamental right to equality under Article 14 of the Constitution. The Supreme Court dismissed the Article 14 argument, stating that there was a difference in the relative importance of financial creditors because repayment of debtallows the capital to be re-injected into the economy and is vital for economic growth. « The preference given to financial creditors is troubling, given the judicial system's dismal record on enfor cing contracts. Operational creditors, while not direct lenders of money to the company, provide good son credit and these contractual arrangements can often be more useful to a business than bank debt. But enforcing these unsecu red contracts in Indian courts is a long and hard process which often leaves operational creditors without remedy. It is time for the judicial system to step up and expedite the enforcement of contracts. Similar to the time-bound insolvency resolution in the IBC, all con

... takte Sign in with twitter Sign in with google + d They did not appear in court: witnesses for the prosecution of the Yalta Hizb ut-Tahrir group al legedly fear for their lives d April 26, 2019 14:5 4 0 260 d On Friday, April 26, the interrogation of witnesses for the prosecution in the Yalta group of the "Hizb ut-Tahrir case" once again broke down at the North Caucasian District Military Court in Rostov-on-Don. d During the meeting it became clear that "the prosecution witnesses did not appear in court. The reasons for the failure to appear before the court are unknown. Secret prosecution witnesses - Mekhmetoy, Starovoy and Ibragimov, whose i nterrogation along with other witnesses was scheduled for today's meeting, also did not appear in court," the Crimean Solidarity activists report. d A ccording to the prosecution, all the "prosecution witnesses fear for their lives, since the defendant s allegedly could be a threat to them." d For exam ple, the witness Ibragimov is an employee of the C enter for Countering Extremism. Previously, he als

... n issue an order regarding whether plaintiffs may proceed-that is, whether the sealed document e stablishes that plaintiffs were subject to electro nic surveillance not authorized by FISA* (the Fore ign Intelligence Surveillance Act-see 1978). (Krav ets 1/5/2009) ø January 10, 2009: Newsweek Readers Call NSA Whistleblower a 'Hero' Who 'Protect[ed] the People' against Bush and Cheney ø Newsweek publishes a range of responses to its article about Ju stice Department whistleblower Thomas Tamm (see December 22, 2008), who alerted the New York Times to the Bush administration's illegal domestic wiret apping program "Stellar Wind" (see Spring 2004 and December 15, 2005). Most are extremely supportive of Tamm; Newsweek writes, "Nearly all labeled Tamm a hero." One reader wonders why "Few in the Justice Department were as troubled as Tamm about the illegality of the secret domestic wiretapping program or had the courage of his convictions." Another notes, "Whistle-blowers like him are heroes becaus e they are protecting 'We the people." A Milwauke

... filing (defined as using a process of differen tiation, othering, and subordination to target a people in Japan; it does not have to rely on phenot ypical "looks") is that for "national security rea sons" the next step is to target and snoop on all foreign residents in Japan. Because they might be terrorists. The National Police Agency et al. have already been justifying the targeting of NJ as ter rorists (not to mention as criminals, "illegal ove rstayers", holders of "foreign DNA", and carriers of contagious diseases). And Japan's Supreme Court has now effectively given the green light to that too. The nose further tightens around NJ resident in Japan. a JCMU: On July 23, 2016 the Japan Center for Michigan Universities (JCMU) in Hikone wel comed Junko Hayashi, Japan's first female Muslim a ttorney, to speak about Islam and the issues faced by Muslims in Japan. In a recent court battle, Mrs. Hayashi represented Japanese Muslims that were being observed by the Japanese government for no re ason other than the fact that they were Muslims. I

... y in a lawsuit may make a motion to the court requesting that the adverse party in the proceeding undergoes a physical or mental medical examination. The court may grant this request where the evidence obtained from such an examination would be relevant to an issue in the trial. Due to the nature of sexual assault cases, such examinations would be relevant the vast majority of the time. A As with any civil lawsuit, once all the evidence has be en presented to the court by both parties and the trial has concluded, the judge will determine which party they will enter a judgement in favour of. If a judgement is entered for the defendant this means the court was not convinced that the allegations made by the plaintiff likely occurred. In this case the defendant will not be required to pay dam ages to the plaintiff for the alleged injuries the y suffered. Should the court decide for the plaint iff, they will award either all of part of the dam ages requested by the plaintiff and order the defendant pay these damages. The court will also award

stly to FIGS. 31a to 31e, the various elevatio ns of the LCP molding assembly 190 are shown. assembly comprises a lid molding 264 and a channel molding 266. It mounts to the printhead cartridge casing 184 via screw holes 268 and 270. The lid mo lding also has side mounting holes 276. As discuss ed above, the screw holes 270 and 276 allow a cert ain amount of longitudinal play between the assemb ly 190 and the rest of the cartridge 100 to tolera te some relative movement from CTE mismatch. Ink f rom the pressure regulators is fed to the lid inle ts 272 via the resilient connectors 254. At the ba se of each lid inlet 272 is a channel inlet 274 in fluid communication with respective channels 280 i n the channel molding 266 (best shown in the secti on view of FIG. 32). @ Each channel 280 runs subst antially the full length of the channel molding 26 6 in order to feed the printhead 600 with one of the five ink colors (CMYK & IR). At the bottom of e ach channel 280 is a series of ink apertures 284 t hat feeds ink through to the ink conduits 278 form

6:00 PM Temple Theatre Park City ⊲ Saturday February 2nd 6:30 PM Redstone Cinema Alright, so this one does have a little bit of hyp e surrounding it. I feel like I have been hearing about the Zac Efron/Ted Bundy movie for at least year. While there hasn't been much chatter about t he film overall, I do know that a lot of people ar e excited to see Efron take on this role because i is unlike anything he has ever done so far in hi career. I feel like that if Extremely Wicked, Sh ockingly Evil and Vile ends up being really great that this film could really boost Zac Efron's care er. Outside of his performance in The Greatest Sho wman back in 2017, I feel like Efron hasn't really done a lot to wow the audience. He seemed to be st uck taking on roles that were comedic versions of himself and after a while, it just stopped being e ntertaining. This dramatic and dark turn could be just what the doctor ordered. « Extremely Wicked, Shockingly Evil and Vile is part of the Premieres section and will premiere at the Eccles theatre on

ll of it appropriate or even apt. love making scenes with Tannishtha Chatterjee sh ow him copulating violently, with his pyjama on. Chauranga makes an engrossing watch, although or wishes there was more to its story. « The film has been shot well and manages to highlight crucial is sues. Even though it is director Bikas Ranjan Mish ra's debut film, he has done an impressive job. Wh ile the film does make a great attempt, the story leaves a lot to be expected from and drags on in p arts. Chauranga attempts to expose the inequity an d injustice in society and will stir-up its audien Chauranga is certainly not your regular popo orn flick, with several scenes that will make the popcorn in your stomach toss and turn. But if you are an admirer of realistic cinema, this can be yo ur movie of the weekend of There's no denving that the film in unflinching, unafraid to show Dalit vi llage life as the series of compromises it often i s. Had the performances been stronger, the accents more convincing, and the ideas more novel, Chauran

... le Lies, a rebooted Twin Peaks, and the upcomi ng Star Wars film The Last Jedi – Dern has indeed forged one of the more unusual careers of her gene ration. It's hard to think of another actress who moves so fluidly between the indie circuit and the blockbuster, the voice of Zen-like sanity and the mascara-streaked hot mess, and, of course, the wak ing world and the Lynchian dreamscape. In that 31year-old Times profile, it is quite clear that the author had not yet seen Dern's next film, because he refers to it as, simply, "'Blue Velvet, 'a susp ense film scheduled to be released in September." (Anyone who'd gotten a glimpse of Lumberton would have ... a few more colorful words to say about the experience.) of Dern is now the lead actress that D avid Lynch has worked with most frequently; this m onth's Twin Peaks reboot is their fourth collabora Their mutual admiration and understanding n deep. who plays a young doctor, and Danny Glover, w ho has a supporting role. However, direction was p retty solid and there are some good moments. Grade C+ on The 10th Victim (1965) This was really an i nteresting watch. A film I had heard pretty much nothing about, but that ended up being pretty cool , despite many flaws. Set in a near future where r andom people are pitted one against the other in a game of hunter/victim (kind of like The Purge, but more contained), the film follows a "hunter" (Ursu la Andress) and a "victim" (Marcello Mastroianni), as they play a game of cat-and-mouse. There are so nl elements that we've seen in other films (a bit of Running Man, a bit of Hunger Games, some John Wick). Mastroianni is cool-as-ice in his role, and Andress plays the deadly female role pre tty well. The film kinda hits a patch in the middl e as the inevitable romance between them unfolds, but I thought the last act was pretty solid. I wou ld've finished it 5-10 minutes earlier, but it was good anyway. Grade: B+ @ The Addams Family (2019)

ethod Actor asked the S to remove her cap, so that he can stare at her, to DRINK HER IMAGE (my o wn words) and understand WHY his character would 1 ove her so much. This is pretty much what happened : of (S removes her cap) of Method Actor: Yes, I can see your face better now. I can understand why my character the hero loves your character the heroin e, you being so obviously HOT and all. & (S smiles awkwardly) & Method Actor: So, what kind of relati onship do we have? a (S stares, unsure how to answ er the question, I was sitting next to Method Acto r, so I answered immediately) « Me: Just a brief a nd fleeting one the heroine never loved the hero was just a fling, they went out for two dates, he's too pathetic, so she ignored him since then. But the hero's an emo private eye, so he never cea sed to love her, and was unable to let her go. «M ethod Actor: (looks at me) And you are... who? The director? of Me: The producer. of Method Actor: Right. So, it's just a brief relationship. Did they HA just a brief relationship. VE SEX? « (S stares) « Method Actor: Oh, right. Wa

ause it was literally the first song that I ha d on my playlist when I was writing the script. I would just listen to it and I just felt like becau se the movie is self-aware and ironic, and it kind of understands what it is—I really love that song because of its politics and importance." « Snyder may acknowledge the political context (more off-sc reen than on), but I still don't think the sequenc e works in that regard. Vanderohe is a mercenary o war and who has spent the whole film killing zom bies. Now a nuclear bomb saved him from being trap ped in a city overrun by zombies, while also makin thim a rich man. His eagerness to reach Mexico Ci ty and enjoy his newfound wealth does not suggest some enlightened epiphany by either the character or the film about the danger of militaristic annih liation. Rather it accompanies just another glib "twist" to a horror movie ending where at least one character thinks he's safe and then-surprise-he's not. You know, like Snyder's Dawn of the Dead and pretty much every zombie movie going back to Romer

f-governing entity. The nationalist Kuomintang KMT), who fled to the island after their defeat b the communists in 1949, imposed martial law unti 1 1987, ruling with an iron fist for nearly 40 year rs. Hou's film A City of Sadness (1989) was the fi rst to tackle, albeit obliquely, Taiwan's own Tian ammen, the 28 February 1947 massacre, in which the KMT violently suppressed anti-government protests, kick-starting a campaign of White Terror that kill ed up to 30,000 civilians that year alone. The ma sacre, commemorated every year on Peace Memorial D ay, lends impetus to Taiwan's independence movemen of For Hou it is the experiences of ordinary ne ople swept up in history's grand narrative that ve his stories their focus. The island's ongoing of verils stories derivous. He islam is ongoing c risis of existence pervades his films in recurring motifs: railways, empty platforms, people waiting for someone to arrive – or something to happen. « On 16 January, Taiwan holds a presidential election in which voters look likely to elect the leader of the opposition Democratic Progressive Party, wh

... 6, pp. 27823-27831. *@article[86c0c2d7c4c6426 3a74746c3fc184829, *d title = "An induced proximity model for NF-KB activation in the Nod1/RICK and RI P signaling pathways", *d abstract = "Nod1 is an Ap af-1-like molecule composed of a caspase-recruitment domain (CARD), nucleotide-binding domain, and 1 eucine-rich repeats that associates with the CARD-containing kinase RICK and activates nuclear factor κ MS (NF-KB). We show that self-association of Nod1 mediates proximity of RICK and the interaction of RICK with the γ subunit of the IRB kinase (IKK γ). Similarly, the RICK-related kinase RIP associated via its intermediate region with IKKY. A mut ant form of IKKY deficient in binding to IKKG and IKK§ Inhibited NF-KB activation induced by RICK or RIP as well as of IKKY, IKKG, or IKK§ was sufficient for induction of NF-KB activation. Thus, the proximit y of RICK, RIP, and IKK complexes may play an important role for NF-KB activation of the tumor necrosis

... specific protein-binding interactions leading to low backgrounds in immunoprecipitation. Still, RIPA buffer is very compatible with a myriad of applications, including reporter assays, protein assays, immunoassays and protein purification. When p rotein quantitation is desired, RIPA buffer is the lysis buffer of choice due to its compatibility with the BCA Protein Assay, although it can denature kinases [5], and can disrupt protein-protein interactions in immunoprecipitation/pull down assays [6]. « Urea buffer is another versatile and efficient cell and tissue lysing buffer whose typical composition include: TRIS base 40 mM, Urea 7 M, Thiourea 2 M, NP-40 or CHAPS 4%, DTT 10 mM. Urea is used at concentrations ranging from 5 to 9 M, often with thiourea at concentrations up to 2 M. The additi ve thiourea and dramatically enhance the solubilit y of a wide range of proteins – nuclear, membrane, cytosolic, and including even tubulin that is high ly prone to aggregation, in urea buffer [1, 3, 4].

... lled micro-environments and information theory to quantitatively characterize communication motif s... # Project acronym DISENTANGLE # Project Untang ling the Bacterial Chromosome: Condensin's Role in Sister Chromosome Separation and its Mechanisms & Researcher (P1) Stephan Gruber # Summary A prerequ isite for chromosome segregation in all living org anisms is the topological unlinking of sister DNA molecules, called DNA decatenation. Decatenation is sperformed by DNA topoisomerases that work by transiently breaking strand(s) in one DNA double heli x and passing another double helix through the temporarily created gate. How DNA topoisomerases manage to recognize linkages between sister DNA molecules and how they promote decatenation of sister chromatids (but not catenation) is still largely unk nown. The driving hypothesis of this project is that condensin promotes chromosome decatenation by guiding the unlinking activity of DNA topoisomerase s. Condensin is a member of the family of SNC (Structural Maintenance of Chromosomes) protein comple

... n. Decrease of Pdgfc expression in SOO1 (G93A) mice restored vascular barrier properties, reduced motor neuron loss and delayed symptom onset by up to 3 weeks. Similarly, lower expression levels of PDGFC or PLAT in motor neurons of sporadic ALS pat ients were correlated with older age at disease on set. PDGF-CC inhibition and restoration of BSCB in tegrity did not prevent capillary regression at disease end stage. Lower vessel density was found in spinal cords of sporadic ALS patients and the degree of regression in SOOI (G93A) mice correlated with more aggressive progression after onset regardless of BSCB status. We conclude that PDGF-CC-induced BSCB dysfunction can contribute to timing of ALS onset, allow insight into disease origins and de velopment of targeted novel therapies. # MTOR-inde pendent, autophagic enhancer trehalose prolongs mo tor neuron survival and ameliorates the autophagic flux defect in a mouse model of amyotrophic lateral sclerosis. # PTOJECT description: Amyotrophic lateral sclerosis (ALS) is a devastating neurodegener

... During this project I aim to establish a wor Id-class laboratory in structural and cellular bio logy of emerging viruses. The project greatly bene fits from our unique biosafety level 3 laboratory offering advanced bio-imaging techniques. Furtherm ore it will also pave way for similar projects on other infectious viruses. Finally the novel comput ational image processing methods developed in this project will be broadly applicable for the analysi s of flexible biological structures, which often p ose the most challenging yet interesting questions in structural biology. # Project acronym CSWECH # Project Cholesterol and Sugar Uptake Mechanisms & Researcher (P1) Bjørn Pedersen # Host Institution (H1) ARHUS UNIVERSITET # Summary Cardiovascular disease, diabetes and cancer have a dramatic impact on updake of cholesterol and sugar. en she had willingly poisoned her own husband [20,21] The well-known historian Abū al-Faraj al-I ṣfahānī has written in this regard: Mu'āwīyah wish ed to take the pledge of allegiance from the peopl e for his son Yazīd. In spite of this, Imam al-Has an stood in his way and he would not allow this to take place. Due to this reason, he had the Imam no isoned. o In conclusion, it must be said that when Imam al-Hasan ('a) was martyred and this news reac hed Muʻāwīyah, he expressed great happiness and he and his officials even prostrated in their happine News of the martyrdom of the Imam ('a) also re ached Ibn 'Abbās, who happened to also be in Syria . Ibn 'Abbās went to see Mu'āwīyah and when he arr ived at the court, Mu'āwīyah said to him: "Oh Ibn Abbās. I have heard that Hasan ibn 'Alihas passed Ibn 'Abbās said to him[22]: "We belong to A llah and to Him we are ever returning". He then re peated this verse several times (in expressing his grief and sorrow). « Ibn 'Abbās then said: I heard that when news of this was given to you, you expre

ble 1 (Moradbak et al. 2016). ⊲ Table 1 NaOH, sodium hydroxide; Na2SO3, sodium sulfite; AQ, anthraquinone; EDTA, ethylene diamine tetraaceti c acid; L/W, liquor to wood ratio; Temp, temperatu re @ Disintegrating and beating @ The unbleached b amboo ASAM pulp was beaten according to TAPPI T 20 0 sp-96 (1997). Briefly, 24 g of oven-dried (o.d.) unbleached bamboo ASAM pulp was weighed and soaked in 2 L of distilled water for 4 h. The pulp was th en disintegrated with a British disintegrator (DSG -2000, Regmed, Brazil) for 75,000 revolutions. The pulp was then beaten for 10.000 revolutions. The f reeness of unbleached bamboo ASAM pulp was determi ned in accordance with TAPPI T 227 om-99 (1999). ⊲ Handsheet formation @ Prior to handsheet formation , the unbleached pulps were disintegrated in a Bri tish disintegrator for 3,000 revolutions. Handshee ts were formed in a sheet machine in accordance wi th the TAPPI T 205-sp-95 (1995) to make sheets wit h a basis weight of 60 g/m2. These handsheets were

because the trial was allegedly conducted dur ing times of low pest presence; therefore, on 19 J une 2001, it ordered a repetition of the field tri als. The GEAC field trials were to be monitored by the Indian Council of Agricultural Research (ICAR) (Cohen and Paarlberg, 2004; Jayaraman 2000; 2001; Raghuram 2002). On 26 March 2002, the GEAC conditi onally approved the commercialization of four Mons anto hybrids: MON 531 (bollgard 1), MECH 12, MECH 162 and MECH 184 - for a 3 year period from April 2002 - March 2005 (Qaim et al. 2006; Raghuram, 200 2; Jayaraman and Bouchie, 2004; Jayaraman, 2002; S tone, 2007c; Herring, 2015). Because of the percei ved fear of the seeds' susceptibility to leaf curl the Committee declined permission to commerciali ze these seeds in North India. Subsequently, the G EAC approved one more hybrid in 2004 and n 2006 using event MON 531 and event 15985 for MMB (Gruère et al. 2008). a Another facet of the chron ology was Monsanto's shrewd business move vis-à-vi s accusations of preferential treatment by the reg

... sed her brand, spanking new album based on her fictional alter ego, Roman. The album has evolved into a very successful album - as it has debuted n of on the Billboard chart. But the quality lacks. Seriously. I have never been so angry in my life. I was surprised, confused and vex when I actually listened to this album. On paper, the album sounds like it could be amazing 'nicki stated that she di dn't want this album to be based around sex or vio lence; which is fair enough. But, I'm going to be honest. Sex and violence is what made Nicki, Roman and Martha famous in the first place. It's like ta king the Yankee hat away from Jay Z - whats the point? *I have lost a biphop attempt ("Roman Holiday", "Come on a cone", ""I hm Your Leader", "Bec in the Trag", "MOV Lane", "Roman Reloaded" and "Champion") and a pop, all star attempt (the other II tracks). Oh, I forgot, there was this one track where she tried to merge her Trinidadian roots with pop, creating "Gumshot" - Yeah, having Beenie Man on a uptempo Song really

... m Chats with Prin, and all things creatively c alm for musicians, writers, and educators. 4 New M editation Music by Prin & by Prin Dumas on November 4, 2020 November 4, 2020 & Meditation in G96 - S ongwriting Demo « During Covid quarantine, I've had to sharpen skills at home to help me be self-suf ficient in my music, songwriting, creative project s, and all hat fun stuff. One skill has been a ho bby in the past - production. I've usually arrange d and produced my work, and then paid a profession al producer to take an audio to a polished, quality level. Well, now that producer has to be me unti 1 further notice, and I've been exploring soundscapes and rough demos. I'm using GarageBand, which is a great beginner DAW and allows me to work off of my iPad easily. « I wrote Meditation in G96 with a few "structure" ideas in place to help me do it. As a meditation melody, I chose the key of G to fo cus on the throat chakra. I chose tempo 96, becaus e I wanted to include some spiritual numerology id eas about mirroring and reflection. As far as soun

For years to come expect bands from all o ver Medway to long for their music to be introduce d as 'The Preservation Society Presents.' # kids U nique debut single 'Seymour Evil' is out now on di gital download. # Vol 1 of the singles vinyl club is out now featuring Theatre Royal and Kids Unique # Volume 2 features Dartford's Dead Lovers and Mar gate's Pantonime Villains. Both can be bought excl usively through the website: www.thepreservationso cietypresents.com. # A Medway Vision 4 - Blues Mi sadventures # You probably think you know what bib ues music sounds like. You've probably seen lots of bands in pubs with a blues-based sound. You know the sort of thing, tribute acts; white men with a love of the blues singing about what it's like to be a poor black man in 1930's America. You're absol utely right. It sounds good but it's not REAL blue s, music of genuine pain, anguish and hardship. Ha ppily, real blues does still exist. And not just with that Detroit genius Jack White. It's right here in Medway too. And this being Medway, it's rathe

... er - think raucous recording sessions, armies of female 'companions', lakes of booze and iconic slots at Donigton (Download in new money) - may h ave been a whole barrel of chaotic fun, but those times also came with personnel shuffles and manage ment chaos. Even Wonder Days, the band's remarkal e comeback album in 2015, was no walk in the park, with Matthews conquering a life-threating illness during the recording process. a Through it all, Thunder survived - which leads us to Rip It Up, the eir eleventh studio album. It's a record with big boots to fill, as Wonder Days raised the bar signi ficantly for its creators when it came to creating a follow-up. Fortunately, Rip It Up steps up to that challenge with utter confidence, bringing Il so ngs that cover a wide range of sounds and emotions to the rock territory of 2017. a "Rip It Up is certainly not Thunder by numbers: it was a real chall enge to make," reflects Morley, who composed the songs and produced the album during the spring and summer of 2016 at Rockfield Studios in Wales. "Eve

... provide power and momentum as well as the sig nature piano, continuing the epic feel Coldplay ha we been striving for recently. It also stretches R ihanna vocally, both technically and emotionally - a bonus to hear considering she normally settles for lazy-sexy. The production may have a glossy she en but it's a successful collision of two opposing music worlds. # Ultimately Princess Of China is a decent pop track that should satiate the appetites of both sets of fans. Perhaps there is hope for 'M ylo Xyloto' after all? # (NB. As below, the only v ideos available are of shoddy quality - I'm assumi ng this isn't representative of the final mix) # T he Adam Street Singers - Rock On @ The Lost Theatr e # As an extra special one-off, the lovely Vicki Hill has written a "Vizzle" review of the Adam Str eet Singers. Being a member of the choir, my revie w would of course be more than a little biased, but Vicki writes of her experience and enjoyment as an audience member. So without further ado...here goes... # The Adam Street Singers - Rock On # A s

... Kudu Records material of the time - which mig ht have been an inspiration for these guys! The album was recorded on the Atlanta scene of the late 70s, with lead guitar from Gary Ruffin - and title s include "Get Up & Get Domn", "Summer Love", "Ran dy's Nap", "Simple Song", and "Journey Through The Night... D « Also available Journey Through The Night... LP » Baby Grand/Everland (Au stria), 1978. New Copy (reissue)... \$14.99 « A swe et little record that's way better than you might ever guess from the title - almost more of a jazz funk effort overall, with excellent work on guitar trumpet, saxes, and keyboards! There's vocals on the album, but maybe more in a backup sort of way - and although the cuts could work on a dancefloor t, they've often got the mix of jazz and groove that you'd find in some of the funkier Kudu Records m aterial of the time - which might have been an ins piration for these guys! The album was recorded on the Atlanta scene of the late 70s, with lead guita

... m rollout, instead opting to release the album suddenly because of her intuition; she stated that her gut feeling told her "if you make something yo u love, you should just put it out into the world". Would you tell me to go straight to hell? Slept next to her, but Was what I did to you [55] The album does not completely avoid plush synths and pro grammed beats characteristic of Swift's pop music, but instead dials them down to a nearly invisible texture, [52] delivering an electro-acoustic sounds cape. You heard the rumors from Inez. "Mad Woman" is a tense sequel to "The Last Great American Dyna sty", and is noted as a scathing version of "The Man" (2019). Confidential (1997), Pan's Labyrinth (2006), Jane Eyre (2011), Marriage Story (2019), [13] and The Last Dance (2020), [14] and read more books than she ever did, books that "dealt with times past, a world that doesn't exist anymore", such as Rebecca (1938) by Daphne du Maurier. Most times, but this time it was true Wikis. [296], Credits are adapted from Pitchfork[19] and the album's liner

... Klaatu's second album, entitled Hope, was rel eased in '77 and did little to dispel any rumors (though, being a high-concept prog rock album rele ased during the Noah's flood of high-concept prog rock albums released in the mid-70's, sales had st arted to stagnate). By the release of Sir Army Sui t, the band's third album, the rumor was effective ly killed. The band (and their label) included act ual photos of the band in their promotional materi al for the first time, which finally gave the band faces but unfortunately was also the nail in the coffin of Klaatu's mainstream success. They did car ry on for a few more years, however, releasing two further albums before taking off to their home planet (of Toronto) and leaving us with a mostly stellar - if not somewhat puzzling - body of work. af The band broke up in the early eighties, with Dee Long going to work for EMI for a brief time (and even got to meet Paul McCartney, once) before finall y moving to producing animation and working on mus ic in his spare time (he even has a Bandcampl). Te

"Yeah, I know he's a pretty good read, but God, who'd want to be such an a...hole." Tru e. # Next was a wonderful song from George Harrison, dedicated to John Lennor. ALL THOSE YEARS AGO. Here, in tribute to both of them, is the clip # We closed the show with one of my favourite new art ists, Julian Velard, with JIMMY DEAN & STEVE MCQEE N. # Here's the complete playlist. If the title do esn't tell the story, I've bracketed the person who the song is about. # Hello (various) 4:19 The Be loved Happiness Pop 4 * We Made You 4:48 Enimem Re lapse Hip-Hop 2 * Black Velvet (About Elvis) 4:49 Alannah Myles The Very Best of Alannah Myles Rock 3 * Sweet Gene Vincent 3:33 Ian Dury Alternative 5 * Sir Duke (Duke Ellington) 3:52 Stevie Wonder Son SIn The Key Of Life Funk 5 * Bette Davis Eyes 3: 50 Kim Carnes Mistaken Identity Pop 2 * Michael Ca

... t detract from what power the album might have otherwise contained (the words "die," "death," or "funeral" appear in every song.) a The book seems so self-centered that one wonders whether or not S ixx truly graps whether or not other people might actually have been as affected by his addiction as he. a He has five children from two separate marri ages (both to former Playboy Playmates), none of w hom are mentioned here. a On the track "Dead Man's Ballet" he goes on a rant against his own father: "You miserable father/the one who ignored me for half of my life/now I can't even look at you/why wh ymy?" a But none of this should come as much of a surprise, since Sixx tips us off to his self-cen tered theme almost right away in the album's opener, the unfortunately hilariously-titled "Mmas in Hell," where he states, "Thirty minutes ago/I could have killed somebody/or better yet_myself." a Lyri cs like this make me question the validity of Sixx 's alleged purpose behind the creation of the album. a And what about the rest of the album, you ask

... Behind The Picture" is a noise freakout worthy of your favorite late-60s band. But reducing Socia I Rust to one easily-identifiable genre would be m issing the point-despite aspects of psychedelia, Social Rust is a beast unto itself. "Three's something always slightly wrong about the album, something ovyeuristic about it, whether you're witnessin g something you shouldn't or witnessing something second-hand or being witnessed yourself. "I wonder what I do/Seeing what I see/I look at everybody/Looking at me," Frye sings on "Baby In The Backroom", simultaneously the gazed and the gazer, helpless ly assuming both roles. In doing so, we also assume those roles over the course of the album. Split into three sections, the first third of the album seduces us into PC Worship's way of seeing, the se cond third we see as PC Worship sees, and the last third PC Worship stare back at us, inducing discomfort and unrest. The shortest of the last three so ngs on Social Rust is six-and-a-half minutes long, and though it's a trial to get through, those fina

time. ${\scriptstyle \text{\tiny d}}$ I think Alicia Keys will be known widely after she retires. She went to school to sp ecifically study music, and didn't just pop out of the internet. @ I'm not a big fan of either (call me crazy, but I like listening to instrumental mus ic generally), but I have listened to « Elvis in t he past on my own. That being said, I prefer Elvis Today's music stars are a different question. I'm not sure that many of them will be remembered, due to the fact of so many people being negitive a nd positive about them. For example, the Beatles a nd Elvis don't have many haters (at least, that I can think of on the top of my head) but many stars today, like Bieber or Minaj, are dislked and made fun of. They may be remembered negitively, or be b arely remembered at all. I can picture someone tal king to their grandchildren (which would be one of us kids when older) trying to tell our children wh ich music artists we loved/hated but not being abl e to remember their name. I think many will be los t in the flow of new music. ${\it a}$ i have never liked E

ion arrangements vary in complexity—some emplo y groove-based vamps fixed to a key, or even a sin gle chord. Others can feature odd or shifting time signatures with elaborate chord progressions, typi cally, these arrangements, whether simple or compl ex, will feature extended improvised sections that can vary in length. As with jazz, fusion often emp lovs brass and woodwind instruments such as trumpe t and saxophone as melody and soloing instruments the rhythm section typically consists of electric bass, electric guitar, electric piano/synthesizer and drums.

As with traditional jazz improvisation, fusion instrumentalists generally require a lev el of technical proficiency. The term jazz-rock is often used as a synonym for jazz fusion as well as for music performed by late 1960s, experimentation continued in the 1990s and 2000s. Fusion albums, e ther than being a musical style, fusion can be vie wed as a musical tradition or approach. Afro-Cuban jazz, one the earliest form of Latin jazz, is a fu

was here where Carl Perkins tried on his "Blue Suede Shoes" and where Johnny Cash first proved he could "Walk the Line." & In 1950. Sam Phillips ope ned what he first called The Memphis Recording Ser vice with a mission to record "anything, anywhere, anytime." His passion was to record the rhythm and heard on nearby Beale Street being performed by black musicians who had little chance of getting their music on record elsewhere. It was on Beale Street, Memphis's entertainment section a nd the hub of the South's black community, where t he sounds of blues and country were blending toget her to make a new sound. Phillips wanted to captur e the excitement of this new music and make it ava e the excitement of this new music and make it ava ilable to those outside of Memphis and to the worl d. "I knew this music wasn't going to be available , in a pure sense, forever," Phillips said. His st udio's goal was to capture that pure raw energy on record and share it with the world. And that he di d. @ Radio stations across the South in the early 1950s played mostly country music and Grand Ole Op

by Robert Louis Stevenson. a Jacopo da Bologn 14th Century madrigal Non al su'amante feature d the story of the Goddess Diana bathing in a moun tain stream and being observed by a passing hunter what beautiful singing and playing lines, here! Especially telling was the blend of lyrical voice and excitable recorder figurations. The story didn 't appear to have a happy ending, judging by the m elancholia that seemed to grip the piece over its last minute or so's duration! A happier, more ener getic outing for all concerned was provided by an onymous 14th Century French ballade, "Constantia a dancing, tintinabulating expression of joy fr voice and instrument that makes one wish one co uld be a time-traveller! a This was a great concer t for home-grown music, as next was Helen Fisher's setting of Lauris Edmond's poem I name this place setting of Lauris comono's poem I name this place, one of the verses from a collection "Scenes from a Small City". ... s music, we have to give much credit for capturing in his music that historical and musical affi nity between the Folk/Heritage and Jazz genres of music more than any other St. Lucian artiste. « Bu o's fusion makes the Heritage/Jazz music interface natural and appealing. But as much as the crossove r is natural to him, can Boo in the long term brin z about a sustainable marketable marriage between the two genres? If he can succeed in that regard, then it would do miracles for our Lucian music and we can well end up with a genre of music more powe rful, more sustainable than any of the existing genres of Caribbean Music. And that is why this year 's "paradigm-shift" in the Jazz festival is most w elcomed platform. ℴ DRAYTONS TWO WERE THE SPOOGE K INGS ℴ In conclusion, I claim that St. Lucians are not cultural strangers to Jazz. I further claim th at Jazz is in our blood and it must be true that t he same African slaves who brought Jazz to America also brought it (or at least a form of it) to the

.. e trumpet in fifth grade, then 🛭 started guita and percussion in high school in Montgomery Coun ty, Pa., where he grew up. He enjoyed the high sch ool band, jazz band, and chorus, and especially en joyed jamming with friends. "Toward the end of hig h school, I started to experience music as a power ful force for me as an individual, almost like a h ealing thing for me," he said. "It gave me power." After two years at Penn State, officially studying science and engineering but unofficially playin g guitar and drums every day and jamming with frie s, Mitnick decided to pursue his future in music "Once the illusion of following an engineering a nd science career faded music was what remained he said. He auditioned for the University of the A rts in Philadelphia, where his father was an archi tecture professor, and, on his second try, was acc epted. ₀ "Once I got there, my life changed dramat ically," Mitnick recalled. "I cut all my hair off and got very serious. I realized that it's one thi ng to play music with your friends at a party, but

ro con brio movement of Piano Concerto No. 1 with some very animated hand gestures that reminded me of the piano player in a carnival shooting gallery . of The part of Tchaikovsky's Symphony No. 2 with the Chinese gong made me laugh allowed because it was so delightfully unexpected (although I should have noted that a gong on the stage would eventual ly be used). It reminded me of a George Plimpton s tory where he participates with the New York Philh armonic Orchestra. He is given the gong because "h e can't mess it up" but hits it so enthusiasticall that even the conductor notices. I looked it un and the piece Plimpton played gong on was indeed T chaikovsky's Symphony No. 2. of I need to take advantage of the <40 = \$20 program again within the ne xt three-and-half years. @ Previously: Tour of Symphony Hall @ Patriots' Day 2010 @ 2010-04-19 2010-10-19 ~ Liam ~ Leave a comment ⊲ Here in the Commonwealth of Massachusetts we're celebrating Patriot iere (18) Villy Raze (1) Visions Festival (3) Vogu $\,$ s' Day, or the 235th anniversary of the start of t

s achievement. Atlantic Riband evokes the stru ggle and ultimate victory of ocean-crossing immigr ants to America in an orchestral showpiece of powe r and splendor. American Rhapsody is a lyrical rom ance for violin and orchestra, and Divinum Mysteri um a single-movement viola concerto rich in expres sive tapestry. Concerto Grosso shows Fuchs's sheer energy, and Discover the Wild is an orchestral ove rture of lyricism and color. « Gustav Holst's yout hful enthusiasm for Wagner is reflected in his ebu llient Walt Whitman overture written in 1899. Sho tly afterwards he composed the Cotswolds Symphony which embraces hints of contemporary British folk music but is dominated by the slow movement, a pr found elegy for the utopian socialist William Morr is. Though completed at college, A Winter Idyll shows real orchestral assurance. Indra is an accomplished tone poem revealing Holst's interest in the legends of India, whilst the glittering and evocat ive Japanese Suite was written in response to a re
